

A Correlation of
Physical Science
Concepts in Action
with Earth & Space Science

To the
Ohio
2018 Learning Standards for Science
High School Physical Science

**A Correlation of Physical Science: Concepts in Action with Earth & Space Science
To the
Ohio 2018 Learning Standards for Science: High School Physical Science**

Ohio 2018 Learning Standards for Science High School Physical Science	Physical Science: Concepts in Action with Earth & Space Science
(PS.M) Study of Matter	
(PS.M.1) Classification of matter	
(PS.M.1.a) Heterogeneous vs. homogeneous	SE/TE: Mixtures, 41-42 Data Analysis: Do the Contents of Two Cans of Mixed Nuts Meet FDA Regulations?, 42
(PS.M.1.b) Properties of matter	SE/TE: Inquiry Activity: What Properties Could You Use to Describe Materials?, 37 Examples of Physical Properties, 45-47 Using Physical Properties, 48 Using Properties to Separate Mixtures, 50 Section 2.2 Assessment, #1, #2, 51 Observing Chemical Properties, 54-55 Section 2.3 Assessment, #1, #6, 58 Forensic Lab: Using Properties to Identify Materials, 60-61 Chapter 2 Assessment, #4, #22, 63
(PS.M.1.c) States of matter and its changes	SE/TE: Describing the States of Matter, 68-70 Section 3.1 Assessment, #1, #3, #5, #6, 74 Characteristics of Phase Changes, 84-86 Melting and Freezing, 88 Vaporization and Condensation, 88-89 Quick Lab: Observing Phase Changes, 90 Section 3.3 Assessment, 91 Exploration Lab: Investigating Changes in Temperature During Heating of Solids, 92-93 Chapter 3 Assessment, #1, #2, #9, #10, #11, #12, 95
(PS.M.2) Atoms	
(PS.M.2.a) Models of the atom (components)	SE/TE: Bohr's Model of the Atom, 113-116 Science and History: Models of the Atom, 114-115 Electron Cloud Model, 116 Section 4.3 Assessment, #2, #7, #8, 118
(PS.M.2.b) Ions (cations and anions)	SE/TE: Ionic Bonds, 159-161 Data Analysis: What Determines the Size of an Atom or Ion?, 160 Ionic Compounds, 161-164 Section 6.1 Assessment, #3, #6, #7, #8, 164 Describing Ionic Compounds, 171-173 Section 6.3 Assessment, #1, #3, 175

**A Correlation of Physical Science: Concepts in Action with Earth & Space Science
To the
Ohio 2018 Learning Standards for Science: High School Physical Science**

Ohio 2018 Learning Standards for Science High School Physical Science	Physical Science: Concepts in Action with Earth & Space Science
(PS.M.2.c) Isotopes	SE/TE: Isotopes, 112 Isotopes of Chlorine, 134 Connecting Concepts: Elements, 112
(PS.M.3) Periodic trends of the elements	
(PS.M.3.a) Periodic law	SE/TE: The Periodic Law, 131 Section 5.2 Assessment, #2, 138
(PS.M.3.b) Representative groups	SE/TE: Valence Electrons, 139 The Alkali Metals, 140 The Alkaline Earth Metals, 141 The Boron Family, 142 The Carbon Family, 142 The Nitrogen Family, 143 The Halogens, 144 The Noble Gases, 145 Section 5.3 Assessment, 145
(PS.M.4) Bonding and compounds	
(PS.M.4.a) Bonding (ionic and covalent)	SE/TE: Ionic Bonds, 159-161 Ionic Compounds, 161-164 Section 6.1 Assessment, 164 Covalent Bonds, 165-167 Unequal Sharing of Electrons, 167-168 Attraction Between Molecules, 169 Section 6.2 Assessment, 169
(PS.M.4.b) Nomenclature	SE/TE: Describing Ionic Compounds, 171-173 Describing Molecular Compounds, 174-175 Section 6.3 Assessment, 175
(PS.M.5) Reactions of matter	
(PS.M.5.a) Chemical reactions	SE/TE: Chemical Equations, 192-193 Balancing Equations, 194 Counting With Moles, 195-196 Chemical Calculations, 197-198 Section 7.1 Assessment, 198 Classifying Reactions, 199-204 Reactions as Electron Transfers, 204-205 Section 7.2 Assessment, 205 Reactions Over Time, 212 Factors Affecting Reaction Rates, 213-215 Section 7.4 Assessment, 215

**A Correlation of Physical Science: Concepts in Action with Earth & Space Science
To the
Ohio 2018 Learning Standards for Science: High School Physical Science**

Ohio 2018 Learning Standards for Science High School Physical Science	Physical Science: Concepts in Action with Earth & Space Science
(PS.M.5.b) Nuclear reactions	SE/TE: Nuclear Reactions in the Laboratory, 303 Transuranium Elements, 304 Particle Accelerators, 305 Section 10.3 Assessment, 305 Exploration Lab: Modeling a Chain Reaction, 316-317
(PS.EW) Energy and Waves	
(PS.EW.1) Conservation of energy	
(PS.EW.1.a) Quantifying kinetic energy	SE/TE: Kinetic Theory, 71 Kinetic Energy, 447 Math Skills: Calculating Kinetic Energy, 448 Section 15.1 Assessment, #2, 452
(PS.EW.1.b) Quantifying gravitational potential energy	SE/TE: Gravitational Potential Energy, 449 Section 15.1 Assessment, #3, 452 Math Practice, 452
(PS.EW.2) Transfer and transformation of energy	
(PS.EW.2.a) Transfer and transformation of energy (including work)	SE/TE: Energy and Work, 447 Section 15.1 Assessment, #1, 452 Energy Conversions, 456-457 Section 15.2 Assessment, #1, #3, #7, 459
(PS.EW.3) Waves	
(PS.EW.3.a) Refraction, reflection, diffraction, absorption, superposition	SE/TE: Reflection, 508 Refraction, 509 Diffraction, 510 Section 17.3 Assessment, #1, #2, #3, #7, 512 The Law of Reflection, 570-571 Index of Refraction of Light, 574-575 The Law of Superposition, 733 Composition, 841
(PS.EW.3.b) Radiant energy and the electromagnetic spectrum	SE/TE: Concepts in Action: Solar Home, 484-485 The Waves of the Spectrum, 539-540 Radio Waves, 540-542 Infrared Waves, 543 Visible Light, 543 Ultraviolet Rays, 544 X-Rays, 544 Gamma Rays, 545 Section 18.2 Assessment, 545

To the
Ohio 2018 Learning Standards for Science: High School Physical Science**

Ohio 2018 Learning Standards for Science High School Physical Science	Physical Science: Concepts in Action with Earth & Space Science
(PS.EW.3.c) Doppler shift	SE/TE: The Doppler Effect, 516 Doppler Radar, 774-775
(PS.EW.4) Thermal energy	
(PS.EW.4.a) Thermal energy	SE/TE: Thermal Energy, 451 Section 15.1 Assessment, #5, 452 Thermal Energy, 475 Section 16.1 Assessment, #3, 478
(PS.EW.5) Electricity	
(PS.EW.5.a) Movement of electrons	SE/TE: Static Electricity and Charging, 602-603 Static Discharge, 603 Section 20.1 Assessment, #4, #5, 603 Electric Current, 604 Conductors and Insulators, 605 Resistance, 605 Circuit Diagrams, 609-610 Series Circuits, 610 Parallel Circuits, 610 Section 20.3 Assessment, #1, #2, 613
(PS.EW.5.b) Current	SE/TE: Electric Current, 604 Conductors and Insulators, 605 Resistance, 605 Section 20.2 Assessment, #1, #2, 607 Generating Electric Current, 642-643 Generators, 643-644
(PS.EW.5.c) Electric potential (voltage)	SE/TE: Voltage, 606 Ohm's Law, 607 Section 20.2 Assessment, #5, 607 Transformers, 644-645 Section 21.3 Assessment, #1, #3, 647 Writing in Science, 647
(PS.EW.5.d) Resistors and transfer of energy	SE/TE: Resistance, 605 Quick Lab: Modeling Resistance in a Wire, 606 Ohm's Law, 607 Transistors, 621 Transformers, 644-645

To the
Ohio 2018 Learning Standards for Science: High School Physical Science**

Ohio 2018 Learning Standards for Science High School Physical Science	Physical Science: Concepts in Action with Earth & Space Science
(PS.FM) Forces and Motion	
(PS.FM.1) Motion	
(PS.FM.1.a) Introduction to one-dimensional vectors	SE/TE: Combining Displacements, 330-331 Section 11.1 Assessment, #3, #8, 331
(PS.FM.1.b) Displacement, velocity (constant, average and instantaneous) and acceleration	SE/TE: Measuring Displacements, 330 Combining Displacements, 331-332 Section 11.1 Assessment, #3, #5, 331 Velocity, 336 Combining Velocities, 337 Section 11.2 Assessment, #1, #4, 337 What Is Acceleration?, 342-345 Calculating Acceleration, 345 Math Skills: Calculating Acceleration, 346 Graphs of Accelerated Motion, 346-348 Section 11.3 Assessment, 348 Exploration Lab: Investigating the Velocity of a Sinking Marble, 349
(PS.FM.1.c) Interpreting position vs. time and velocity vs. time graphs	SE/TE: Graphs of Accelerated Motion, 346-348 Section 11.3 Assessment, #7, 348
(PS.FM.2) Forces	
(PS.FM.2.a) Force diagrams	For supporting content, please see: SE/TE: Figure 4, 358 Figure 5, 359 Figure 9, 362
(PS.FM.2.b) Types of forces (gravity, friction, normal, tension)	SE/TE: Friction, 359-360 Quick Lab: Observing the Effects of Friction, 360 Gravity, 361 Section 12.1 Assessment, #2, #4, #6, 362 Gravitational Force, 380-382 Section 12.4 Assessment, #3, #4, #7, 382
(PS.FM.2.c) Field model for forces at a distance	SE/TE: Magnetic Forces, 630 Magnetic Fields, 631-632 Quick Lab: Observing Magnetic Field Lines, 632 Electricity and Magnetism, 635-636 Solenoids and Electromagnets, 637-638 Section 21.2 Assessment, #1, #2, #5, 639

Ohio 2018 Learning Standards for Science High School Physical Science	Physical Science: Concepts in Action with Earth & Space Science
(PS.FM.3) Dynamics (how forces affect motion)	
(PS.FM.3.a) Objects at rest	SE/TE: Newton's First Law of Motion, 364-365 Section 12.2 Assessment, #1, 369 Chapter 12 Assessment, #5, 385
(PS.FM.3.b) Objects moving with constant velocity	SE/TE: Falling Objects, 361 Connecting Concepts: Velocity and Acceleration, 362 Section 12.2 Assessment, #5, 369 Concepts in Action: Terminal Speed, 370-371
(PS.FM.3.c) Accelerating objects	SE/TE: Newton's Second Law of Motion, 365-368 How It Works: Crash-Test Dummies, 366 Math Skills: Newton's Second Law, 367 Weight and Mass, 368-369 Section 12.2 Assessment, #2, #4, 369 Math Practice, 369
(PS.U) The Universe	
(PS.U.1) History of the universe	SE/TE: Space and Time, 5 Concepts in Action: Scale of the Universe, 854-855 The Big Bang Theory, 858 Section 26.5 Assessment, #2, #3, 859 Connecting Concepts: Scientific Theories, 859
(PS.U.2) Galaxies	SE/TE: Galaxies, 852-853 Section 26.4 Assessment, #3, #4, #8, 853
(PS.U.3) Stars	
(PS.U.3.a) Formation: stages of evolution	SE/TE: How Stars Form, 844-845 Adult Stars, 845 The Death of a Star, 846-848 Section 26.3 Assessment, 848
(PS.U.3.b) Fusion in stars	SE/TE: How Stars Form, 844-845 Adult Stars, 845 The Death of a Star, 846-848 Section 26.3 Assessment, #1, #5, 848
