To the
Ohio 2018 Learning Standards for Environmental Science**

Introduction

This document demonstrates how *Environmental Science: Your World, Your Turn* ©2021 supports the Ohio 2018 Learning Standards for Science: Environmental Science. References are to the Student and Teacher editions and are cited at the page level.

Environmental Science: Your World, Your Turn combines high-interest, real-world content with cutting-edge digital support and a variety of hands-on inquiry investigations to help ensure student success in environmental science. Phenomena drives student engagement through unit level Anchoring Phenomena, Claim Evidence Reasoning, Modeling Activities and Problem-Based learning projects. Acclaimed author and active researcher Jay Withgott shows students why learning environmental science is vital. Students dive deeper with 19 Investigative Phenomena Case Studies. These authentic, real-world applications of environmental science excite students and inspire their passion for the environment.

Anchoring Phenomenon: Launch every unit with an engaging Anchoring Phenomenon that introduces and unifies the upcoming environmental science concepts. Students track their knowledge throughout the unit in a Claims-Evidence-Reasoning or Modeling document and build understanding with an Anchoring Phenomenon Project.

Case Studies Drive Learning: Introduce every chapter with an Investigative Phenomenon Case Study. This engaging real-world case encourages students to draw connections between environmental science and their life while providing a storyline for students to follow. Students “Defend Their Case” at the end of the chapter.

Hands-on Inquiry: Editable hands-on inquiry activities, including labs, Take it Local, Real Data math practice, and Claim-Evidence- Reasoning documents support student understanding of the phenomenon under study.

Student Centered Experience: Facts, questions, and thought-provoking scenarios including Make a Difference, Find out More, and What Do You Think? appear throughout the book, empowering students to apply the science, make choices, and interact with content.

Award-Winning Digital Platform: Access all of your digital content, inquiry labs, planning materials, assessments, and student data in ONE location. The Savvas Realize™ digital platform includes offline capabilities, integration with learning management systems and editable documents and assessments. Our fully digital programs and e-books provide cutting-edge online instruction with a seamless transition from the textbook, allowing students to complete assignments, access videos and activities, and take online tests and remediation.

(ENV.ES.5) Movement of matter and energy through the hydrosphere, lithosphere, atmosphere and biosphere	
(ENV.ES.5.a) Energy transformation on global, regional and local scales	SE/TE: Primary Production, 141-142 Net Primary Production, 167 Figure 4: Primary Productivity, 167 Burning Fossil Fuels, 496 Figure 18: Energy Loss in a Car, 504 Energy Conversion, 519 How Coal is Used, 524 A Closer Look: Using Coal to Generate Electricity, 542-543 Chapter 17 Assessment, #28, 546 Generating Electricity, 554 Lesson 1 Assessment, #3, 555 Figure 8: Hydropower Dam, 557 Figure 17: How a Wind Turbine Generates Electricity, 567 Lesson 3 Assessment, #3, 569
(ENV.ES.5.b) Biogeochemical cycles	SE/TE: Nutrient Cycling, 83 Carbon Cycle, 83-85 The Phosphorus Cycle, 86 The Nitrogen Cycle, 87-89 Chapter 3 Assessment, #30, 94
(ENV.ES.5.c) Ecosystems	SE/TE: Real Data, 144 Energy in Communities, 144-145 Reading Checkpoint, 145 Food Webs, 146 Figure 26: Food Webs, 147 Chapter 5 Assessment, #21, 160
(ENV.ES.5.d) Weather	SE/TE: Heat Transfer in the Troposphere, 458-459 Energy From the Sun, 484
(ENV.ES.5.e) Climate	SE/TE: Energy From the Sun, 484 The Greenhouse Effect in the Atmosphere, 484-485 Unequal Heating, 486 Wind Patterns in the Atmosphere, 487 Ocean Circulation, 488 Ocean Absorption of Carbon Dioxide, 489 Volcanoes, 490 Regional Vegetation, 490

Ohio 2018 Learning Standards for Environmental Science**

Ohio 2018 Learning Standards for Science Environmental Science	Environmental Science Your World, Your Tum ©2021
(ENV.ER.1.d) Mining and resource extraction	SE/TE: Mining for Coal, 524 Drilling for Oil, 526 Reading Checkpoint, 526 Natural Gas, 526 Lesson 2 Assessment, #2, 528 Investigative Phenomenon, 532 Damage Caused by Extracting Fuels, 532-533 Chapter 17 Assessment, #24, #31, 546
(ENV.ER.2) Air and air pollution	
(ENV.ER.2.a) Primary and secondary contaminants	SE/TE: Primary and Secondary Air Pollutants, 463 Figure 12: Air Pollutants, 463 Lesson 2 Assessment, #1, 468 Chapter 15 Assessment, #21, 478
(ENV.ER.2.b) Greenhouse gases	SE/TE: The Atmosphere, 79 The Greenhouse Effect in the Atmosphere, 484-485 Increase in Greenhouse Gases, 496
(ENV.ER.2.c) Clean Air Act	SE/TE: The Clean Air Act, 470-472 Real Data, 471 Lesson 3 Assessment, #1, 473 Success Stories: The Clean Air Act and Acid Rain, 474-475 Chapter 15 Assessment, #24, 478
(ENV.ER.3) Water and water pollution	
(ENV.ER.3.a) Potable water and water quality	SE/TE: Success Stories: Fighting for Clean Water, 56-57 Fresh Water, 325 Groundwater, 424-425 Sediment Pollution, 437 Groundwater Pollution, 439
(ENV.ER.3.b) Hypoxia, eutrophication	SE/TE: Central Case: The Gulf of Mexico's Dead Zone, 63 Human Impacts, 86 Chapter 3 Assessment, #36, 95 Nutrient Pollution, 436 Quick Lab: Cultural Eutrophication, 437
