**Introduction**

The following document demonstrates how the ***Elevate Science***, ©2019 program supports the Massachusetts Science and Technology Engineering Standards for Grades K-5. For each standard, correlation references are to the Student Edition and Teacher Edition where applicable.

***Elevate Science*** is a comprehensive K-5 science program that focuses on active, student-centered learning. It builds students' critical thinking, questioning, and collaboration skills, and fuels interest in STEM and creative problem solving while supporting literacy development for elementary-age learners. Developed to support Next Generation Science Standards (NGSS), ***Elevate Science*** integrates three dimensional learning of the Scientific and Engineering Practices, Crosscutting Concepts (CCC), and Disciplinary Core Ideas (DCIs).

The ***Elevate Science*** blended print and digital curriculum engages students in phenomena-based inquiry and hands-on investigations.

- Problem-based learning Quests put students on a journey of discovery
- Engineering-focused features infuse STEM learning
- Coding and innovation engage students and build 21<sup>st</sup> century skills

The Teacher's Edition of ***Elevate Science*** helps elementary educators teach science with confidence: Scaffolding, ELD, differentiated instruction, and an instructional organization based upon the 5E learning model, (Engage, Explore, Explain, Extend/Elaborate, Evaluate), provide all the support needed for successful teaching practices. Professional development offers point-of-use support. A full-view approach to inquiry and testing provides new options for a variety of hands-on labs and assessments for three-dimensional learning.

***Elevate Science*** prepares students for the challenges of tomorrow, building strong reasoning skills and critical thinking strategies as they engage in explorations, formulate claims, and gather and analyze data that promote evidence-based argument. Designed for today's classroom, preparing students for tomorrow's world. ***Elevate Science*** promises to:

- Elevate thinking.
- Elevate learning.
- Elevate teaching.

<b>5-LS2</b>	<b>Ecosystems: Interactions, Energy, and Dynamics</b>	
5-LS2-1	Develop a model to describe the movement of matter among producers, consumers, decomposers, and the air, water, and soil in the environment to (a) show that plants produce sugars and plant materials, (b) show that animals can eat plants and/or other animals for food, and (c) show that some organisms, including fungi and bacteria, break down dead organisms and recycle some materials back to the air and soil.	<b>SE/TE:</b> ulInvestigate Lab: How is the sun involved in your meals?, 321 What is a trophic level?, 324-325 Energy Paths to the Sun, 326 ulInvestigate Lab: What matter do plants need to make food?, 329 Model It!, 330 Photosynthesis, 330 ulInvestigate Lab How do animals get energy from the sun?, 339 Crosscutting Concepts Toolbox: Energy and Matter, 340 Evidence-Based Assessment, 350-351 uDemonstrate Lab: How does matter move through an ecosystem?, 352-353 STEM Connection, 368 ulInvestigate Lab: How can matter change in an ecosystem?, 369 Visual Literacy Connection: Who eats whom?, 372-373 Food Webs, 375 ulInvestigate Lab: How does matter move through an ecosystem?, 387 Cycles of Matter, 392 Quest Check-In: Moving Matter and Energy, 393 Topic Assessment, 398-399
5-LS2-2(MA)	Compare at least two designs for a composter to determine which is most likely to encourage decomposition of materials.	<b>SE/TE:</b> ulInvestigate Lab: What happens to substances over time?, 205 ulInvestigate Lab: How can matter change in an ecosystem?, 369 Supporting Content: Decomposers, 371

<b>5-PS</b>	<b>Physical Science</b>	
5-PS1	Matter and Its Interactions	
5-PS1-1	Use a particle model of matter to explain common phenomena involving gases, and phase changes between gas and liquid and between liquid and solid.	<b>SE/TE:</b> Visual Literacy Connection What is the matter?, 20-21 Model It!, 28 States of Matter, 28 Topic Assessment, 36-37
5-PS1-2	Measure and graph the weights (masses) of substances before and after a reaction or phase change to provide evidence that regardless of the type of change that occurs when heating, cooling, or combining substances, the total weight (mass) of matter is conserved.	<b>SE/TE:</b> uConnect Lab: What happens to mass when objects are mixed?, 46 Conservation of Matter, 68-69 Visual Literacy Connection: Is matter conserved?, 70-71 uBe a Scientist: Mass and Plant Growth, 72 Lesson 3 Check, 73 uDemonstrate Lab: How does mass change when you make glop?, 94-95

Massachusetts Science and Technology Engineering Standards for Kindergarten**

<b>Massachusetts Science and Technology Engineering Standards, Grade 5</b>		<b>Elevate Science Grade 5 ©2019</b>
5-PS1-3	Make observations and measurements of substances to describe characteristic properties of each, including color, hardness, reflectivity, electrical conductivity, thermal conductivity, response to magnetic forces, and solubility.	<b>SE/TE:</b> Observing Properties, 8 uBe a Scientist: Identify Properties, 8 Conductors of Heat and Electricity, 12 Magnetic Materials, 12 Quest Connection, 13 Solubility, 13 uInvestigate Lab: How can you use properties to identify solids?, 27 Color, 30 Texture and Hardness, 31 Quest Check-In lab: How can you compare the properties of matter?, 32-33 Topic Assessment, 36-37 Quest Check-In: Stepping Stone Properties, 62 Evidence-Based Assessment, 92-93
5-PS1-4	Conduct an experiment to determine whether the mixing of two or more substances results in new substances with new properties (a chemical reaction) or not (a mixture).	<b>SE/TE:</b> uInvestigate Lab How can you identify chemical changes?, 65 Mixtures, 80 Visual Literacy Connection: When is a mixture also a solution?, 82-83 Mixtures and Solutions, 85 uBe a Scientist: Kitchen Science, 85 uDemonstrate Lab: How does mass change when you make glop?, 94-95

<b>Massachusetts Science and Technology Engineering Standards, Grade 5</b>		<b>Elevate Science Grade 5 ©2019</b>
<b>5-PS2</b>	<b>Motion and Stability: Forces and Interactions</b>	
5-PS2-1	Support an argument with evidence that the gravitational force exerted by Earth on objects is directed toward Earth’s center.	<b>SE/TE:</b> uInvestigate Lab: How long do objects take to fall?, 279 Gravitational Force, 280 Gravity on Earth, 281 uBe a Scientist: Explore Gravity, 281 Argument from Evidence, 282 Science Practice Toolbox: Engage in Quest Connection, 282 Quest Check-In Lab: How does gravity affect matter?, 283 Topic Assessment, 308-309
<b>5-PS3</b>	<b>Energy</b>	
5-PS3-1	Use a model to describe that the food animals digest (a) contains energy that was once energy from the Sun, and (b) provides energy and nutrients for life processes, including body repair, growth, motion, body warmth, and reproduction.	<b>SE/TE:</b> uConnect Lab: How much food do you need?, 318 uInvestigate Lab: How is the sun involved in your meals?, 321 Energy Paths to the Sun, 326 uInvestigate Lab: How do animals get energy from the sun?, 339 Crosscutting Concepts Toolbox: Energy and Matter, 340 Quest Findings: Plan Your Plate!, 346 Topic Assessment, 348-349
