# Supply Survey

What is art? Some pieces of art look pretty. Most pieces of art mean something.

The person who makes the art is called an artist. Men, women, boys, and girls can all be artists. Artists can be young, old, or in between.

There are lots of ways to make art. You can paint or draw. A drawing can be done in marker, crayon, colored pencil, or chalk!

## Your Project Make an Art Poster

Ask your classmates about their favorite art supplies.

Who likes paint? markers? colored pencils?

Make a poster that shows the data. Create a tally chart and picture graph using the data.

## Getting Dressed

Think about all the clothes there are! We decide what to wear each day.

Sometimes we dress for the weather. People wear shorts or skirts in the heat. People wear sweaters and jackets in cold weather.

Other times we dress for fun. Some people like to wear a hat. Other people like to wear brightly colored socks. Do you have a fun outfit?

### Your Project Draw an Outfit

Create 2 or 3 clothing questions to ask your classmates.

Examples: Would you rather wear a skirt or shorts?

Would you rather wear a cowboy hat or a baseball cap?

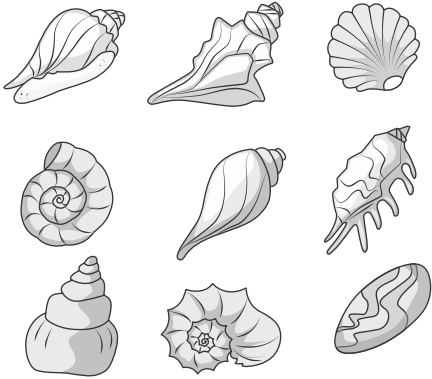

Show all the data in tally charts. Create a drawing of a person wearing the clothes most often selected.

## Shell Selection

A seashell is the shell of an animal. It is the hard case the animal uses to protect itself.

Animals that need shells are soft. They have no backbone. The animals are mostly small.

The seashells protect the animals that live inside from other animals. Shells also protect them from the sand and waves.

## Your Project Model Favorite Seashells

Choose and draw 3 different types of seashells. Ask your classmates which of the 3 is their favorite. Show the results with a model. Use **connecting cubes** to show how many chose each type.
