Oklahoma 2020 Standards for Science: High School Chemistry**

**Introduction**

This document demonstrates how **Oklahoma Experience Chemistry ©2022** supports Oklahoma's 2020 Academic Standards for Science: High School Chemistry. Correlation references include the Experience Notebook (Vol. 1 and 2), Teacher Guide, and online digital assets.

Savvas Learning Company is excited to introduce **Experience Chemistry!** From climate change, water quality, and the newest energy sources, to the foods we grow and eat, your students will experience chemistry like never before. The program uses cool, weird, and amazing phenomena to engage students in 3-D science. Give students an up-close, first-hand experience they'll never forget.

**Be the first to *Experience It!***

Storylines are organized around a real-world Anchoring Phenomena that sparks student curiosity, gives a purpose to learning and connects chemistry concepts through a unifying unique occurrence. Students encounter everyday phenomena through Claims-Evidence Reasoning Exercises, Authentic Readings, STEM Projects, and Engineering Performance Tasks.

**Explore Phenomena with Flinn Scientific!**

**Experience Chemistry** and Flinn Scientific partner to deliver high-quality inquiry opportunities to chemistry classrooms. Lab Experiments, Engineering Challenges, Performance Tasks, Virtual Reality Simulations, and Lab Videos by Flinn Scientific immerse students in hands-on chemistry.

**Hands-On Labs**

- Assign student-friendly labs focused on real-world phenomena in every learning experience.
- Customize your lessons with four versions of every lab including Open-Ended, Guided, Shortened, and Advanced.

**Lab Videos**

- Background videos, demo videos and summary videos engage and connect students to the phenomena, prepare students and instructors for set-up and revisit concepts before assessments.

**Design Challenges and Performance Tasks**

- Students mimic the real-world activities of engineers as they define and solve problems and design, test and evaluate solutions.
- Students demonstrate mastery of three-dimensional learning at the end of every Investigation with a Performance-Based assessment.

**Lab Kits**

- Simplify lab set-up and solution preparation with time-saving lab kits.

**Virtual Reality**

- Immerse your students in 360° simulations that bring chemistry to life.

Oklahoma 2020 Academic Standards for Science High School Chemistry	Oklahoma Experience Chemistry ©2022
<b>Science and Engineering Practices</b>	
<b>CH.PS3.4.SEP.1:</b> Planning and Carrying Out Investigations: Plan and conduct investigations individually and collaboratively to produce data to serve as the basis for evidence, and in the design: decide on types, how much, and accuracy of data needed to produce reliable measurements; consider limitations on the precision of the data (e.g., number of trials, cost, risk, time); and refine the design accordingly.	<b>Experience Notebook, Volume 2: Investigation 15</b> SEP Plan an Investigation, 300  <b>Teacher Guide:</b> <b>Inquiry Labs:</b> Measure the Energy of a Phase Change; The Thermodynamics of Hand Warmers; The Heat of Melting Ice; Supersaturation and Thermodynamics <b>Performance Based Assessment:</b> Enthalpy of a Neutralization Reaction
<b>Crosscutting Concepts</b>	
<b>CH.PS3.4.CCC.1:</b> Systems and System Models: When investigating or describing a system, the boundaries and initial conditions of the system need to be defined and their inputs and outputs analyzed and described using models.	<b>Experience Notebook, Volume 1: Investigation 8</b> SEP Develop a Model, 283  <b>Experience Notebook, Volume 2: Investigation 12</b> SEP Use Models, 178 CCC Systems and System Models, 183–184
<b>Waves and Their Applications in Technologies for Information Transfer (PS4)</b>	
<b>Performance Expectation</b>	
<b>CH.PS4.1:</b> Use mathematical representations to support a claim regarding relationships among the frequency, wavelength, and speed of waves traveling in various media.	<b>Digital:</b> Oklahoma Experience 1: Wave Properties <b>Inquiry Lab:</b> Mechanical Waves  For supporting content, please see: <b>Experience Notebook, Volume 2: Investigation 11</b> Radiation: Absorption and Reradiation, 102 Incoming and Outgoing Radiation, 105-106  <b>Investigation 17</b> Radiation Penetration, 387
<b>Disciplinary Core Ideas</b>	
<b>CH.PS4.1.DCI.1:</b> The wavelength and frequency of a wave are related to one another by the speed of travel of the wave, which depends on the type of wave and the medium through which it is passing.	<b>Digital:</b> Oklahoma Experience 1: Wave Properties <b>Inquiry Lab:</b> Mechanical Waves  For supporting content, please see: <b>Experience Notebook, Volume 1: Investigation 1</b> Atomic Emission Spectra, 22-23  <b>Experience Notebook, Volume 2: Investigation 17</b> Radiation Penetration, 387

**A Correlation of Oklahoma Experience Chemistry ©2022  
To the  
Oklahoma 2020 Standards for Science: High School Chemistry**

Oklahoma 2020 Academic Standards for Science High School Chemistry	Oklahoma Experience Chemistry ©2022
<b>Science and Engineering Practices</b>	
<b>CH.PS4.1.SEP.1:</b> Using Mathematics and Computational Thinking: Use mathematical, computational, and/or algorithmic representations of phenomena or design solutions to describe and/or support claims and/or explanations.	<b>Digital:</b> Oklahoma Experience 1: Wave Properties <b>Inquiry Lab:</b> Mechanical Waves
<b>Crosscutting Concepts</b>	
<b>CH.PS4.1.CCC.1:</b> Cause and Effect: Empirical evidence is required to differentiate between cause and correlation and make claims about specific causes and effects	<b>Digital:</b> Oklahoma Experience 1: Wave Properties <b>Inquiry Lab:</b> Mechanical Waves
<b>Performance Expectation</b>	
<b>CH.PS4.3:</b> Develop an argument for how scientific evidence supports the explanation that electromagnetic radiation can be described either by the wave model or the particle model, and in some situations one model is more useful than the other.	<b>Digital:</b> Oklahoma Experience 2: Electromagnetic Waves and Their Properties <b>Inquiry Lab:</b> Particle Nature of Life  For supporting content, please see: <b>Experience Notebook, Volume 1:</b> Investigation 1 Atomic Emission Spectra, 22-23 The Bohr Model, 24-25  <b>Experience Notebook, Volume 2:</b> <b>Investigation 17</b> The Standard Model, 359-360
<b>Disciplinary Core Ideas</b>	
<b>CH.PS4.3.DCI.1:</b> Waves can add or cancel one another as they cross, depending on their relative phase (i.e., relative position of peaks and troughs of the waves), but they emerge unaffected by each other.	<b>Digital:</b> Oklahoma Experience 2: Electromagnetic Waves and Their Properties <b>Inquiry Lab:</b> Particle Nature of Life
<b>CH.PS4.3.DCI.2:</b> Boundary: The discussion at this grade level is qualitative only; it can be based on the fact that two sounds can pass a location in different directions without getting mixed up.	<b>Digital:</b> Oklahoma Experience 2: Electromagnetic Waves and Their Properties <b>Inquiry Lab:</b> Particle Nature of Life
<b>CH.PS4.3.DCI.3:</b> Electromagnetic radiation (e.g., radio, microwaves, light) can be modeled as a wave of changing electric and magnetic fields or as particles called photons. The wave model is useful for explaining many features of electromagnetic radiation, and the particle model explains other features.	<b>Digital:</b> Oklahoma Experience 2: Electromagnetic Waves and Their Properties <b>Inquiry Lab:</b> Particle Nature of Life  For supporting content, please see: <b>Experience Notebook, Volume 2:</b> <b>Investigation 17</b> The Standard Model, 359-360
