HIGH STAKES MANAGEMENT

To further data-driven instruction and monitor progress towards your unique goals, Savvas offers High Stakes Management Services that accompany our Implementation Essentials.

High Stakes Management™ (HSM) is an established research-based service designed to forecast and manage student achievement in the high-stakes world of assessments. An HSM implementation provides you with expert consulting, advice and detailed reports to maximize student performance. Services packages vary based on the number of schools and desired level of support but often include:

Services	Description
Implementation Planning and System Set-up	Design of the HSM Program Plan and School Action Plans (including training timelines).
Data Collection and Report Generation for Interim Progress and Time-of-test Reports	Collect and compile student data into succinct and informative reports.
Interim Progress Report Meeting and Data Analysis Presentation	Review and interpret the results of the data, including usage trends, gains and mastery performance to recommend changes to the implementation prior to the high-stakes assessment to enhance outcomes.
Time-of-test Progress Report, Analysis and Review	Review data when students take the test or at the end of the year to make implementation decisions for the remainder of the year or create a proactive plan for next year.
On-target Analysis and Review	Analyze the statistical relationship between the student data and high-stakes assessment data. Review whether targets used during the course of the year were strong indicators of student achievement on high-stakes assessments.
On-site and Connected Support	Provide additional support and guidance either on-site or remotely.
