## Introduction

This document demonstrates how *Pearson Integrated CME Project Mathematics I-III* ©2013 meets the standards of the *Common Core State Standards for Mathematics*. Correlation references are to the pages of the Student and Teacher's Editions.

The *Integrated CME Project* is an NSF-funded core mathematics program that was built for the Integrated Pathway of the Common Core State Standards. It includes content from algebra, geometry, as well as precalculus concepts. The program's proven-effective pedagogy provides the focus, coherence, and rigor necessary to ensure today's students master the challenging new Common Core State Standards. The program also incorporates technology and hands-on projects and activities to engage today's digital students in deep mathematical learning.

*Integrated CME* Content includes Mathematics I, Mathematics II, and Mathematics III. Each course is focused on big ideas. *Integrated CME Project* is organized by coherent chapters. Chapters are comprised of investigation. Each Investigation is then composed of 3-6 lessons. The basic mathematics of each Investigation is accessible to all, and each Investigation can ultimately challenge the best students. The students work from a more informal to formal understanding of the mathematical topic explored in that particular chapter. The Investigation wrap-up, called Mathematical Reflections, provides an opportunity to review and summarize at the end of the chapter—good preparation for the Next-Generation assessments that will require students to justify their conclusions and mathematical understandings in writing. A Chapter Project extends student understanding by presenting challenges and highlighting connections to additional topics—projects are great preparation for performance tasks that will be on the upcoming Next-Generation assessments.

This document demonstrates the high degree of success students will achieve by using *Pearson Integrated CME Project Mathematics I-III*.

<b>Math Practices</b>	
<p><b>MP1 Make sense of problems and persevere in solving them.</b> Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>	<p>The goal of the CME project is for students to engage in different activities to develop a deep understanding of mathematics. In addition to providing extensive practice in critical thinking and problem-solving skills, the problems are geared to engage students in communicating and exploring mathematics with In-Class Experiments and Project. Each investigation includes a Getting Started lesson that activates prior knowledge and explores new ideas. Mind in Action offers opportunities for communication and reflection through student-student and student-teacher dialogues.</p> <p><b>Mathematics I</b> <b>SE/TE:</b> <b>Checking Your Understanding:</b> (#1), 39 (#7), 204 (#5), 333 (#4, 6) <b>On Your Own:</b> 15 (#6), 107 (#6), 141 (#12-14), 147 (#14), 479 (#4) <b>Maintain Your Skills:</b> 27 (#16), 66 (#15), 76 (#14), 199 (#17), 214 (#10), 526 (#12-15)</p> <p><b>Mathematics II</b> <b>SE/TE:</b> <b>Checking Your Understanding:</b> 67 (#12), 79 (#7), 97 (#4), 123 (#6), 398 (#4-5), 471 (#7), 501 (#3-5), 564 (#11) <b>On Your Own:</b> 31 (#4), 73 (#12), 244 (#12), 679 (#14) <b>Maintain Your Skills:</b> 387 (#14), 449 (#11), 640 (#10), 740 (#13)</p> <p><b>Mathematics III</b> <b>SE/TE:</b> <b>Checking Your Understanding:</b> 9 (#4), 15 (#12), 459 (#3), 596 (#1) <b>On Your Own:</b> 68 (#7), 304 (#9-10), 338 (#11-12), 376 (#15), 460 (#13), 590 (#15) <b>Maintain Your Skills:</b> 106 (#4), 136 (#23), 205 (#13), 309 (#17-18), 557 (#22)</p>

<p><b>MP2 Reason abstractly and quantitatively.</b> Mathematically proficient students make sense of quantities and their relationships in problem situations. They bring two complementary abilities to bear on problems involving quantitative relationships: the ability to decontextualize—to abstract a given situation and represent it symbolically and manipulate the representing symbols as if they have a life of their own, without necessarily attending to their referents—and the ability to contextualize, to pause as needed during the manipulation process in order to probe into the referents for the symbols involved. Quantitative reasoning entails habits of creating a coherent representation of the problem at hand; considering the units involved; attending to the meaning of quantities, not just how to compute them; and knowing and flexibly using different properties of operations and objects.</p>	<p>The goal of the CME project is for students to engage in different activities to develop a deep understanding of mathematics. In addition to providing extensive practice in critical thinking and problem-solving skills, the problems are geared to engage students in communicating and exploring mathematics with In-Class Experiments and Project. Each investigation includes a Getting Started lesson that activates prior knowledge and explores new ideas. Mind in Action offers opportunities for communication and reflection through student-student and student-teacher dialogues.</p> <p><b>Mathematics I</b> <b>SE/TE:</b> <b>Checking Your Understanding:</b> 53 (#2), 74 (#5), 95 (#3, 5), 123 (#3), 174 (#4), 177 (#12), 368 (#1), 369 (#2) <b>On Your Own:</b> 97 (#11), 147 (#16), 176 (#9), 369 (#4), 677 (#5-6) <b>Maintain Your Skills:</b> 27 (#16), 177 (#14), 439 (#13)</p> <p><b>Mathematics II</b> <b>SE/TE:</b> <b>Checking Your Understanding:</b> 57 (#7), 67 (#8), 103 (#5-10), 108 (#9), 130 (#5), 219 (#3) <b>On Your Own:</b> 31 (#4), 40 (#16), 57 (#12), 73 (#9), 564 (#11), 639 (#5), 678 (#12) <b>Maintain Your Skills:</b> 209 (#18), 337 (#25), 346 (#19), 679 (#16), 715 (#10)</p> <p><b>Mathematics III</b> <b>SE/TE:</b> <b>Checking Your Understanding:</b> 27 (#3), 250 (#7), 320 (#8), 429 (#2), 488 (#8) <b>On Your Own:</b> 23 (#14), 46 (#13, 14), 53 (#5), 111 (#6), 350 (#8), 459 (#11), 599 (#19) <b>Maintain Your Skills:</b> 24 (#17), 72 (#10), 468 (#15-16)</p>

Common Core State Standards for Mathematics – High School	Integrated CME Project ©2013
<p><b>MP3 Construct viable arguments and critique the reasoning of others.</b> Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>	<p>The goal of the CME project is for students to engage in different activities to develop a deep understanding of mathematics. In addition to providing extensive practice in critical thinking and problem-solving skills, the problems are geared to engage students in communicating and exploring mathematics with In-Class Experiments and Project. <p><b>MP4 Model with mathematics.</b> Mathematically proficient students can apply the mathematics they know to solve problems arising in everyday life, society, and the workplace. In early grades, this might be as simple as writing an addition equation to describe a situation. In middle grades, a student might apply proportional reasoning to plan a school event or analyze a problem in the community. By high school, a student might use geometry to solve a design problem or use a function to describe how one quantity of interest depends on another. Mathematically proficient students who can apply what they know are comfortable making assumptions and approximations to simplify a complicated situation, realizing that these may need revision later. They are able to identify important quantities in a practical situation and map their relationships using such tools as diagrams, two-way tables, graphs, flowcharts and formulas. They can analyze those relationships mathematically to draw conclusions. They routinely interpret their mathematical results in the context of the situation and reflect on whether the results make sense, possibly improving the model if it has not served its purpose.</p>	<p>The goal of the CME project is for students to engage in different activities to develop a deep understanding of mathematics. In addition to providing extensive practice in critical thinking and problem-solving skills, the problems are geared to engage students in communicating and exploring mathematics with In-Class Experiments and Project. <p><b>MP5 Use appropriate tools strategically.</b> Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>	<p>The goal of the CME project is for students to engage in different activities to develop a deep understanding of mathematics. In addition to providing extensive practice in critical thinking and problem-solving skills, the problems are geared to engage students in communicating and exploring mathematics with In-Class Experiments and Project. <p><b>MP6 Attend to precision.</b> Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>	<p>The goal of the CME project is for students to engage in different activities to develop a deep understanding of mathematics. In addition to providing extensive practice in critical thinking and problem-solving skills, the problems are geared to engage students in communicating and exploring mathematics with In-Class Experiments and Project. <p><b>MP7 Look for and make use of structure.</b> Mathematically proficient students look closely to discern a pattern or structure. Young students, for example, might notice that three and seven more is the same amount as seven and three more, or they may sort a collection of shapes according to how many sides the shapes have. Later, students will see <math>7 \times 8</math> equals the well-remembered <math>7 \times 5 + 7 \times 3</math>, in preparation for learning about the distributive property. In the expression <math>x^2 + 9x + 14</math>, older students can see the 14 as <math>2 \times 7</math> and the 9 as <math>2 + 7</math>. They recognize the significance of an existing line in a geometric figure and can use the strategy of drawing an auxiliary line for solving problems. They also can step back for an overview and shift perspective. They can see complicated things, such as some algebraic expressions, as single objects or as being composed of several objects. For example, they can see <math>5 - 3(x - y)^2</math> as 5 minus a positive number times a square and use that to realize that its value cannot be more than 5 for any real numbers <math>x</math> and <math>y</math>.</p>	<p>The goal of the CME project is for students to engage in different activities to develop a deep understanding of mathematics. In addition to providing extensive practice in critical thinking and problem-solving skills, the problems are geared to engage students in communicating and exploring mathematics with In-Class Experiments and Project. Common Core State Standards for Mathematics – High School	Integrated CME Project ©2013
<p><b>MP8 Look for and express regularity in repeated reasoning.</b> Mathematically proficient students notice if calculations are repeated, and look both for general methods and for shortcuts. Upper elementary students might notice when dividing 25 by 11 that they are repeating the same calculations over and over again, and conclude they have a repeating decimal. By paying attention to the calculation of slope as they repeatedly check whether points are on the line through (1, 2) with slope 3, middle school students might abstract the equation <math>(y - 2)/(x - 1) = 3</math>. Noticing the regularity in the way terms cancel when expanding <math>(x - 1)(x + 1)</math>, <math>(x - 1)(x^2 + x + 1)</math>, and <math>(x - 1)(x^3 + x^2 + x + 1)</math> might lead them to the general formula for the sum of a geometric series. As they work to solve a problem, mathematically proficient students maintain oversight of the process, while attending to the details. They continually evaluate the reasonableness of their intermediate results.</p>	<p>The goal of the CME project is for students to engage in different activities to develop a deep understanding of mathematics. to the Common Core State Standards for Mathematics**

Common Core State Standards for Mathematics – High School	Integrated CME Project ©2013
<p><b>HSG-CO.A.5</b> Given a geometric figure and a rotation, reflection, or translation, draw the transformed figure using, e.g., graph paper, tracing paper, or geometry software. Specify a sequence of transformations that will carry a given figure onto another.</p>	<p><b>Mathematics I</b> For related content, please see: <b>SE/TE:</b> 621-623, 624-627, 631-638, 639-646, 661 (#11)</p>
<b>Understand congruence in terms of rigid motions</b>	
<p><b>HSG-CO.B.6</b> Use geometric descriptions of rigid motions to transform figures and to predict the effect of a given rigid motion on a given figure; given two figures, use the definition of congruence in terms of rigid motions to decide if they are congruent.</p>	<p><b>Mathematics I</b> <b>SE/TE:</b> 648-652, 653-655</p>
<p><b>HSG-CO.B.7</b> Use the definition of congruence in terms of rigid motions to show that two triangles are congruent if and only if corresponding pairs of sides and corresponding pairs of angles are congruent.</p>	<p><b>Mathematics I</b> <b>SE/TE:</b> 616 (#1-4), 617 (#8-12), 648-652, 653-655</p> <p><b>Mathematics II</b> <b>SE/TE:</b> 428-433</p>
<p><b>HSG-CO.B.8</b> Explain how the criteria for triangle congruence (ASA, SAS, and SSS) follow from the definition of congruence in terms of rigid motions.</p>	<p><b>Mathematics I</b> For related content, please see: <b>SE/TE:</b> 616 (#1-4), 617 (#5-12), 648-652, 653-655</p> <p><b>Mathematics II</b> <b>SE/TE:</b> 428-433</p>
<b>Prove geometric theorems</b>	
<p><b>HSG-CO.C.9</b> Prove theorems about lines and angles. <i>Theorems include: vertical angles are congruent; when a transversal crosses parallel lines, alternate interior angles are congruent and corresponding angles are congruent; points on a perpendicular bisector of a line segment are exactly those equidistant from the segment's endpoints.</i></p>	<p><b>Mathematics II</b> <b>SE/TE:</b> 455-461, 462-468, 469-470, 472 (#1-2), 475 (#14), 499-504</p>

**A Correlation of Pearson Integrated CME Project, Mathematics I-III  
to the Common Core State Standards for Mathematics**

Common Core State Standards for Mathematics – High School	Integrated CME Project ©2013
<p><b>HSG-CO.C.10</b> Prove theorems about triangles. <i>Theorems include: measures of interior angles of a triangle sum to 180°; base angles of isosceles triangles are congruent; the segment joining midpoints of two sides of a triangle is parallel to the third side and half the length; the medians of a triangle meet at a point.</i></p>	<p><b>Mathematics I</b> For related content, please see: <b>SE/TE:</b> 576 (Conjecture 7.1), 576 (#10-13), 614-616</p> <p><b>Mathematics II</b> For related content, please see: <b>SE/TE:</b> 430 (#3-4), 433 (#16), 438, 471, 484 (#5), 485 (#6), 490 (#1-2), 491, 492 (#2), 493 (#4), 499-504, 521-523, 722-727</p>
<p><b>HSG-CO.C.11</b> Prove theorems about parallelograms. <i>Theorems include: opposite sides are congruent, opposite angles are congruent, the diagonals of a parallelogram bisect each other, and conversely, rectangles are parallelograms with congruent diagonals.</i></p>	<p><b>Mathematics I</b> For related content, please see: <b>SE/TE:</b> 618 (#17), 623 (#7), 666 (#6), 683 (#13)</p> <p><b>Mathematics II</b> <b>SE/TE:</b> 433 (#17), 486 (#9), 515-520, 521-523</p>
<p><b>Make geometric constructions</b></p>	
<p><b>HSG-CO.D.12</b> Make formal geometric constructions with a variety of tools and methods (compass and straightedge, string, reflective devices, paper folding, dynamic geometric software, etc.). <i>Copying a segment; copying an angle; bisecting a segment; bisecting an angle; constructing perpendicular lines, including the perpendicular bisector of a line segment; and constructing a line parallel to a given line through a point not on the line.</i></p>	<p><b>Mathematics I</b> <b>SE/TE:</b> 575-576, 577-580, 580 (#1), 581-583, 584-585, 587-588, 589-591, 593-594, 596 (#10)</p> <p><b>Mathematics II</b> <b>SE/TE:</b> 429 (#4-8), 430 (#1-2), 439 (#8-9), 440 (#1-4), 442 (#10)</p>
<p><b>HSG-CO.D.13</b> Construct an equilateral triangle, a square, and a regular hexagon inscribed in a circle.</p>	<p><b>Mathematics I</b> <b>SE/TE:</b> 592-593, 596 (#14), 597 (#1)</p> <p><b>Mathematics II</b> <b>SE/TE:</b> 635-639</p>

<b>Summarize, represent, and interpret data on two categorical and quantitative variables</b>	
<b>HSS-ID.B.5</b> Summarize categorical data for two categories in two-way frequency tables. Interpret relative frequencies in the context of the data (including joint, marginal, and conditional relative frequencies). Recognize possible associations and trends in the data.	<b>Mathematics I</b> <b>SE/TE:</b> 503-506, 506 (#1), 507-510
<b>HSS-ID.B.6</b> Represent data on two quantitative variables on a scatter plot, and describe how the variables are related.	<b>Mathematics I</b> <b>SE/TE:</b> 511-514, 515-519, 528-531, 533 (#4)
<b>HSS-ID.B.6a</b> Fit a function to the data; use functions fitted to data to solve problems in the context of the data. Use given functions or choose a function suggested by the context. Emphasize linear, quadratic, and exponential models.	<b>Mathematics I</b> <b>SE/TE:</b> 523-524, 525-527, 529-530, 532 (#3), 534 (#8),
<b>HSS-ID.B.6b</b> Informally assess the fit of a function by plotting and analyzing residuals.	This standard is outside the scope of Integrated CME.
<b>HSS-ID.B.6c</b> Fit a linear function for a scatter plot that suggests a linear association.	<b>Mathematics I</b> <b>SE/TE:</b> 528-531, 532-535, 536-537, 539-542, 543-545, 546-549, 550
<b>Interpret linear models</b>	
<b>HSS-ID.C.7</b> Interpret the slope (rate of change) and the intercept (constant term) of a linear model in the context of the data.	<b>Mathematics I</b> <b>SE/TE:</b> 253-257, 257 (#1), 258-261, 289-291, 292-293, 529-531, 532 (#3), 534 (#7-8), 535 (#11), 537 (#1), 539 (#3-4)
<b>HSS-ID.C.8</b> Compute (using technology) and interpret the correlation coefficient of a linear fit.	<b>Mathematics I</b> <b>SE/TE:</b> 511-514, 515 (#3, 5), 516 (#6), 519 (#12-13)

to the Common Core State Standards for Mathematics**

<b>Common Core State Standards for Mathematics – High School</b>	<b>Integrated CME Project ©2013</b>
<b>HSS-ID.C.9</b> Distinguish between correlation and causation.	<b>Mathematics I</b> <b>SE/TE:</b> 514, 516 (#6)
<b>Making Inferences &amp; Justifying Conclusions</b>	
<b>Understand and evaluate random processes underlying statistical experiments</b>	
<b>HSS-IC.A.1</b> Understand statistics as a process for making inferences about population parameters based on a random sample from that population.	<b>Mathematics III</b> <b>SE/TE:</b> 209-210, 235-236, 237-239, 243, 245 (#7, 9), 291 (#1-2)
<b>HSS-IC.A.2</b> Decide if a specified model is consistent with results from a given data-generating process, e.g., using simulation. <i>For example, a model says a spinning coin falls heads up with probability 0.5. Would a result of 5 tails in a row cause you to question the model?</i>	<b>Mathematics II</b> <b>SE/TE:</b> 379-380  <b>Mathematics III</b> For related content, please see: <b>SE/TE:</b> 175-176, 227-232, 235-236, 291 (#5)
<b>Make inferences and justify conclusions from sample surveys, experiments, and observational studies</b>	
<b>HSS-IC.B.3</b> Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each.	<b>Mathematics III</b> <b>SE/TE:</b> 237-246, 252, 253, 254, 255, 258 (#9), 259 (#12)
<b>HSS-IC.B.4</b> Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling.	<b>Mathematics III</b> For related content, please see: <b>SE/TE:</b> 209-210, 235-236, 252-255, 256 (#5), 257 (#6), 258 (#8), 261-265, 266-270
<b>HSS-IC.B.5</b> Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant.	<b>Mathematics III</b> <b>SE/TE:</b> 237-239, 240-246, 255 (#1), 256 (#3-4), 258 (#10, 12)

**A Correlation of Pearson Integrated CME Project, Mathematics I-III  
to the Common Core State Standards for Mathematics**

<b>Common Core State Standards for Mathematics – High School</b>	<b>Integrated CME Project ©2013</b>
<b>HSS-IC.B.6</b> Evaluate reports based on data.	<b>Mathematics III</b> <b>SE/TE:</b> 237-239, 240-246, 255 (#2), 257 (#6), 258 (#10-11), 287-292
<b>Probability &amp; the Rules of Probability</b>	
<b>Understand independence and conditional probability and use them to interpret data</b>	
<b>HSS-CP.A.1</b> Describe events as subsets of a sample space (the set of outcomes) using characteristics (or categories) of the outcomes, or as unions, intersections, or complements of other events (“or,” “and,” “not”).	<b>Mathematics II</b> <b>SE/TE:</b> 379, 381-387  <b>Mathematics III</b> <b>SE/TE:</b> 177-178, 180-181, 182-183
<b>HSS-CP.A.2</b> Understand that two events $A$ and $B$ are independent if the probability of $A$ and $B$ occurring together is the product of their probabilities, and use this characterization to determine if they are independent.	<b>Mathematics I</b> For related content, please see: <b>SE/TE:</b> 505-506, 507 (#5), 510 (#14-15)  <b>Mathematics II</b> <b>SE/TE:</b> 384-385  <b>Mathematics III</b> <b>SE/TE:</b> 180-181, 182 (#8), 183 (#10)
<b>HSS-CP.A.3</b> Understand the conditional probability of $A$ given $B$ as $P(A \text{ and } B)/P(B)$ , and interpret independence of $A$ and $B$ as saying that the conditional probability of $A$ given $B$ is the same as the probability of $A$ , and the conditional probability of $B$ given $A$ is the same as the probability of $B$ .	<b>Mathematics II</b> <b>SE/TE:</b> 388-390, 391 (#8-9), 391 (Theorem 5.2; #13), 392, 394 (#11), 395-400
<b>HSS-CP.A.4</b> Construct and interpret two-way frequency tables of data when two categories are associated with each object being classified. Use the two-way table as a sample space to decide if events are independent and to approximate conditional probabilities. <i>For example, collect data from a random sample of students in your school on their favorite subject among math, science, and English. Estimate the probability that a randomly selected student from your school will favor science given that the student is in tenth grade. Do the same for other subjects and compare the results.</i>	<b>Mathematics I</b> <b>SE/TE:</b> 504, 505 (#4-5), 507 (#3-7), 509 (#8-9, 11), 510 (#17-18)  <b>Mathematics II</b> <b>SE/TE:</b> 393 (#5, 7), 394 (#8-9), 395-400  <b>Mathematics III</b> <b>SE/TE:</b> 239 (#7, 9, 11), 246 (#9)

**A Correlation of Pearson Integrated CME Project, Mathematics I-III  
to the Common Core State Standards for Mathematics**

<b>Common Core State Standards for Mathematics – High School</b>	<b>Integrated CME Project ©2013</b>
<b>HSS-CP.A.5</b> Recognize and explain the concepts of conditional probability and independence in everyday language and everyday situations. <i>For example, compare the chance of having lung cancer if you are a smoker with the chance of being a smoker if you have lung cancer.</i>	<b>Mathematics II</b> <b>SE/TE:</b> 389-391, 392-394, 395-400  <b>Mathematics III</b> For related content, please see: <b>SE/TE:</b> 183 (#10)
<b>Use the rules of probability to compute probabilities of compound events.</b>	
<b>HSS-CP.B.6</b> Find the conditional probability of $A$ given $B$ as the fraction of $B$ 's outcomes that also belong to $A$ , and interpret the answer in terms of the model.	<b>Mathematics II</b> <b>SE/TE:</b> 388 (#1), 391 (#10-13), 392 (#3, 4), 393 (#7), 394 (#8-10), 395-400
<b>HSS-CP.B.7</b> Apply the Addition Rule, $P(A \text{ or } B) = P(A) + P(B) - P(A \text{ and } B)$ , and interpret the answer in terms of the model.	<b>Mathematics II</b> <b>SE/TE:</b> 381-387  <b>Mathematics III</b> <b>SE/TE:</b> 181, 182 (#8), 183 (#10)
<b>HSS-CP.B.8 (+)</b> Apply the general Multiplication Rule in a uniform probability model, $P(A \text{ and } B) = P(A)P(B A) = P(B)P(A B)$ , and interpret the answer in terms of the model.	<b>Mathematics II</b> <b>SE/TE:</b> 388-394, 395-400  <b>Mathematics III</b> <b>SE/TE:</b> 178-180, 182-183, 184-189, 190-197, 247-251
<b>HSS-CP.B.9 (+)</b> Use permutations and combinations to compute probabilities of compound events and solve problems.	<b>Mathematics II</b> <b>SE/TE:</b> 386 (#4), 401-406, 407-414
<b>Using Probability to Make Decisions</b>	
<b>Calculate expected values and use them to solve problems</b>	
<b>HSS-MD.A.1 (+)</b> Define a random variable for a quantity of interest by assigning a numerical value to each event in a sample space; graph the corresponding probability distribution using the same graphical displays as for data distributions.	<b>Mathematics II</b> <b>SE/TE:</b> 381-387, 408-414  <b>Mathematics III</b> <b>SE/TE:</b> 177, 191-194, 195, 273-276, 277-283
