7TH GRADE EASTERN HEMISPHERE STUDIES	
Seventh Grade includes Europe, Africa, Asia, and Australia. Europe and Russia are listed in the document for 7th grade, but may be included with either Western or Eastern Hemisphere Studies. World History Eras 1, 2, and 3 and The World in Temporal Terms and The World in Spatial Terms are included in Grades 6 and 7 as a foundation for World History and Geography in the high school. Capstone projects of historical and contemporary global issues that have significance for the student and clearly linked to the world outside the classroom are included.	
HISTORY	
H1 THE WORLD IN TEMPORAL TERMS: HISTORICAL HABITS OF MIND (FOUNDATIONAL EXPECTATIONS ADDRESSED IN GRADE 6) <i>Evaluate evidence, compare and contrast information, interpret the historical record, and develop sound historical arguments and perspectives on which informed decisions in contemporary life can be based.</i>	
H1.1 Temporal Thinking	
<i>Use historical conceptual devices to organize and study the past.</i> Historians use conceptual devices (eras, periods, calendars, time lines) to organize their study of the world. Chronology is based on time and reflects cultural and historical interpretations, including major starting points, and calendars based on different criteria (religious, seasonal, Earth-sun-and-moon relationships). Historians use eras and periods to organize the study of broad developments that have involved large segments of world's population and have lasting significance for future generations and to explain change and continuity.	
7 – H1.1.1 Explain why and how historians use eras and periods as constructs to organize and explain human activities over time.	SE/PG: Measuring Time, 4–5 PG only: Core Concepts Handbook: Measuring Time, T4; Timeline Builders, T5
7 – H1.1.2 Compare and contrast several different calendar systems used in the past and present and their cultural significance (e.g., Sun Dial, Gregorian calendar – B.C./A.D.; contemporary secular – B.C.E./C.E.; Chinese, Hebrew, and Islamic/Hijri calendars).	SE/PG: Measuring Time, 4–5; The Egyptian Calendar, 156; Roman Calendar, 5; A New Calendar, 719–720; Aztec Calendar, 594, 595; China, 553; Incan Calendar, 606; Japan, 553; Mayan Calendar, 588

<p>H1.2 Historical Inquiry and Analysis <i>Use historical inquiry and analysis to study the past.</i> History is a process of reasoning based on evidence from the past. Historians use and interpret a variety of historical documents (including narratives), recognize the difference between fact and opinion, appreciate multiple historical perspectives while avoiding present mindedness (judging the past solely in term of norms and values of today), and explain that historical events often are the result of multiple causation. Students will conduct their own inquiry and analysis in their studies about the ancient history of the Eastern Hemisphere.</p>	
<p>7 – H1.2.1 Explain how historians use a variety of sources to explore the past (e.g., artifacts, primary and secondary sources including narratives, technology, historical maps, visual/mathematical quantitative data, radiocarbon dating, DNA analysis).</p>	<p>SE/TE: Historical Sources, 6–7; Primary Sources (Analyze the Documents), 101, 191, 291, 355, 423, 479, 573, 619, 703, 787; Writing Task: Comparing Documents, 323, 479, 619, 677, 701; also see: Document–Based Questions, 77, 99, 139, 165, 189, 229, 249, 269, 289, 353, 385, 421, 445, 477, 511, 543, 571, 597, 617, 647, 677, 701, 735, 757, 785; Identify Bias, 499, 529, 533, 702, 703, 756, 775; Compare Viewpoints, 241, 288, 291, 321, 333, 379, 607, 749, 775; Maps, 10, 11, 12, 13, 14, 15, 38, 42, 44, 50, 62, 69, 85, 92, 98, 112, 183, 185, 188, 201, 204, 207, 218, 226, 236, 243, 248, 255, 259, 279, 301, 310, 319, 330, 332, 336, 365, 381, 391, 403, 406, 418, 433, 438, 451, 452, 461, 469, 489, 492, 496, 501, 510, 518, 520, 525, 528, 532, 543, 549, 570, 583, 584, 591, 603, 609, 629, 630, 632, 636, 641, 653, 659, 667, 674, 685, 696, 713, 714, 734, 751, 764, 766, 771, 777</p>

WORLD HISTORY	
W1 WHG ERA 1 – THE BEGINNINGS OF HUMAN SOCIETY: BEGINNINGS TO 4000 B.C.E./B.C. <i>Explain the basic features and differences between hunter-gatherer societies and pastoral nomads. Analyze and explain the geographic, environmental, biological, and cultural processes that influenced the rise of the earliest human communities, the migration and spread of people throughout the world, and the causes and consequences of the growth of agriculture.</i>	
W1.1 Peopling of the Earth <i>Describe the spread of people in the Eastern Hemisphere in Era 1.</i> In the first era of human history, people spread throughout the world. As communities of hunters, foragers, or fishers, they adapted creatively and continually to a variety of contrasting, changing environments in Africa, Eurasia, and Australia.	
7 – W1.1.1 Explain how and when human communities populated major regions of the Eastern Hemisphere (Africa, Australia, Europe, Asia) and adapted to a variety of environments.	SE/PG: Populating the Earth, 68–75; Chapter Assessment, 76
7 – W1.1.2 Explain what archaeologists have learned about Paleolithic and Neolithic patterns of living in Africa, Western Europe, and Asia. W1.2 Agricultural Revolution <i>Describe the Agricultural Revolution and explain why it was a turning point in history.</i> The Agricultural Revolution was a major turning point in history that resulted in people and civilizations viewing and using the land in a systematic manner to grow food crops, raise animals, produce food surpluses, and the development of sedentary settlement.	
7 – W1.2.1 Explain the importance of the natural environment in the development of agricultural settlements in different locations (e.g., available water for irrigation, adequate precipitation, and suitable growth season).	SE/PG: The Birth of Farming, 82–84; The Spread of Farming, 85–86

W2 WHG ERA 2 – EARLY CIVILIZATIONS AND CULTURES AND THE EMERGENCE OF PASTORAL PEOPLES, 4000 TO 1000 B.C.E./B.C. <i>Describe and differentiate defining characteristics of early civilization and pastoral societies, where they emerged, and how they spread.</i>	
W2.1 Early Civilizations and Early Pastoral Societies <i>Analyze early Eastern Hemisphere civilizations and pastoral societies.</i> During this era early civilizations and pastoral societies emerged. Many of the world’s most fundamental institutions, discoveries, inventions, and techniques appeared. Pastoral societies developed the herding of animals as a primary food source that enabled them to inhabit the semi-arid steppes of Eurasia and Africa. This era introduces students to one of the most enduring themes in history: the dynamic interplay, between herding and agrarian societies involving both conflict and mutual dependence.

GEOGRAPHY	
G1 THE WORLD IN SPATIAL TERMS: GEOGRAPHICAL HABITS OF MIND (FOUNDATIONAL EXPECTATIONS ADDRESSED IN GRADE 6) <i>Study the relationships between people, places, and environments by using information that is in a geographic (spatial) context. Engage in mapping and analyzing the information to explain the patterns and relationships they reveal both between and among people, their cultures, and the natural environment. Identify and access information, evaluate it using criteria based on concepts and themes, and use geography in problem solving and decision making. Explain and use key conceptual devices (places and regions, spatial patterns and processes) that geographers use to organize information and inform their study of the world.</i>	
G1.1 Spatial Thinking <i>Use maps and other geographic tools to acquire and process information from a spatial perspective.</i> Geographers use published maps, sketch (mental) maps, and other geographic representations, tools, and technologies to acquire, organize, process, and report information from a spatial perspective. World maps made for specific purposes (population distribution, climate patterns, vegetation patterns) are used to explain the importance of maps in presenting information that can be compared, contrasted, and examined to answer the questions “Where is something located?” and “Why is it located there?” Students will begin with global scale and then refocus the scale to study the region of the Eastern Hemisphere, and, finally, focus on a specific place.
