**Introduction**

The following document demonstrates how the ***Elevate Science, ©2019*** program supports Arizona Standards for Science (adopted in 2018). For each standard, correlation references are to the Student Edition and Teacher Edition where applicable.

***Elevate Science*** is a comprehensive K-5 science program that focuses on active, student-centered learning. It builds students' critical thinking, questioning, and collaboration skills, and fuels interest in STEM and creative problem solving while supporting literacy development for elementary-age learners. Developed to support Next Generation Science Standards (NGSS), ***Elevate Science*** integrates three-dimensional learning of the Scientific and Engineering Practices, Crosscutting Concepts (CCC), and Disciplinary Core Ideas (DCIs).

The ***Elevate Science*** blended print and digital curriculum engages students in phenomena-based inquiry and hands-on investigations.

- Problem-based learning Quests put students on a journey of discovery
- Engineering-focused features infuse STEM learning
- Coding and innovation engage students and build 21<sup>st</sup> century skills

The Teacher's Edition of ***Elevate Science*** helps elementary educators teach science with confidence: Scaffolding, ELD, differentiated instruction, and an instructional organization based upon the 5E learning model, (Engage, Explore, Explain, Extend/Elaborate, Evaluate), provide all the support needed for successful teaching practices. Professional development offers point-of-use support. A full-view approach to inquiry and testing provides new options for a variety of hands-on labs and assessments for three-dimensional learning.

***Elevate Science*** prepares students for the challenges of tomorrow, building strong reasoning skills and critical thinking strategies as they engage in explorations, formulate claims, and gather and analyze data that promote evidence-based argument. Designed for today's classroom, preparing students for tomorrow's world. ***Elevate Science*** promises to:

- Elevate thinking.
- Elevate learning.
- Elevate teaching.

Arizona Science Standards (2018), Grade 4**

<b>Arizona Science Standards (2018) Grade 4</b>	<b>Elevate Science ©2019 Grade 4</b>
<b>Fourth Grade: Systems and System Models; Energy and Matter; Stability and Change</b>	
<p>By the end of fourth grade, students expand on the idea that energy from the Sun interacts with Earth systems and explore other forms of energy we use in everyday life. Students apply their understanding of the various Earth systems (geosphere, hydrosphere, atmosphere, biosphere) and how they interact with each other and heat from the Sun. Students understand how geological systems change and shape the planet and provide resources. Students also develop an understanding of how Earth processes and human interactions positively and negatively that can change environments impacting the ability for organisms to survive. Student investigations focus on collecting and making sense of observational data and simple measurements using the science and engineering practices: ask questions and define problems, develop and use models, plan and carry out investigations, analyze and interpret data, use mathematics and computational thinking, construct explanations and design solutions, engage in argument from evidence, and obtain, evaluate, and communicate information. While individual lessons may include connections to any of the crosscutting concepts, the standards in fourth grade focus on helping students understand phenomena through systems and system models, energy and matter and stability and change.</p>	
<b>Physical Sciences: Students develop an understanding of how Earth's resources can be transformed into different forms of energy. Students develop a better understanding of electricity and magnetism.</b>	
<b>Physical Science Standards</b>	
<p>4.P4U1.1 Develop and use a model to demonstrate how a system transfers energy from one object to another even when the objects are not touching.</p>	<p><b>SE/TE:</b>  Topic 1 Energy, 8  Topic 1 Energy in Motion, 9  Topic 1 Visual Literacy Connection: How does energy affect particles of matter?, 10-11  Topic 1 Collisions: Sports Connection, 16  Topic 1 uInvestigate Lab: How does energy transfer between objects?, 17  Topic 1 Visual Literacy Connection: Energy Changes in a Collision, 18-19  Topic 1 uInvestigate Lab: How does heat move?, 25  Topic 1 Visual Literacy Connection: How is energy transferred?, 26-27  Topic 1 Energy and Particle Motion, 28  Topic 1 Interactivity, 28  Topic 1 Crosscutting Concept Toolbox: Systems, 36  Topic 1 Electric Circuits, 38  Topic 1 Interactivity, 38  Science and Engineering Practices Handbook: Science Practices, Developing and Using Models, EM6</p>
