Introduction

The new enVision® Mathematics ©2020 is the latest offering of the nationally recognized Grades K-12 series, created for print, digital, and blended instruction. Problem-Based Learning connects with Visual Learning to deep conceptual understanding. Interactive multimedia experiences engage learners in student choice and solving rich problems. Extensive customization and differentiation options empower every teacher and student.

UNDERSTANDING

A simple lesson design provides a clear, intentional pathway. Starting on a firm foundation of conceptual understanding, students can connect and apply math ideas in amazing ways. High-interest math projects invite all students to be active participants.

A simple lesson design provides a clear, intentional pathway.

STEP 1 Problem-Based Learning

STEP 2 Visual Learning

STEP 3 Assess and Differentiate

ASSESSMENT

The enVision Assessment Suite offers options to move students toward mastery of state standards while driving instructional differentiation.

DIAGNOSTIC Assessment

Reading Test, Diagnostic Test (Math Diagnosis and Intervention System), Review What You Know

FORMATIVE Assessment

SCOUT Observational Assessment used during Solve & Share, Do You Understand? And Convince Me! Guide Practice, Quick Check

SUMMATIVE Assessment

Topic Assessments, Topic Performance Assessments, Examview Test Generator, Fluency Assessments, Cumulative/Benchmarks Assessments, Progress Monitoring Assessments

INSTRUCTIONAL SUPPORT

Gain a new perspective on your teaching with embedded strategies, methods, and a wide range of Professional Development opportunities in print and digital formats.

Ideas, Inspiration, and Teaching Methods

Math background for every Topic and Lesson serves as an easy-to-access math methods course.

Make every lesson perfect for you. Access all digital content, assessments, and management tools SavvasRealize.com.

Kids See the Math. Teachers See Results.

Mathematical Practices	
1. Make sense of problems and persevere in solving them.	<p>enVision Mathematics provides numerous instructional opportunities to help students develop proficiency in the math practices. To get students off to a good start on all eight practices, use the Math Practices and Problem Solving Handbook pages at SavvasRealize.com, along with the Math Practices Posters, and supporting Math Practices Animations. Each lesson begins with Problem-Based Learning, an activity in which students interact with their peers and teachers to make sense of and decide on a workable solution for a situation. Another feature of each lesson is the set of problem-solving exercises in which students persevere by applying different skills and strategies to solve problems. Each Problem-Solving Lesson provides instruction and practice focused on a specific math practice.</p> <p>SE/TE: 21–24, 29–32, 77–80, 145–148, 157–160, 173–176, 181–184, 205–208, 217–220, 225–228, 265–268, 273–276, 297–300, 305–308, 317–320</p>
2. Reason abstractly and quantitatively.	<p>enVision Mathematics provides scaffolded instruction to help students develop both quantitative and abstract reasoning. In the Visual Learning Bridge, students can see how to represent a given situation numerically or algebraically. They will have opportunities later in the lesson to reason abstractly as they endeavor to represent situations symbolically. Reasonableness exercises remind students to compare their work to the original situation. Reasoning problems throughout the exercise sets focus students' attention on the structure or meaning of an operation, for example, rather than merely the solution.</p> <p>SE/TE: 5–8, 9–12, 25–28, 33–36, 41–44, 61–64, 65–68, 93–96, 97–100, 101–104, 113–116, 117–120, 145–148, 149–152, 177–180</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

<p style="text-align: center;">South Dakota State Standards for Mathematics, Kindergarten</p>	<p style="text-align: center;">enVision Mathematics, ©2020 Kindergarten</p>
<p>3. Construct viable arguments and critique the reasoning of others.</p>	<p>Consistent with a focus on reasoning and sense-making is a focus on critical reasoning—argumentation and critique of arguments. In enVision Mathematics, the Problem-Based Learning affords students opportunities to share with classmates their thinking about problems, their solution methods, and their reasoning about the solutions. Many exercises found throughout the program specifically call for students to justify or explain their solutions. The ability to articulate a clear explanation for a process is a stepping stone to critical analysis and reasoning of both the student’s own processes and those of others.</p> <p>SE/TE: 5–8, 9–12, 13–16, 17–20, 41–44, 65–68, 69–72, 73–76, 77–80, 93–96, 101–104, 105–108, 109–112, 117–120, 141–144</p>
<p>4. Model with mathematics.</p>	<p>Students using enVision Mathematics are introduced to mathematical modeling in the early grades. They first use manipulatives and drawings and then equations to model addition and subtraction situations. The Visual Learning Bridge and Visual Learning Animation Plus often present real-world situations, and students are shown how these can be modeled mathematically. In later grades, students expand their modeling skills to include representations such as tables and graphs, as well as equations.</p> <p>SE/TE: 9–12, 17–20, 21–24, 25–28, 29–32, 69–72, 77–80, 93–96, 109–112, 141–144, 153–156, 201–204, 209–212, 217–220, 221–224</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Kindergarten	enVision Mathematics, ©2020 Kindergarten
5. Use appropriate tools strategically.	<p>Students become fluent in the use of a wide assortment of tools ranging from physical objects, including manipulatives, rulers, protractors, and even pencil and paper, to digital tools, such as Online Math Tools and computers. As students become more familiar with the tools available to them, they are able to begin making decisions about which tools are most helpful in a particular situation.</p> <p>Student’s Edition and Teacher’s Edition pages 5–8, 13–16, 17–20, 33–36, 41–44, 97–100, 105–108, 109–112, 113–116, 121–124, 149–152, 157–160, 181–184, 205–208, 273–276</p>
6. Attend to precision.	<p>Students are expected to use mathematical terms and symbols with precision. Key terms and concepts are highlighted in each lesson. The Problem-Based Learning activity provides repeated opportunities for students to use precise language to explain their solution paths while solving problems. In the Convince Me! feature, students revisit these key terms or concepts and provide explicit definitions or explanations.</p> <p>Student’s Edition and Teacher’s Edition pages 13–16, 25–28, 29–32, 61–64, 65–68, 73–76, 97–100, 105–108, 149–152, 153–156, 173–176, 177–180, 185–188, 201–204, 213–216</p>
7. Look for and make use of structure.	<p>Students are encouraged to look for structure as they develop solution plans. As students mature in their mathematical thinking, they look for structure in numerical operations by focusing on place value and properties of operations. This focus on looking for and recognizing structure enables students to draw from patterns as they formalize their thinking about the structure of operations.</p> <p>Student’s Edition and Teacher’s Edition pages 37–40, 61–64, 117–120, 121–124, 181–184, 225–228, 269–272, 293–296, 317–320, 321–324, 329–332, 357–360, 361–364, 365–368, 369–372</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Kindergarten	enVision Mathematics, ©2020 Kindergarten
8. Look for and express regularity in repeated reasoning.	<p>Students are prompted to look for repetition in computations to help them develop shortcuts and become more efficient problem solvers. Students are reminded to think about problems they have encountered previously that may share features or processes. They are encouraged to draw on the solution plan developed for such problems, and, as their mathematical thinking matures, to look for and apply generalizations to similar situations. The Problem-Based Learning activities offer students opportunities to look for regularity in the way operations behave.</p> <p>SE/TE: 21–24, 37–40, 73–76, 113–116, 121–124, 141–144, 157–160, 177–180, 209–212, 269–272, 293–296, 317–320, 325–328, 329–332, 353–356</p>
Counting and Cardinality K.CC	
A. Know number names and the count sequence.	
1. Count to 100 by ones and by tens.	<p>SE: 431, 432, 433–436, 437–440, 441–444, 445–448, 449–452, Reteaching: 455–456 Sets A-C; 465–468, 469–472, 473–476, 477–480</p> <p>TE: 431–431A, 432–432C, 433A–436B, 437A–440B, 441A–444B, 445A–448B, 449A–452B, Reteaching: 455–456 Sets A-C; 465A–468B, 469A–472B, 473A–476B, 477A–480B</p>
2. Count forward beginning from any given number within 100 (instead of having to begin at 1). Count backwards beginning from any given number within 20.	<p>SE: 92, 117–120, Reteaching: 130 Set G; 149–152, 157–160, 248, 347, 348, 365–368, 373–376, Reteaching: 380 Set D; 431, 432, 433–436, 437–440, 441–444, 445–448, 449–452, Reteaching: 456 Set D</p> <p>TE: 92–92C, 117A–120B, Reteaching: 129–130 Set G; 149A–152B, 157A–160B, 248–248C, 347–347A, 348–348C, 365A–368B, 373A–376B, Reteaching: 380 Set D; 431–431A, 432–432C, 433A–436B, 437A–440B, 441A–444B, 445A–448B, 449A–452B, Reteaching: 456 Set D</p> <p>MDIS: A14, A15</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Kindergarten	enVision Mathematics, ©2020 Kindergarten
3. Write numbers from 0 to 20. Represent a number of objects with a written numeral 0-20 (with 0 representing a count of no objects).	<p>SE: 3, 4, 13–16, 25–28, 33–36, Reteaching: 47, 49 Sets B, E; 59–60, 73–76, 77–80, 91, 92, 97–100, 105–108, 113–116, 121–124, Reteaching: 127–129 Sets A, C, E; 199–200, 201–204, 205–208, 209–212, 213–216, 247, 248, 249–252, 253–256, 257–260, 261–264, 291–292, 317–320, 325–328, 329–332, 347, 348, 349–352, 353–356, 357–360, 361–364, Reteaching: 379 Set A</p> <p>TE: 3–3A, 4–4C, 13A–16B, 25A–28B, 33A–36B, Reteaching: 47–50 Sets B, E; 59–60A, 73A–76B, 77A–80B, 91–91A, 92–92C, 97A–100B, 105A–108B, 113A–116B, 121A–124B, Reteaching: 127–130 Sets A, C, E; 199–200A, 201A–204B, 205A–208B, 209A–212B, 213A–216B, 247–247A, 248–248C, 249A–252B, 253A–256B, 257A–260B, 261A–264B, 291–292A, 317A–320B, 325A–328B, 329A–332B, 347–347A, 348–348C, 349A–352B, 353A–356B, 357A–360B, 361A–364B, Reteaching: 379 Set A</p>
B. Count to tell the number of objects.	
4. Understand the relationship between numbers and quantities; connect counting to cardinality.	<p>SE: 369–372</p> <p>TE: 369A–372B</p>
a. When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object. (one-to-one correspondence)	<p>SE: 3, 4, 5–8, 17–20, 29–32, 37–40, 41–44, Reteaching: 47–50 Sets A, C, F; 91, 92, 93–96, 101–104, 109–112, Reteaching: 127–128 Sets B, D</p> <p>TE: 3–3A, 4–4C, 5A–8B, 17A–20B, 29A–32B, 37A–40B, 41A–44B, Reteaching: 47–50 Sets A, C, F; 91–91A, 92–92C, 93A–96B, 101A–104B, 109A–112B, Reteaching: 127–128 Sets B, D</p>
b. Understand that the last number name said tells the number of objects counted. (cardinality) The number of objects is the same regardless of their arrangement or the order in which they were counted.	<p>SE: 3, 4, 9–12, 21–24, 41–44, Reteaching: 50 Set F; 91, 109–112, 121–124, Reteaching: 127–128 Sets B, D</p> <p>TE: 3–3A, 4–4C, 9A–12B, 21A–24B, 41A–44B, Reteaching: 49–50 Set F; 91–91A, 109A–112B, 121A–124B, Reteaching: 127–128 Sets B, D</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Kindergarten	enVision Mathematics, ©2020 Kindergarten
c. Understand that each successive number name refers to a quantity that is one larger.	<p>SE: 3, 4, 37-40, 91, 117-120, 139-140, 157-160, 347, 365-368</p> <p>TE: 3-3A, 4-4C, 37A-40B, 91-91A, 117A-120B, 139-140A, 157A-160B, 347-347A, 365A-368B</p>
5. Count to answer “how many?”	
a. When counting, answer questions about as many as 20 things arranged in a line, a rectangular array, or a circle, or and as many as 10 things in a scattered configuration.	<p>SE: 3, 4, 5-8, 9-12, 13-16, 17-20, 21-24, 25-28, 29-32, 33-36, 41-44, Reteaching: 47- 50 Sets A, C, F; 59-60, 61-64, 65-68, 69-72, 73-76, 91, 92, 93-96, 97-100, 101-104, 105-108, 113-116, 139-140, 141-144, 171, 173-176, 177-180, 199-200, 201-204, 247, 249-252, 347, 348, 349-352, 353-356, 357-360, 361-364, 369-372, 373-376, Reteaching: 379-380 Sets A, C, D; 387-388, 389-392, 393-396, 397-400, 401-404, 405-408, 409-412, 413-416, 513-516, 525-528, 529-532, 533-536</p> <p>TE: 3-3A, 4-4C, 5A-8B, 9A-12B, 13A-16B, 17A-20B, 21A-24B, 25A-28B, 29A-32B, 33A-36B, 41A-44B, Reteaching: 47-50 Sets A, C, F; 59-60A, 61A-64B, 65A-68B, 69A-72B, 73A-76B, 91-91A, 92-92C, 93A-96B, 97A-100B, 101A-104B, 105A-108B, 113A-116B, 139-140A, 141A-144B, 171-171A, 173A-176B, 177A-180B, 199-200A, 201A-204B, 247-247A, 249A-252B, 347-347A, 348-348C, 349A-352B, 353A-356B, 357A-360B, 361A-364B, 369A-372B, 373A-376B, Reteaching: 379-380 Sets A, C, D; 387-388A, 389A-392B, 393A-396B, 397A-400B, 401A-404B, 405A-408B, 409A-412B, 413A-416B, 513A-516B, 525A-528B, 529A-532B, 533A-536B</p>
b. Given a number(s) from 1-20, count out that many objects.	<p>SE: 13-16, 17- 20, 25-28, 97-100, 101-104, 105-108, 349-352, 353-356, 357-360, 361-364, 369-372</p> <p>TE: 13A-16B, 17A-20B, 25A-28B, 97A-100B, 101A-104B, 105A-108B, 349A-352B, 353A-356,B 357A-360B, 361A-364B, 369A-372B</p>

to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Kindergarten	enVision Mathematics, ©2020 Kindergarten
4. For any number from 1 to 9, find the number that makes 10 when added to the given number, e.g., by using objects or drawings, and record the answer with a drawing or equation.	SE: 291–292, 325–328, 329–332, Reteaching: 338 Set H; 517–520, 521–524 TE: 291–292A, 325A–328B, 329A–332B, Reteaching: 337–338 Set H; 517A–520B, 521A–524B
5. Fluently add and subtract within 5. (See strategies chart on page 9.)	SE: 199–200, 225–228, Reteaching: 238 Set H; 247, 269–272, Reteaching: 282 Set G; 291–292, 297–300, 301–304, 305–308, Reteaching: 335–336 Sets B, D TE: 199–200A, 225A–228B, Reteaching: 237–238 Set H; 247–247A, 269A–272B, Reteaching: 281–282 Set G; 291–292A, 297A–300B, 301A–304B, 305A–308B, Reteaching: 335–336 Sets B, D
Number and Operation in Base Ten K.NBT	
A. Work with numbers 11 – 19 to gain foundations for place value.	
1. Compose and decompose numbers from 11 to 19 into ten ones and some further ones, e.g., by using objects or drawings, and record each composition or decomposition by a drawing or equation (e.g., $18 = 10 + 8$); understand that these numbers are composed of ten ones and one, two, three, four, five, six, seven, eight, or nine ones.	SE: 387–388, 389–392, 393–396, 397–400, 401–404, 405–408, 409–412, 413–416, Reteaching: 419–422 Sets A–G TE: 387–388A, 389A–392B, 393A–396B, 397A–400B, 401A–404B, 405A–408B, 409A–412B, 413A–416B, Reteaching: 419–422 Sets A–G
Measurement and Data K.MD	
A. Describe and compare measurable attributes.	
1. Describe measurable attributes of a single object or objects, such as length, weight, or size.	SE: 547–548, 549–552, 553–556, 557–560, 561–564, 565–568 TE: 547–548A, 549A–552B, 553A–556B, 557A–560B, 561A–564B, 565A–568B
2. Directly compare two objects with a measurable attribute in common, to see which object has “more of”/“less of” the attribute, and describe the difference.	SE: 547–548, 549–552, 553–556, 557–560, 565–568, 569–572, Reteaching: 575–576 Sets A–D TE: 547–548A, 549A–552B, 553A–556B, 557A–560B, 565A–568B, 569A–572B, Reteaching: 575–576 Sets A, B, D

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Kindergarten	enVision Mathematics, ©2020 Kindergarten
B. Classify objects and count the number of objects in each category.	
3. Classify objects into given categories; count the number of objects in each category and sort the categories by count. Limit category counts to be less than or equal to 10.	SE: 171, 172, 173–176, 177–180, 181–184, 185–188, Reteaching: 191–192 Sets A–D; 465–468 TE: 171–171A, 172–172C, 173A–176B, 177A–180B, 181A–184B, 185A–188B, Reteaching: 191–192 Sets A–D; 465A–468B
C. Work with time and money.	
4. Identify a penny and understand that the value is one. Count pennies within 20. Geometry K.G	MDIS: A61, A62
A. Identify and describe shapes (squares, circles, triangles, rectangles, hexagons, cubes, cones, cylinders, and spheres).	
1. Describe objects in the environment using names of shapes, and describe the relative positions of these objects using terms such as above, below, beside, in front of, behind, and next to.	SE: 463–464, 469–472, 473–476, 477–480, 481–484, 485–488, 489–492, Reteaching: 497–498 Sets F, G; 507, 508, 525–528 TE: 463–464A, 469A–472B, 473A–476B, 477A–480B, 481A–484B, 485A–488B, 489A–492B, Reteaching: 497–498 Sets F, G; 507–507A, 508–508C, 525A–528B
2. Correctly name shapes regardless of their orientations or overall size.	SE: 463–464, 469–472, 473–476, 477–480, 481–484, 485–488, 489–492, Reteaching: 495–497 Sets B–E; 508 TE: 463–464, 469A–472B, 473A–476B, 477A–480B, 481A–484B, 485A–488B, 489A–492B, Reteaching: 495–498 Sets B–E; 508–508C
3. Identify shapes as two-dimensional (lying in a plane, “flat”) or three-dimensional (“solid”).	SE: 465–468, 485–488, Reteaching: 495 Set A; 507, 521–524 TE: 465A–468B, 485A–488B, Reteaching: 495–496 Set A; 507–507A, 521A–524B

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Kindergarten	enVision Mathematics, ©2020 Kindergarten
B. Analyze, compare, create, and compose shapes.	
4. Analyze and compare two- and three-dimensional shapes, in different sizes and orientations, using informal language to describe their similarities, differences, parts (e.g., number of sides and vertices/"corners") and other attributes (e.g., having sides of equal length).	SE: 463–464, 473–476, 477–480, 481–484, 507, 509–512, 513–516, 517–520, 521–524, 529–532, Reteaching: 539-540 Sets A-D TE: 463–464A, 473A–476B, 477A–480B, 481A–484B, 507–507A, 509A–512B, 513A–516B, 517A–520B, 521A–524B, 529A–532B, Reteaching: 539-540 Sets A-D
5. Model shapes in the world by building shapes from components (e.g., sticks and clay balls) and drawing shapes.	SE: 507, 513–516, 525–528, 529–532, 533–536, Reteaching: 540 Set D TE: 507–507A, 513A–516B, 525A–528B, 529A–532B, 533A–536B, Reteaching: 540 Set D
6. Compose simple shapes to form larger shapes.	SE: 463–464, 507, 508, 525–528, 533–536 TE: 463–464A, 507–507A, 508–508C, 525A–528B, 533A–536B

South Dakota State Standards for Mathematics Grade 1	enVision Mathematics, ©2020 Grade 1
Mathematical Practices	
1. Make sense of problems and persevere in solving them.	<p>enVision Mathematics provides numerous instructional opportunities to help students develop proficiency in the math practices. To get students off to a good start on all eight practices, use the Math Practices and Problem Solving Handbook pages at SavvasRealize.com, along with the Math Practices Posters, and supporting Math Practices Animations. Each lesson begins with Problem-Based Learning, an activity in which students interact with their peers and teachers to make sense of and decide on a workable solution for a situation. Another feature of each lesson is the set of problem-solving exercises in which students persevere by applying different skills and strategies to solve problems. Each Problem-Solving Lesson provides instruction and practice focused on a specific math practice.</p> <p>SE/TE: 9–12, 29–32, 33–36, 37–40, 61–64, 85–88, 117–120, 133–136, 137–140, 169–172, 185–188, 189–192, 193–196, 233–236, 253–256</p>
2. Reason abstractly and quantitatively.	<p>enVision Mathematics provides scaffolded instruction to help students develop both quantitative and abstract reasoning. In the Visual Learning Bridge, students can see how to represent a given situation numerically or algebraically. They will have opportunities later in the lesson to reason abstractly as they endeavor to represent situations symbolically. Reasonableness exercises remind students to compare their work to the original situation. Reasoning problems throughout the exercise sets focus students' attention on the structure or meaning of an operation, for example, rather than merely the solution.</p> <p>SE/TE: 5–8, 9–12, 13–16, 17–20, 21–24, 25–28, 29–32, 65–68, 77–80, 89–92, 109–112, 121–124, 137–140, 141–144, 161–164</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics Grade 1	enVision Mathematics, ©2020 Grade 1
3. Construct viable arguments and critique the reasoning of others.	<p>Consistent with a focus on reasoning and sense-making is a focus on critical reasoning—argumentation and critique of arguments. In enVision Mathematics, the Problem-Based Learning affords students opportunities to share with classmates their thinking about problems, their solution methods, and their reasoning about the solutions. Many exercises found throughout the program specifically call for students to justify or explain their solutions. The ability to articulate a clear explanation for a process is a stepping stone to critical analysis and reasoning of both the student’s own processes and those of others.</p> <p>SE/TE: 13–16, 21–24, 37–40, 61–64, 65–68, 69–72, 73–76, 89–92, 113–116, 117–120, 125–128, 129–132, 133–136, 141–144, 185–188</p>
4. Model with mathematics.	<p>Students using enVision Mathematics are introduced to mathematical modeling in the early grades. They first use manipulatives and drawings and then equations to model addition and subtraction situations. The Visual Learning Bridge and Visual Learning Animation Plus often present real-world situations, and students are shown how these can be modeled mathematically. In later grades, students expand their modeling skills to include representations such as tables and graphs, as well as equations.</p> <p>SE/TE: 5–8, 17–20, 21–24, 25–28, 33–36, 57–60, 69–72, 73–76, 81–84, 85–88, 89–92, 113–116, 117–120, 125–128, 137–140</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics Grade 1	enVision Mathematics, ©2020 Grade 1
5. Use appropriate tools strategically.	<p>Students become fluent in the use of a wide assortment of tools ranging from physical objects, including manipulatives, rulers, protractors, and even pencil and paper, to digital tools, such as Online Math Tools and computers. As students become more familiar with the tools available to them, they are able to begin making decisions about which tools are most helpful in a particular situation.</p> <p>SE/TE: 5–8, 17–20, 29–32, 81–84, 113–116, 129–132, 161–164, 165–168, 177–180, 185–188, 213–216, 293–296, 325–328, 365–368, 369–372</p>
6. Attend to precision.	<p>Students are expected to use mathematical terms and symbols with precision. Key terms and concepts are highlighted in each lesson. The Problem-Based Learning activity provides repeated opportunities for students to use precise language to explain their solution paths while solving problems. In the Convince Me! feature, students revisit these key terms or concepts and provide explicit definitions or explanations.</p> <p>Student’s Edition and Teacher’s Edition pages 37–40, 85–88, 189–192, 217–220, 221–224, 237–240, 253–256, 257–260, 261–264, 269–272, 289–292, 305–308, 329–332, 373–376, 377–380</p>
7. Look for and make use of structure.	<p>Students are encouraged to look for structure as they develop solution plans. As students mature in their mathematical thinking, they look for structure in numerical operations by focusing on place value and properties of operations. This focus on looking for and recognizing structure enables students to draw from patterns as they formalize their thinking about the structure of operations.</p> <p>Student’s Edition and Teacher’s Edition pages 9–12, 69–72, 73–76, 77–80, 81–84, 89–92, 129–132, 173–176, 221–224, 225–228, 265–268, 285–288, 293–296, 297–300, 301–304</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics Grade 1	enVision Mathematics, ©2020 Grade 1
8. Look for and express regularity in repeated reasoning.	<p>Students are prompted to look for repetition in computations to help them develop shortcuts and become more efficient problem solvers. Students are reminded to think about problems they have encountered previously that may share features or processes. They are encouraged to draw on the solution plan developed for such problems, and, as their mathematical thinking matures, to look for and apply generalizations to similar situations. The Problem-Based Learning activities offer students opportunities to look for regularity in the way operations behave.</p> <p>Student's Edition and Teacher's Edition pages 13–16, 25–28, 57–60, 61–64, 133–136, 165–168, 169–172, 173–176, 177–180, 181–184, 229–232, 261–264, 285–288, 297–300, 309–312</p>
Operation and Algebraic Thinking 1.OA	
A. Represent and solve problems involving addition and subtraction.	
1. Use addition and subtraction within 20 to solve word problems involving situations of adding to, taking from, putting together, taking apart, and comparing, with unknowns in all positions, e.g., by using objects, drawings, and equations with a symbol for the unknown number to represent the problem.	<p>SE: 3, 4, 5–8, 9–12, 13–16, 17–20, 21–24, 25–28, 29–32, 33–36, 37–40, Reteaching: 43–46 Sets A–H; 55–56, 57–60, 61–64, 81–84, 85–88, Reteaching: 98 Set H; 107, 108, 113–116, 117–120, 121–124, 137–140, 141–144, Reteaching: 149–150 Sets F, G; 161–164, 189–192, 193–196, Reteaching: 202 Sets F, G; 211, 233–236, 261–264, 265–268, 269–272</p> <p>TE: 3–3A, 4–4C, 5A–8B, 9A–12B, 13A–16B, 17A–20B, 21A–24B, 25A–28B, 29A–32B, 33A–36B, 37A–40B, Reteaching: 43–46 Sets A–H; 55–56A, 57A–60B, 61A–64B, 81A–84B, 85A–88B, Reteaching: 97–98 Set H; 107–107A, 108–108C, 113A–116B, 117A–120B, 121A–124B, 137A–140B, 141A–144B, Reteaching: 149–150 Sets F, G; 161A–164B, 189A–192B, 193A–196B, Reteaching: 201–202 Sets F, G; 211–211A, 233A–236B, 261A–264B, 265A–268B, 269A–272B</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics Grade 1	enVision Mathematics, ©2020 Grade 1
2. Solve word problems that call for addition of three whole numbers whose sum is less than or equal to 20, e.g., by using objects, drawings, and equations with a symbol for the unknown number to represent the problem.	<p>SE: 4, 211, 212, 225–228, 229–232, 252, 261–264, 569–572</p> <p>TE: 4–4C, 211–211A, 212–212C, 225A–228B, 229A–232B, 251–252A, 261A–264B, 569A–572B</p>
B. Understand and apply properties of operations and the relationship between additions and subtraction.	
3. Apply commutative, associative, and additive identity properties of operations as strategies to add. (Students need not use formal terms for these properties.) Examples: If $8 + 3 = 11$ is known, then $3 + 8 = 11$ is also known. (Commutative property of addition.) To add $2 + 6 + 4$, the second two numbers can be added to make a ten, so $2 + 6 + 4 = 2 + 10 = 12$. (Associative property of addition.) $8 + 0 = 8$ (Additive Identity property)	<p>SE: 73–76, 89–92, Reteaching: 97 Set E; 108, 109–112, 141–144, 169–172, 211, 212, 225–228, 229–232, Reteaching: 244 Set C</p> <p>TE: 73A–76B, 89A–92B, Reteaching: 97–98 Set E; 108–108C, 109A–112B, 141A–144B, 169A–172B, 211–211A, 212–212C, 225A–228B, 229A–232B, Reteaching: 244 Set C</p>
4. Understand subtraction as an unknown-addend problem. For example, subtract $10 - 8$ by finding the number that makes 10 when added to 8.	<p>SE: 4, 29–32, 33–36, 81–84, Reteaching: 98 Set G; 108, 159–160, 173–176, 177–180, 181–184, 185–188, Reteaching: 200–201 Sets C–E</p> <p>TE: 4–4C, 29A–32B, 33A–36B, 81A–84B, Reteaching: 97–98 Set G; 108–108C, 159–160A, 173A–176B, 177A–180B, 181A–184B, 185A–188B, Reteaching: 199–202 Sets C–E</p>
C. Add and Subtract with in 20.	
5. Understand counting on as addition and counting back as subtraction e.g. 5, (6,7,8) means $5 + 3$ and 5, (4,3,2) means $5 - 3$.	<p>SE: 57–60, 61–64, 65–68, 77–80, Reteaching: 95–97 Sets A, C, F; 107, 108, 109–112, 113–116, 117–120, 121–124, Reteaching: 147 Sets A, B; 159–160, 161–164, 185–188, Reteaching: 199, 201 Sets A, E; 211, 213–216, 217–220, 221–224, 251–252, 253–256, 257–260, 533–536, 537–540</p> <p>TE: 57A–60B, 61A–64B, 65A–68B, 77A–80B, Reteaching: 95–98 Sets A, C, F; 107–107A, 108–108C, 109A–112B, 113A–116B, 117A–120B, 121A–124B, Reteaching: 147–148 Sets A, B; 159–160A, 161A–164B, 185A–188B, Reteaching: 199–202 Sets A, E; 211–211A, 213A–216B, 217A–220B, 221A–224B, 251–252A, 253A–256B, 257A–260B, 533A–536B, 537A–540B</p>

to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics Grade 1	enVision Mathematics, ©2020 Grade 1
<p>6. Add and subtract within 20, demonstrating fluency for addition and subtraction within 10. Use strategies such as counting on; making ten (e.g., $8 + 6 = 8 + 2 + 4 = 10 + 4 = 14$); decomposing a number leading to a ten (e.g., $13 - 4 = 13 - 3 - 1 = 10 - 1 = 9$); using the relationship between addition and subtraction (e.g., knowing that $8 + 4 = 12$, one knows $12 - 8 = 4$); and creating equivalent but easier or known sums (e.g., adding $6 + 7$ by creating the known equivalent $6 + 6 + 1 = 12 + 1 = 13$).</p>	<p>SE: 55-56, 57-60, 61-64, 65-68, 69-72, 77-80, 81-84, 85-88, 89-92, Reteaching: 95-96 Sets B, D; 107, 108, 117-120, 121-124, 125-128, 129-132, 133-136, 137-140, 141-144, Reteaching: 148-149 Sets C-E; 159-160, 165-168, 169-172, 173-176, 177-180, 181-184, 185-188, Reteaching: 200-201 Sets B, E; 211, 213-216, 251-252</p> <p>TE: 55-56A, 57A-60B, 61A-64B, 65A-68B, 69A-72B, 77A-80B, 81A-84B, 85A-88B, 89A-92B, Reteaching: 95-96 Sets B, D; 107-107A, 108-108C, 117A-120B, 121A-124B, 125A-128B, 129A-132B, 133A-136B, 137A-140B, 141A-144B, Reteaching: 147-150 Sets C-E; 159-160A, 165A-168B, 169A-172B, 173A-176B, 177A-180B, 181A-184B, 185A-188B, Reteaching: 199-202 Sets B, E; 211-211A, 213A-216B, 251-252A</p>
D. Work with addition and subtraction equations.	
<p>7. Understand the meaning of the equal sign, and determine if equations involving addition and subtraction are true or false. For example, which of the following equations are true and which are false? $6 = 6$, $7 = 8 - 1$, $5 + 2 = 2 + 5$, $4 + 1 = 5 + 2$.</p>	<p>SE: 4, 5-8, 9-12, 13-16, 17-20, 211, 212, 217-220, 221-224, 237-240, Reteaching: 243-244 Sets A, D</p> <p>TE: 4-4C, 5A-8B, 9A-12B, 13A-16B, 17A-20B, 211-211A, 212-212C, 217A-220B, 221A-224B, 237A-240B, Reteaching: 243-244 Sets A, D</p>
<p>8. Determine the unknown whole number in an addition or subtraction equation relating to three whole numbers. For example, determine the unknown number that makes the equation true in each of the equations $8 + ? = 11$, $5 = ? - 3$, $6 + 6 = ?$.</p>	<p>SE: 211, 212, 213-216, 221-224, 237-240, Reteaching: 243 Set B</p> <p>TE: 211-211A, 212-212C, 213A-216B, 221A-224B, 237A-240B, Reteaching: 243 Set B</p>

Number and Operation in Base Ten 1.NBT	
A. Extend the counting sequence.	
1. In the range of 0 – 120:	
a. Count on from any given number.	<p>SE: 283, 284, 289–292, 293–296, 297–300, 301–304, 305–308, 309–312, Reteaching: 315–316 Sets B–D; 329–332, 333–336, 337–340, 373–376, 521–524, 525–528, 537–540, 565–568, 577–580, 585–588</p> <p>TE: 283–283A, 284–284C, 289A–292B, 293A–296B, 297A–300B, 301A–304B, 305A–308B, 309A–312B, Reteaching: 315–316 Sets B–D; 329A–332B, 333A–336B, 337A–340B, 373A–376B, 521A–524B, 525A–528B, 537A–540B, 565A–568B, 577A–580B, 585A–588B</p>
b. Read and write numerals.	<p>SE: 305–308, 309–312, Reteaching: 315–316 Sets B–D; 329–332, 333–336, 337–340, 373–376</p> <p>TE: 305A–308B, 309A–312B, Reteaching: 315–316 Sets B–D; 329A–332B, 333A–336B, 337A–340B, 373A–376B</p>
c. Represent a number of objects with a written numeral.	<p>SE: 305–308, 309–312, Reteaching: 315–316 Sets B–D; 329–332, 333–336, 337–340, 373–376</p> <p>TE: 305A–308B, 309A–312B, Reteaching: 315–316 Sets B–D; 329A–332B, 333A–336B, 337A–340B, 373A–376B</p>
B. Understand Place Value	
2. Understand that the two digits of a two-digit number represent amounts of tens and ones. Understand the following as special cases:	<p>SE: 323–324, 333–336, 337–340, 341–344, 345–348, 349–352, Reteaching: 355–356 Sets A–C; 364, 409–412, 413–416, 417–420, 457–460, 465–468, 469–472, 521–524, 525–528, 529–532, 533–536, 537–540</p> <p>TE: 323–324A, 333A–336B, 337A–340B, 341A–344B, 345A–348B, 349A–352B, Reteaching: 355–356 Sets A–C; 364–364C, 409A–412B, 413A–416B, 417A–420B, 457A–460B, 465A–468B, 469A–472B, 521A–524B, 525A–528B, 529A–532B, 533A–536B, 537A–540B</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics Grade 1	enVision Mathematics, ©2020 Grade 1
a. 10 can be thought of as a bundle of ten ones — called a “ten.”	<p>SE: 284, 285–288, 305–308, 309–312, 323–324, 325–328, 329–332, Reteaching: 355 Set A; 405–408, 421–424, 425–428, 433–436, 573–576</p> <p>TE: 284–284C, 285A–288B, 305A–308B, 309A–312B, 323–324A, 325A–328B, 329A–332B, Reteaching: 355 Set A; 405A–408B, 421A–424B, 425A–428B, 433A–436B, 573A–576B</p>
b. The numbers from 11 to 19 are composed of a ten and one, two, three, four, five, six, seven, eight, or nine ones.	<p>SE: 325–328, Reteaching: 355 Set A</p> <p>TE: 325A–328B, Reteaching: 355 Set A</p>
c. The numbers 10, 20, 30, 40, 50, 60, 70, 80, 90 refer to one, two, three, four, five, six, seven, eight, or nine tens (and 0 ones).	<p>SE: 283, 284, 285–288, 297–300, 305–308, Reteaching: 315 Set A; 329–332, 401–404, 451, 453–456, 461–464, 573–576</p> <p>TE: 283–283A, 284–284C, 285A–288B, 297A–300B, 305A–308B, Reteaching: 315 Set A; 329A–332B, 401A–404B, 451–451A, 453A–456B, 461A–464B, 573A–576B</p>
3. Compare two two-digit numbers based on meanings of the tens and ones digits, recording the results of comparisons with the symbols $<$, $=$, and $>$.	<p>SE: 363, 364, 365–368, 369–372, 373–376, 377–380, 381–384, 385–388, Reteaching: 392 Sets C, D</p> <p>TE: 363–363A, 364–364C, 365A–368B, 369A–372B, 373A–376B, 377A–380B, 381A–384B, 385A–388B, Reteaching: 392 Sets C, D</p>

to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics Grade 1	enVision Mathematics, ©2020 Grade 1
C. Use place value understanding and properties of operation to add and subtract	
4. Add and subtract within 100.	
a. Add within 100, including adding a two-digit number and a one-digit number, and adding a two-digit number and a multiple of 10, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used.	<p>SE: 399–400, 401–404, 409–412, 413–416, 417–420, 421–424, 425–428, 429–432, 433–436, Reteaching: 439–442 Sets A, C–H; 452</p> <p>TE: 399–400A, 401A–404B, 409A–412B, 413A–416B, 417A–420B, 421A–424B, 425A–428B, 429A–432B, 433A–436B, Reteaching: 439–442 Sets A, C–H; 452–452C</p>
b. Understand that in adding two-digit numbers (sums within 100) add tens and tens, ones and ones; and sometimes it is necessary to compose a ten.	<p>SE: 399–400, 401–404, 409–412, 413–416, 417–420, 421–424, 425–428, 429–432, 433–436, Reteaching: 439–442 Sets A, C–H; 452</p> <p>TE: 399–400A, 401A–404B, 409A–412B, 413A–416B, 417A–420B, 421A–424B, 425A–428B, 429A–432B, 433A–436B, Reteaching: 439–442 Sets A, C–H; 452–452C</p>
5. Given a two-digit number, mentally find 10 more or 10 less than the number, without having to count; explain the reasoning used.	<p>SE: 363, 365–368, 369–372, Reteaching: 391 Sets A, B; 399–400, 405–408, 429–432, Reteaching: 439 Set B; 452, 453–456, 457–460, 461–464, 469–472, 473–476, 477–480, Reteaching: 484 Set C</p> <p>TE: 363–363A, 365A–368B, 369A–372B, Reteaching: 391 Sets A, B; 399–400A, 405A–408B, 429A–432B, Reteaching: 439–440 Set B; 452–452C, 453A–456B, 457A–460B, 461A–464B, 469A–472B, 473A–476B, 477A–480B, Reteaching: 484 Set C</p>
6. Subtract multiples of 10 in the range 10–90 from multiples of 10 in the range 10–90 (positive or zero differences), using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used.	<p>SE: 451, 452, 453–456, 457–460, 461–464, 465–468, 473–476, 477–480, Reteaching: 483–484 Sets A, B, D</p> <p>TE: 451–451A, 452–452C, 453A–456B, 457A–460B, 461A–464B, 465A–468B, 473A–476B, 477A–480B, Reteaching: 483–484 Sets A, B, D</p>

to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics Grade 1	enVision Mathematics, ©2020 Grade 1
Measurement and Data 1.MD	
A. Measure lengths indirectly and by iterating length units.	
1. Order three objects by length; compare the lengths of two objects indirectly by using a third object.	SE: 491–492, 493–496, 497–500, 505–508, Reteaching: 511 Sets A, B TE: 491–492A, 493A–496B, 497A–500B, 505A–508B, Reteaching: 511 Sets A, B
2. Express the length of an object as a whole number of length units, by laying multiple copies of a shorter object (the length unit) end to end; understand that the length measurement of an object is the number of same-size length units that span it with no gaps or overlaps.	SE: 491–492, 501–504, 505–508, Reteaching: 512 Sets C, D; 557–560, 561–564, 581–584 TE: 491–492A, 501A–504B, 505A–508B, Reteaching: 512 Sets C, D; 557A–560B, 561A–564B, 581A–584B
B. Work with time and money	
3. Tell and write about time in hours and half-hours using analog and digital clocks.	SE: 520, 529–532, 533–536, 537–540, 541–544, Reteaching: 547–548 Sets B–D TE: 520–520C, 529A–532B, 533A–536B, 537A–540B, 541A–544B, Reteaching: 547–548 Sets B–D
5. Identify nickels and understand that five pennies can be thought of as a nickel. Identify dimes and understand ten pennies can be thought of as a dime. Count the value of a set of coins comprised of pennies, nickels, and dimes.	SE: 519, 521–524, 525–528, Reteaching: 547 Set A TE: 519–519A, 521A–524B, 525A–528B, Reteaching: 547 Set A
C. Represent and interpret data	
4. Organize, represent, and interpret data with up to three categories; ask and answer questions about the total number of data points, how many in each category, and how many more or less are in one category than in another.	SE: 251–252, 253–256, 257–260, 261–264, 265–268, 269–272, Reteaching: 275–276 Sets A, B; 364, 520 TE: 251–252A, 253A–256B, 257A–260B, 261A–264B, 265A–268B, 269A–272B, Reteaching: 275–276 Sets A, B; 364–364C, 520–520C

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics Grade 1	enVision Mathematics, ©2020 Grade 1
Geometry 1.G	
A. Reason with shapes and their attributes.	
1. Distinguish between defining attributes (e.g., triangles are closed and three-sided) versus non-defining attributes (e.g., color, orientation, overall size); build and draw shapes to possess defining attributes.	<p>SE: 555–556, 557–560, 561–564, 565–568, 577–580, 581–584, 589–592, Reteaching: 595–598 Sets A, B, E, G, H; 608</p> <p>TE: 555–556A, 557A–560B, 561A–564B, 565A–568B, 577A–580B, 581A–584B, 589A–592B, Reteaching: 595–598 Sets A, B, E, G, H; 608–608C</p>
2. Compose and Identify regular and irregular two-dimensional shapes (rectangles, squares, trapezoids, triangles, half-circles, and quarter-circles) and compose three-dimensional shapes (cubes, spheres, right rectangular prisms, right circular cones, and right circular cylinders) to create a composite shape, and compose new shapes from the composite shape. (Students do not need to master formal names such as “right rectangular prism.”)	<p>SE: 555–556, 569–572, 573–576, 585–588, 589–592, Reteaching: 596–597 Sets C, D, F, H; 608</p> <p>TE: 555–556A, 569–572B, 573–576B, 585A–588B, 589A–592B, Reteaching: 595–598 Sets C, D, F, H; 608–608C</p>
3. Partition circles and rectangles into two and four equal shares, describe the shares using the words halves, fourths, and quarters, and use the phrases half of, fourth of, and quarter of. Describe the whole as two of, or four of the shares. Understand for these examples that decomposing into more equal shares creates smaller shares.	<p>SE: 607, 608, 609–612, 613–616, 617–620, 621–624, Reteaching: 627–628 Sets A–D</p> <p>TE: 607–607A, 608–608C, 609A–612B, 613A–616B, 617A–620B, 621A–624B, Reteaching: 627–628 Sets A–D</p>

to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics Grade 2	enVision Mathematics, ©2020 Grade 2
Mathematical Practices	
1. Make sense of problems and persevere in solving them.	<p>enVision Mathematics provides numerous instructional opportunities to help students develop proficiency in the math practices. To get students off to a good start on all eight practices, use the Math Practices and Problem Solving Handbook pages at SavvasRealize.com, along with the Math Practices Posters, and supporting Math Practices Animations. Each lesson begins with Problem-Based Learning, an activity in which students interact with their peers and teachers to make sense of and decide on a workable solution for a situation. Another feature of each lesson is the set of problem-solving exercises in which students persevere by applying different skills and strategies to solve problems. Each Problem-Solving Lesson provides instruction and practice focused on a specific math practice.</p> <p>SE/TE: 13–16, 21–24, 37–40, 41–44, 69–72, 77–80, 113–116, 117–120, 141–144, 149–152, 165–168, 169–172, 193–196, 197–200, 205–208</p>
2. Reason abstractly and quantitatively.	<p>enVision Mathematics provides scaffolded instruction to help students develop both quantitative and abstract reasoning. In the Visual Learning Bridge, students can see how to represent a given situation numerically or algebraically. They will have opportunities later in the lesson to reason abstractly as they endeavor to represent situations symbolically. Reasonableness exercises remind students to compare their work to the original situation. Reasoning problems throughout the exercise sets focus students' attention on the structure or meaning of an operation, for example, rather than merely the solution.</p> <p>SE/TE: 5–8, 13–16, 17–20, 21–24, 25–28, 33–36, 37–40, 41–44, 73–76, 97–100, 105–108, 109–112, 149–152, 153–156, 157–160</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics Grade 2	enVision Mathematics, ©2020 Grade 2
3. Construct viable arguments and critique the reasoning of others.	<p>Consistent with a focus on reasoning and sense-making is a focus on critical reasoning—argumentation and critique of arguments. In enVision Mathematics, the Problem-Based Learning affords students opportunities to share with classmates their thinking about problems, their solution methods, and their reasoning about the solutions. Many exercises found throughout the program specifically call for students to justify or explain their solutions. The ability to articulate a clear explanation for a process is a stepping stone to critical analysis and reasoning of both the student’s own processes and those of others.</p> <p>SE/TE: 29–32, 41–44, 69–72, 77–80, 93–96, 105–108, 117–120, 137–140, 141–144, 149–152, 157–160, 169–172, 189–192, 201–204, 217–220</p>
4. Model with mathematics.	<p>Students using enVision Mathematics are introduced to mathematical modeling in the early grades. They first use manipulatives and drawings and then equations to model addition and subtraction situations. The Visual Learning Bridge and Visual Learning Animation Plus often present real-world situations, and students are shown how these can be modeled mathematically. In later grades, students expand their modeling skills to include representations such as tables and graphs, as well as equations.</p> <p>SE/TE: 5–8, 9–12, 21–24, 29–32, 33–36, 41–44, 61–64, 65–68, 73–76, 77–80, 101–104, 109–112, 137–140, 141–144, 145–148</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics Grade 2	enVision Mathematics, ©2020 Grade 2
5. Use appropriate tools strategically.	<p>Students become fluent in the use of a wide assortment of tools ranging from physical objects, including manipulatives, rulers, protractors, and even pencil and paper, to digital tools, such as Online Math Tools and computers. As students become more familiar with the tools available to them, they are able to begin making decisions about which tools are most helpful in a particular situation.</p> <p>SE/TE: 29–32, 73–76, 93–96, 97–100, 117–120, 137–140, 189–192, 193–196, 209–212, 237–240, 245–248, 261–264, 305–308, 349–352, 377–380</p>
6. Attend to precision.	<p>Students are expected to use mathematical terms and symbols with precision. Key terms and concepts are highlighted in each lesson. The Problem-Based Learning activity provides repeated opportunities for students to use precise language to explain their solution paths while solving problems. In the Convince Me! feature, students revisit these key terms or concepts and provide explicit definitions or explanations.</p> <p>SE/TE: 9–12, 37–40, 61–64, 77–80, 113–116, 197–200, 201–204, 253–256, 261–264, 301–304, 333–336, 341–344, 349–352, 353–356, 357–360</p>
7. Look for and make use of structure.	<p>Students are encouraged to look for structure as they develop solution plans. As students mature in their mathematical thinking, they look for structure in numerical operations by focusing on place value and properties of operations. This focus on looking for and recognizing structure enables students to draw from patterns as they formalize their thinking about the structure of operations.</p> <p>SE/TE: 9–12, 13–16, 17–20, 25–28, 61–64, 65–68, 69–72, 77–80, 101–104, 145–148, 153–156, 161–164, 189–192, 201–204, 217–220</p>

to the South Dakota State Standards for Mathematics**

<p style="text-align: center;">South Dakota State Standards for Mathematics Grade 2</p>	<p style="text-align: center;">enVision Mathematics, ©2020 Grade 2</p>
<p>8. Look for and express regularity in repeated reasoning.</p>	<p>Students are prompted to look for repetition in computations to help them develop shortcuts and become more efficient problem solvers. Students are reminded to think about problems they have encountered previously that may share features or processes. They are encouraged to draw on the solution plan developed for such problems, and, as their mathematical thinking matures, to look for and apply generalizations to similar situations. The Problem-Based Learning activities offer students opportunities to look for regularity in the way operations behave.</p> <p>SE/TE: 5–8, 17–20, 25–28, 33–36, 65–68, 77–80, 105–108, 153–156, 157–160, 165–168, 205–208, 281–284, 345–348, 353–356, 357–360</p>

B. Add and subtract within 20.	
2. Add and subtract within 20.	
a. Fluently add and subtract within 20 using mental strategies. (See standard 1.OA.6 for a list of mental strategies.)	<p>SE: 3, 4, 5–8, 9–12, 13–16, 17–20, 21–24, 25–28, 29–32, 33–36, 37–40, 41–44, Reteaching: 47–50 Sets A–H; 60, 61–64, 65–68, 69–72, 73–76, 77–80, Reteaching: 83–84 Sets A–D; 91, 301–304, Reteaching: 317 Set F; 561–564, Reteaching: 595 Set A</p> <p>TE: 3–3A, 4–4C, 5A–8B, 9A–12B, 13A–16B, 17A–20B, 21A–24B, 25A–28B, 29A–32B, 33A–36B, 37A–40B, 41A–44B, Reteaching: 47–50 Sets A–H; 60–60A, 61A–64B, 65A–68B, 69A–72B, 73A–76B, 77A–80B, Reteaching: 83–84 Sets A–D; 91–91A, 301A–304B, Reteaching: 317–318 Set F; 561A–564B, Reteaching: 595–596 Set A</p>
b. By end of Grade 2, know from memory all sums of two one-digit numbers.	<p>SE: 5–8, 9–12, 13–16, 17–20, 21–24, 25–28, 29–32, 33–36, 37–40, 41–44, 45, Reteaching: 47–48 Sets A–H, 51–54, 81, 121, 173, 221, 265, 313, 361, 417, 461, 497, 545, 593, 629, 665</p> <p>TE: 5A–8B, 9A–12B, 13A–16B, 17A–20B, 21A–24B, 25A–28B, 29A–32B, 33A–36B, 37A–40B, 41A–44B, 45, Reteaching: 47–48 Sets A–H; 51–54, 56B–56C, 81, 121, 173, 221, 265, 313, 361, 417, 461, 497, 545, 593, 629, 665</p>
C. Work with equal groups of objects to gain foundations for multiplication.	
3. Determine whether a group of objects (up to 20) has an odd or even number of members, e.g., by pairing objects or counting them by 2s; write an equation to express an even number as a sum of two equal addends.	<p>SE: 60, 61–64, 65–68, Reteaching: 83 Set A</p> <p>TE: 60–60A, 61A–64B, 65A–68B, Reteaching: 83 Set A</p>
4. Use addition to find the total number of objects arranged in rectangular arrays with up to 5 rows and up to 5 columns; write an equation to express the total as a sum of equal addends	<p>SE: 69–72, 73–76, 77–80, Reteaching: 83–84 Sets B–D; 92, 136, 577–580, 585–588, 589–592, Reteaching: 597–598 Sets E, G, H</p> <p>TE: 69A–72B, 73A–76B, 77A–80B, Reteaching: 83–84 Sets B–D; 92–92C, 135–136A, 577A–580B, 585A–588B, 589A–592B, Reteaching: 597–598 Sets E, G, H</p>

Number and Operation in Base Ten 2.NBT	
A. Understand place value.	
1. Understand that the three digits of a three-digit number represent amounts of hundreds, tens, and ones; e.g., 706 equals 7 hundreds, 0 tens, and 6 ones. Understand the following as special cases:	SE: 376, 381–384, 385–388, 389–392, 405–408, 409–412, Reteaching: 419–422 Sets B, C, G TE: 376–376C, 381A–384B, 385A–388B, 389A–392B, 405A–408B, 409A–412B, Reteaching: 419–422 Sets B, C, G
a. 100 can be thought of as a bundle of ten tens — called a “hundred.”	SE: 377–380, 393–396, Reteaching: 419–420 Sets A, D TE: 377A–380B, 393A–396B, Reteaching: 419–420 Sets A, D
b. The numbers 100, 200, 300, 400, 500, 600, 700, 800, 900 refer to one, two, three, four, five, six, seven, eight, or nine hundreds (and 0 tens and 0 ones).	SE: 377–380, 381–384, 385–388, Reteaching: 419 Set A TE: 377A–380B, 381A–384B, 385A–388B, Reteaching: 419–420 Set A
2. Count within 1000; skip-count by 5s, 10s, and 100s, starting from any number in its skip counting sequence.	SE: 329–332, 333–336, 337–340, 349–352, 353–356, 357–360, Reteaching: 363–366 Sets A, B, D–F; 375, 376, 397–400, 401–404, 413–416, Reteaching: 421–422 Sets E, F, H; 437–440, 477–480 TE: 329A–332B, 333A–336B, 337A–340B, 349A–352B, 353A–356B, 357A–360B, Reteaching: 363–366 Sets A, B, D–F; 375–375A, 376–376C, 397A–400B, 401A–404B, 413A–416B, Reteaching: 421–422 Sets E, F, H; 437A–440M, 477A–480B
3. Read and write numbers to 1000 using base-ten numerals (standard form), number names (word form), and expanded form.	SE: 376, 381–384, 385–388, 389–392, 393–396, Reteaching: 419–420 Sets B, C, D TE: 376–376C, 381A–384B, 385A–388B, 389A–392B, 393A–396B, Reteaching: 419–420 Sets B, C, D

Measurement and Data 2.MD	
A. Measure and estimate lengths in standard units.	
1. Measure the length of an object by selecting and using appropriate tools such as rulers, yardsticks, meter sticks, and measuring tapes.	<p>SE: 513–516, 517–520, 521–524, 525–528, 529–532, 533–536, 541–544, Reteaching: 547–550 Sets B–F, H; 560, 565–568, 569–572, 573–576, Reteaching: 595–596 Sets B–D; 641–644, 645–648, Reteaching: 667 Set A</p> <p>TE: 513A–516B, 517A–520B, 521A–524B, 525A–528B, 529A–532B, 533A–536B, 541A–544B, Reteaching: 547–550 Sets B–F, H; 560–560C, 565A–568B, 569A–572B, 573A–576B, Reteaching: 595–596 Sets B–D; 641A–644B, 645A–648B, Reteaching: 667–668 Set A</p>
2. Measure the length of an object twice, using length units of different lengths for the two measurements; describe how the two measurements relate to the size of the unit chosen.	<p>SE: 521–524, 533–536, Reteaching: 548–549 Sets C, F; 581–584, Reteaching: 597 Set F</p> <p>TE: 521A–524B, 533A–536B, Reteaching: 548–549 Sets C, F; 581A–584B, Reteaching: 597–598 Set F</p>
3. Estimate lengths using units of inches, feet, centimeters, and meters.	<p>SE: 509–512, 513–516, 517–520, 525–528, 529–532, 541–544, Reteaching: 547–550 Sets A, B, D, E, H</p> <p>TE: 509A–512B, 513A–516B, 517A–520B, 525A–528B, 529A–532B, 541A–544B, Reteaching: 547–550 Sets A, B, D, E, H</p>
4. Measure to determine how much longer one object is than another, expressing the length difference in terms of a standard length unit.	<p>SE: 537–540, 541–544, Reteaching: 550 Sets G, H; 560</p> <p>TE: 537A–540B, 541A–544B, Reteaching: 549–550 Sets G, H; 560–560C</p>
B. Relate addition and subtraction to length.	
5. Use addition and subtraction within 100 to solve word problems involving lengths that are given in the same units, e.g., by using drawings (such as drawings of rulers) and equations with a symbol for the unknown number to represent the problem.	<p>SE: 537–560, Reteaching: 549–550 Sets F, G; 560, 609–612, 613–616, 617–620, 625–628, Reteaching: 631–632 Sets A–D</p> <p>TE: 537A–540B, Reteaching: 549–550 Sets F, G; 560–560C, 609A–612B, 613A–616B, 617A–620B, 625A–628B, Reteaching: 631–632 Sets A–D</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics Grade 2	enVision Mathematics, ©2020 Grade 2
6. Represent whole numbers as lengths from 0 on a number line diagram with equally spaced points corresponding to the numbers 0, 1, 2, ..., and represent whole-number sums and differences within 100 on a number line diagram.	SE: 621–624, 625–628, Reteaching: 632 Sets C–D TE: 621A–624B, 625A–628B, Reteaching: 632 Sets C–D
C. Work with time and money.	
7. Tell and write time from analog and digital clocks to the nearest five minutes, using a.m. and p.m.	SE: 328, 349–352, 353–356, 357–360, Reteaching: 365–366 Sets D–F TE: 328–328A, 349A–352B, 353A–356B, 357A–360B, Reteaching: 365–366 Sets D–F
8. Identify and count coins and bills and apply that understanding to solve word problems.	SE: 329–332, 333–336, 337–340, 341–344, 345–348, 376, 433–436, 473–476, 485–488 TE: 329A–332B, 333A–336B, 337A–340B, 341A–344B, 345A–348B, 376–376C, 433A–436B, 473A–476B, 485A–488B
a. Recognize and know the value of coins up to one dollar.	MDIS: A61, A62, A63, A64, A65, A66, A67, A68, A69, A70 SE: 329–332; Reteaching: 363–364 Sets A, B TE: 329A–332B; Reteaching: 363–364 Sets A, B
b. Solve word problems involving dollar bills, quarters, dimes, nickels, and pennies, using \$ and ¢ symbols appropriately.	SE: 329–332, 333–336, 337–340, 341–344, 345–348, 376, 433–436, 473–476, 485–488 TE: 329A–332B, 333A–336B, 337A–340B, 341A–344B, 345A–348B, 376–376C, 433A–436B, 473A–476B, 485A–488B
D. Represent and interpret data.	
9. Generate measurement data by measuring lengths of several objects to the nearest whole unit, or by making repeated measurements of the same object. Show the measurements by making a line plot, where the horizontal scale is marked off in whole-number units.	SE: 640, 641–644, 645–648, Reteaching: 667 Set A TE: 640–640C, 641A–644B, 645A–648B, Reteaching: 667–668 Set A

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics Grade 2	enVision Mathematics, ©2020 Grade 2
10. Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put together, take-apart, and compare problems using information presented in a bar graph.	SE: 640, 649–652, 653–656, 657–660, 661–664, Reteaching: 667–670 Sets B–D TE: 640–640C, 649A–652B, 653A–656B, 657A–660B, 661A–664B, Reteaching: 667–670 Sets B–D
Geometry 2.G	
A. Reason with shapes and their attributes.	
1. Recognize, identify, and draw shapes having specified attributes, such as a given number of angles or a given number of equal faces; to include triangles, quadrilaterals, pentagons, hexagons, and cubes. (Sizes are compared directly or visually, not compared by measuring.)	SE: 560, 561–564, 565–568, 569–572, 573–576, Reteaching: 595–596 Sets A–D TE: 560–560C, 561A–564B, 565A–568B, 569A–572B, 573A–576B, Reteaching: 595–596 Sets A–D
2. Partition a rectangle into rows and columns of same-size squares and count to find the total number of them.	SE: 577–580, 589–592, Reteaching: 597–598 Sets E, H TE: 577A–580B, 589A–592B, Reteaching: 597–598 Sets E, H
3. Partition circles and rectangles into two, three, or four equal shares, describe the shares using the words halves, thirds, half of, a third of, etc., and describe the whole as two halves, three thirds, four fourths. Recognize that equal shares of identical wholes need not have the same shape.	SE: 581–584, 585–588, 589–592, Reteaching: 597–598 Sets F, G, H TE: 581A–584B, 585A–588B, 589A–592B, Reteaching: 597–598 Sets F, G, H

South Dakota State Standards for Mathematics, Grade 3	enVision Mathematics, ©2020 Grade 3
Mathematical Practices	
1. Make sense of problems and persevere in solving them.	<p>enVision Mathematics provides numerous instructional opportunities to help students develop proficiency in the math practices. To get students off to a good start on all eight practices, use the Math Practices and Problem Solving Handbook pages at SavvasRealize.com, along with the Math Practices Posters, and supporting Math Practices Animations. Each lesson begins with Problem- Based Learning, an activity in which students interact with their peers and teachers to make sense of and decide on a workable solution for a situation. Another feature of each lesson is the set of problem-solving exercises in which students persevere by applying different skills and strategies to solve problems. Each Problem-Solving Lesson provides instruction and practice focused on a specific math practice.</p> <p>SE/TE: 5-8, 9-12, 17-20, 25-28, 41-44, 49-52, 61-64, 81-84, 89-92, 93-96, 97-100, 101-104, 117-120, 121-124, 125-128</p>
2. Reason abstractly and quantitatively.	<p>enVision Mathematics provides scaffolded instruction to help students develop both quantitative and abstract reasoning. In the Visual Learning Bridge, students can see how to represent a given situation numerically or algebraically. They will have opportunities later in the lesson to reason abstractly as they endeavor to represent situations symbolically. Reasonableness exercises remind students to compare their work to the original situation. Reasoning problems throughout the exercise sets focus students' attention on the structure or meaning of an operation, for example, rather than merely the solution.</p> <p>SE/TE: 9-12, 21-24, 45-48, 53-56, 61-64, 93-96, 97-100, 117-120, 121-124, 125-128, 129-132, 133-136, 141-144, 145-148, 149-152</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

<p align="center">South Dakota State Standards for Mathematics, Grade 3</p>	<p align="center">enVision Mathematics, ©2020 Grade 3</p>
<p>3. Construct viable arguments and critique the reasoning of others.</p>	<p>Consistent with a focus on reasoning and sense-making is a focus on critical reasoning—argumentation and critique of arguments. In enVision Mathematics, the Problem-Based Learning affords students opportunities to share with classmates their thinking about problems, their solution methods, and their reasoning about the solutions. Many exercises found throughout the program specifically call for students to justify or explain their solutions. The ability to articulate a clear explanation for a process is a stepping stone to critical analysis and reasoning of both the student’s own processes and those of others.</p> <p>SE/TE: 13–16, 25–28, 41–44, 45–48, 57–60, 61–64, 77–80, 101–104, 133–136, 141–144, 149–152, 173–176, 177–180, 189–192, 209–212</p>
<p>4. Model with mathematics.</p>	<p>Students using enVision Mathematics are introduced to mathematical modeling in the early grades. They first use manipulatives and drawings and then equations to model addition and subtraction situations. The Visual Learning Bridge and Visual Learning Animation Plus often present real-world situations, and students are shown how these can be modeled mathematically. In later grades, students expand their modeling skills to include representations such as tables and graphs, as well as equations.</p> <p>SE/TE: 5–8, 9–12, 17–20, 21–24, 25–28, 61–64, 85–88, 93–96, 125–128, 137–140, 141–144, 181–184, 189–192, 221–224, 225–228</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 3	enVision Mathematics, ©2020 Grade 3
5. Use appropriate tools strategically.	<p>Students become fluent in the use of a wide assortment of tools ranging from physical objects, including manipulatives, rulers, protractors, and even pencil and paper, to digital tools, such as Online Math Tools and computers. As students become more familiar with the tools available to them, they are able to begin making decisions about which tools are most helpful in a particular situation.</p> <p>SE/TE: 13–16, 25–28, 49–52, 57–60, 81–84, 117–120, 181–184, 209–212, 233–236, 257–260, 317–320, 341–344, 353–356, 357–360, 381–384</p>
6. Attend to precision.	<p>Students are expected to use mathematical terms and symbols with precision. Key terms and concepts are highlighted in each lesson. The Problem-Based Learning activity provides repeated opportunities for students to use precise language to explain their solution paths while solving problems. In the Convince Me! feature, students revisit these key terms or concepts and provide explicit definitions or explanations.</p> <p>SE/TE: 17–20, 49–52, 57–60, 77–80, 137–140, 145–148, 149–152, 169–172, 217–220, 233–236, 253–256, 61–264, 269–272, 305–308, 309–312</p>
7. Look for and make use of structure.	<p>Students are encouraged to look for structure as they develop solution plans. As students mature in their mathematical thinking, they look for structure in numerical operations by focusing on place value and properties of operations. This focus on looking for and recognizing structure enables students to draw from patterns as they formalize their thinking about the structure of operations.</p> <p>SE/TE: 13–16, 25–28, 41–44, 45–48, 53–56, 77–80, 81–84, 85–88, 89–92, 101–104, 121–124, 129–132, 137–140, 169–172, 177–180</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 3	enVision Mathematics, ©2020 Grade 3
8. Look for and express regularity in repeated reasoning.	<p>Students are prompted to look for repetition in computations to help them develop shortcuts and become more efficient problem solvers. Students are reminded to think about problems they have encountered previously that may share features or processes. They are encouraged to draw on the solution plan developed for such problems, and, as their mathematical thinking matures, to look for and apply generalizations to similar situations. The Problem-Based Learning activities offer students opportunities to look for regularity in the way operations behave.</p> <p>SE/TE: 21–24, 53–56, 97–100, 101–104, 133–136, 145–148, 181–184, 185–188, 221–224, 225–228, 269–272, 293–296, 345–348, 353–356, 389–392</p>
Operations and Algebraic Thinking 3.OA	
A. Represent and solve problems involving multiplication and division.	
1. Interpret products of whole numbers, e.g., interpret 5×7 as the total number of objects in 5 groups of 7 objects each. For example, describe a context in which a total number of objects can be expressed as 5×7 .	<p>SE: 3, 4, 5–8, 9–12, 13–16, 25–28, Reteaching: 31–32 Sets A–C, E; 41–44, 45–48, 49–52, 53–56, 57–60, Reteaching: 67–68 Sets A–E; 185–188, Reteaching: 197–198 Set E</p> <p>TE: 3–3A, 4–4C, 5A–8B, 9A–12B, 13A–16B, 25A–28B, Reteaching: 31–32 Sets A–C, E; 41A–44B, 45A–48B, 49A–52B, 53A–56B, 57A–60B, Reteaching: 67–68 Sets A–E; 185A–188B, Reteaching: 197–198 Set E</p>
2. Interpret whole-number quotients of whole numbers, e.g., interpret $56 \div 8$ as the number of objects in each share when 56 objects are partitioned equally into 8 shares, or as a number of shares when 56 objects are partitioned into equal shares of 8 objects each.	<p>SE: 4, 17–20, 21–24, 25–28, Reteaching: 32 Sets D, E; 185–188, Reteaching: 197–198 Set E</p> <p>TE: 4–4C, 17A–20B, 21A–24B, 32, Reteaching: 25A–28B Sets D, E; 185A–188B, Reteaching: 197–198 Set E</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 3	enVision Mathematics, ©2020 Grade 3
<p>3. Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.</p>	<p>SE: 3, 4, 5-8, 9-12, 13-16, 17-20, 21-24, 25-28, Reteaching: 31-32 Sets A-E; 39-40, 41-44, 45-48, 49-52, 53-56, 57-60, 61-64, Reteaching: 67-68 Sets A-F; 76, 81-84, 85-88, 89-92, 93-96, 97-100, Reteaching: 107-108 Sets B-E; 117-120, 121-124, 125-128, 129-132, 133-136, 137-140, 141-144, 145-148, 149-152, Reteaching: 155-158 Sets A-I; 167, 168, 177-180, 181-184, 185-188, 189-192, Reteaching: 196-198 Sets C-F; 252, 253-256, 257-260, 261-264, 265-268, 269-272, Reteaching: 275-278 Sets A-D; 385-388, Reteaching: 399 Set B; 408, 561-564, Reteaching: 574 Set H; 617-620, Reteaching: 639 Set A</p> <p>TE: 3-3A, 4-4C, 5A-8B, 9A-12B, 13A-16B, 17A-20B, 21A-24B, 25A-28B, Reteaching: 31-32 Sets A-E; 39-40A, 41A-44B, 45A-48B, 49A-52B, 53A-56B, 57A-60B, 61A-64B, Reteaching: 67-68 Sets A-F; 76-76C, 81A-84B, 85A-88B, 89A-92B, 93A-96B, 97A-100B, Reteaching: 107-108 Sets B-E; 117A-120B, 121A-124B, 125A-128B, 129A-132B, 133A-136B, 137A-140B, 141A-144B, 145A-148B, 149A-152B, Reteaching: 155-158 Sets A-I; 167-167A, 168-168C, 177A-180B, 181A-184B, 185A-188B, 189A-192B, 195-198, 252-252C, 253A-256B, 257A-260B, 261A-264B, 265A-268B, 269A-272B, Reteaching: 275-278 Sets A-D; 385A-388B, Reteaching: 399 Set B; 408-408C, 561A-564B, Reteaching: 573-574 Set H; 617A-620B, Reteaching: 639 Set A</p>
<p>4. Number and Operations—Fractions 3.NF	
A. Develop understanding of Fractions as numbers.	
1. Understand a fraction $1/b$ as the quantity formed by 1 part when a whole is partitioned into b equal parts (example: 1 part out of 4 equal parts is the same as $1/4$); understand a fraction a/b as the quantity formed by a parts of size $1/b$. (example: $3/4$ is the same as 3 one-fourths ($1/4$, $1/4$, $1/4$))	<p>SE: 435-436, 437-440, 441-444, 445-448, 465-468, Reteaching: 471-474 Sets A-C, H; 484, 485-488, 489-492, Reteaching: 519-522 Sets A-H; 585-588</p> <p>TE: 435-436A, 437A-440B, 441A-444B, 445A-448B, 465A-468B, Reteaching: 471-474 Sets A-C, H; 484-484C, 485A-488B, 489A-492B, Reteaching: 519-522 Sets A-H; 585A-585B</p>
2. Understand a fraction as a number on the number line; represent fractions on a number line diagram.	<p>SE: 435-436, 437-440, 441-444, 445-448, 465-468, Reteaching: 471-474 Sets A-C, H; 484, 485-488, 489-492, Reteaching: 519-522 Sets A-H</p> <p>TE: 435-436A, 437A-440B, 441A-444B, 445A-448B, 465A-468B, Reteaching: 471-474 Sets A-C, H; 484-484C, 485A-488B, 489A-492B, Reteaching: 519-522 Sets A-H</p>
a. Represent a fraction $1/b$ on a number line diagram by defining the interval from 0 to 1 as the whole and partitioning it into b equal parts. Recognize that each part has size $1/b$ and that the endpoint of the part based at 0 locates the number $1/b$ on the number line.	<p>SE: 435-436, 449-452, 453-456, 457-460, 461-464, Reteaching: 472-474 Sets D-G</p> <p>TE: 435-436A, 449A-452B, 453A-456B, 457A-460B, 461A-464B, Reteaching: 471-474 Sets D-G</p>
b. Represent a fraction a/b on a number line diagram by marking off a lengths $1/b$ from 0. Recognize that the resulting interval has size a/b and that its endpoint locates the number a/b on the number line.	<p>SE: 449-452, 453-456, 457-460, 461-464, Reteaching: 472-474 Sets D-G</p> <p>TE: 449A-452B, 453A-456B, 457A-460B, 461A-464B, Reteaching: 471-474 Sets D-G</p>
3. Explain equivalence of fractions in special cases, and compare fractions by reasoning about their size. Note - Grade 3 expectations in this domain are limited to fractions with denominators 2, 3, 4, 6, and 8.	<p>SE: 483, 484, 485-488, 489-492, 493-496, 497-500, 501-504, 505-508, 509-512, 513-516, Reteaching: 519-522 Sets A-H</p> <p>TE: 483-483A, 484-484C, 485A-488B, 489A-492B, 493A-496B, 497A-500B, 501A-504B, 505A-508B, 509A-512B, 513A-516B, Reteaching: 519-522 Sets A-H</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 3	enVision Mathematics, ©2020 Grade 3
a. Understand two fractions as equivalent (equal) if they are the same size, or the same point on a number line.	SE: 483, 484, 485–488, 489–492, 505–508, 509–512, Reteaching: 519–522 Sets A, B, F, G TE: 483-483A, 484-484C, 485A–488B, 489A–492B, 505A–508B, 509A–512B, Reteaching: 519–522 Sets A, B, F, G
b. Recognize and generate simple equivalent fractions, e.g., $1/2 = 2/4$, $4/6 = 2/3$. Explain why the fractions are equivalent, e.g., by using a visual fraction model.	SE: 483, 485–488, 489–492, 513–516, Reteaching: 519–522 Sets A, B, H TE: 483–483A, 485A–488B, 489A–492B, 513A–516B, Reteaching: 519–522 Sets A, B, H
c. Express whole numbers as fractions, and recognize fractions that are equivalent to whole numbers.	SE: 445–448, Reteaching: 472 Set C; 484, 509–512, Reteaching: 522 Set G TE: 445A–448B, Reteaching: 471–472 Set C; 484–484C, 509A–512B, Reteaching: 521–522 Set G
d. Compare two fractions with the same numerator or the same denominator by reasoning about their size. Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with the symbols $<$, $=$, or $>$.	SE: 483, 493–496, 497–500, 501–504, 513–516, Reteaching: 520–522 Sets C–E, H TE: 483–483A, 493A–496B, 497A–500B, 501A–504B, 513A–516B, Reteaching: 519–522 Sets C–E, H
Measurement and Data 3.MD	
A. Solving problems involving measurement and estimation of intervals of time, liquid volumes, and masses of objects.	
1. Tell and write time to the nearest minute and measure time intervals in minutes, using an analog and digital clock. Solve word problems involving addition and subtraction of time intervals in minutes, e.g., by representing the problem on a number line diagram.	SE: 531–532, 533–536, 537–540, 541–544, 565–568, Reteaching: 571–574 Sets A–C, I TE: 531–532A, 533A–536B, 537A–540B, 541A–544B, 565A–568B, Reteaching: 571–574 Sets A–C, I

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 3	enVision Mathematics, ©2020 Grade 3
2. Measure and estimate liquid volumes and masses of objects using standard units of grams (g), kilograms (kg), and liters (l). (Excludes compound units such as cm ³ and finding the geometric volume of a container.) Add, subtract, multiply, or divide to solve one-step word problems involving masses or volumes that are given in the same units, e.g., by using drawings (such as a beaker with a measurement scale) to represent the problem. (Excludes multiplicative comparison problems [problems involving notions of “times as much”; see Table, page 34])	SE: 309–312, Reteaching: 325 Set F; 531–532, 545–548, 549–552, 553–556, 557–560, 561–564, Reteaching: 572–574 Sets D–H TE: 309A–312B, Reteaching: 325–326 Set F; 531–532A, 545A–548B, 549A–552B, 553A–556B, 557A–560B, 561A–564B, Reteaching: 571–574 Sets D–H
B. Represent and interpret data.	
3. Draw a scaled picture graph and a scaled bar graph to represent a data set with several categories. Solve one- and two-step “how many more” and “how many less” problems using information presented in scaled bar graphs.	SE: 251, 252, 253–256, 257–260, 261–264, 265–268, 269–272, Reteaching: 275–278 Sets A–D; 417–420, Reteaching: 428 Set C TE: 251–251A, 252–252C, 253A–256B, 257A–260B, 261A–264B, 265A–268B, 269A–272B, Reteaching: 275–278 Sets A–D; 417A–420B, Reteaching: 428 Set C
4. Generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch. Show the data by making a line plot, where the horizontal scale is marked off in appropriate units— whole numbers, halves, or quarters.	SE: 435–436, 457–460, 461–464, Reteaching: 473–474 Sets F, G TE: 435–436A, 457A–460B, 461A–464B, Reteaching: 473–474 Sets F, G
C. Geometric measurement: understand concepts of area and relate area to multiplication and to addition.	
5. Recognize area as an attribute of plane figures and understand concepts of area measurement.	SE: 252 TE: 252-252C
a. A square with side length 1 unit, called “a unit square,” is said to have “one square unit” of area, and can be used to measure area.	SE: 207–208, 209–212, 213–216, 217–220, Reteaching: 239–240 Sets A–C TE: 207–208A, 209A–212B, 213A–216B, 217A–220B, Reteaching: 239–240 Sets A–C

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 3	enVision Mathematics, ©2020 Grade 3
b. A plane figure which can be covered without gaps or overlaps by n unit squares is said to have an area of n square units.	SE: 209–212, 213–216, 217–220, Reteaching: 239–240 Sets A–C; 593–596, Reteaching: 604 Set C TE: 209A–212B, 213A–216B, 217A–220B, Reteaching: 239–240 Sets A–C; 593A–596B, Reteaching: 604 Set C
6. Measure areas by counting unit squares (square cm, square m, square in, square ft, and improvised units).	SE: 207–208, 209–212, 213–216, 217–220, Reteaching: 239–240 Sets A–C TE: 207–208A, 209A–212B, 213A–216B, 217A–220B, Reteaching: 239–240 Sets A–C
7. Relate area to the operations of multiplication and addition.	SE: 101–104, Reteaching: 108 Set F; 252 TE: 101A–104B, Reteaching: 108 Set F; 252–252C
a. Find the area of a rectangle with whole-number side lengths by tiling it, and show that the area is the same as would be found by multiplying the side lengths.	SE: 221–224, 233–236, Reteaching: 242 Set G TE: 221A–224B, 233A–236B, Reteaching: 241–242 Set G
b. Multiply side lengths to find areas of rectangles with whole number side lengths in the context of solving real world and mathematical problems, and represent whole-number products as rectangular areas in mathematical reasoning.	SE: 221–224, 233–236, Reteaching: 242 Set G; 597–600, Reteaching: 604 Set D; 625–628, 629–632, Reteaching: 640 Set C TE: 221A–224B, 233A–236B, Reteaching: 241–242 Set G; 597A–600B, Reteaching: 604 Set D; 625A–628B, 629A–632B, Reteaching: 640 Set C
c. Use tiling to show in a concrete case that the area of a rectangle with whole-number side lengths a and $b + c$ is the sum of $a \times b$ and $a \times c$. Use area models to represent the distributive property in mathematical reasoning.	SE: 225–228, Reteaching: 241 Set E TE: 225A–228B, Reteaching: 241 Set E
d. Recognize area as additive. Find areas of rectilinear figures by decomposing them into non-overlapping rectangles and adding the areas of the non-overlapping parts, applying this technique to solve real world problems.	SE: 229–232, 233–236, Reteaching: 242 Sets F–G TE: 229A–232B, 233A–236B, Reteaching: 241–242 Sets F–G

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 3	enVision Mathematics, ©2020 Grade 3
8. Solve real world and mathematical problems involving perimeters of polygons, including finding the perimeter given the side lengths, finding an unknown side length, and exhibiting rectangles with the same perimeter and different areas or with the same area and different perimeters.	SE: 611–612, 613–616, 617–620, 621–624, 625–628, 629–632, 633–636, Reteaching: 639–640 Sets A–D TE: 611–612A, 613A–616B, 617A–620B, 621A–624B, 625A–628B, 629A–632B, 633A–636B, Reteaching: Sets A–D
9. Determine the value of a collection of money using dollar sign and decimal point appropriately. Understand that the digits to the right of the decimal represent parts of a whole dollar.	MDIS: A61, A62, A63, A64, A65, A66, A67, A68, A69, A70
Geometry 3.G	
A. Reason with shapes and their attributes.	
1. Understand that shapes in different categories (e.g., rhombuses, rectangles, and others) may share attributes (e.g., having four sides), and that the shared attributes can define a larger category (e.g., quadrilaterals). Recognize rhombuses, rectangles, and squares as examples of quadrilaterals, and draw examples of quadrilaterals that do not belong to any of these subcategories.	SE: 583, 584, 585–588, 589–592, 593–596, 597–600, Reteaching: 603–604 Sets A–D TE: 583–583A, 584–584C, 585A–588B, 589A–592B, 593A–596B, 597A–600B, Reteaching: 603–604 Sets A–D
2. Partition shapes into parts with equal areas. Express the area of each part as a unit fraction of the whole. For example, partition a shape into 4 parts with equal area, and describe the area of each part as $\frac{1}{4}$ of the area of a shape.	SE: 435–436, 437–440, 441–444, Reteaching: 471 Sets A, B; 584, 585–588, 589–592, Reteaching: 603 Sets A, B TE: 435–436A, 437A–440B, 441A–444B, Reteaching: 471–472 Sets A, B; 584–584C, 585A–588B, 589A–592B, Reteaching: 603 Sets A, B

South Dakota State Standards for Mathematics, Grade 4	enVision Mathematics, ©2020 Grade 4
Mathematical Practices	
1. Make sense of problems and persevere in solving them.	<p>enVision Mathematics provides numerous instructional opportunities to help students develop proficiency in the math practices. To get students off to a good start on all eight practices, use the Math Practices and Problem Solving Handbook pages at SavvasRealize.com, along with the Math Practices Posters, and supporting Math Practices Animations. Each lesson begins with Problem-Based Learning, an activity in which students interact with their peers and teachers to make sense of and decide on a workable solution for a situation. Another feature of each lesson is the set of problem-solving exercises in which students persevere by applying different skills and strategies to solve problems. Each Problem-Solving Lesson provides instruction and practice focused on a specific math practice.</p> <p>SE/TE: 13–16, 21–24, 49–52, 53–56, 65–68, 81–84, 105–108, 109–112, 153–156, 205–208, 233–236, 237–240, 245–248, 261–264, 293–296</p>
2. Reason abstractly and quantitatively.	<p>enVision Mathematics provides scaffolded instruction to help students develop both quantitative and abstract reasoning. In the Visual Learning Bridge, students can see how to represent a given situation numerically or algebraically. They will have opportunities later in the lesson to reason abstractly as they endeavor to represent situations symbolically. Reasonableness exercises remind students to compare their work to the original situation. Reasoning problems throughout the exercise sets focus students’ attention on the structure or meaning of an operation, for example, rather than merely the solution.</p> <p>SE/TE: 5–8, 9–12, 13–16, 17–20, 21–24, 41–44, 57–60, 61–64, 65–68, 81–84, 85–88, 105–108, 129–132, 133–136, 137–140</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 4	enVision Mathematics, ©2020 Grade 4
<p>3. Construct viable arguments and critique the reasoning of others.</p>	<p>Consistent with a focus on reasoning and sense-making is a focus on critical reasoning—argumentation and critique of arguments. In enVision Mathematics, the Problem-Based Learning affords students opportunities to share with classmates their thinking about problems, their solution methods, and their reasoning about the solutions. Many exercises found throughout the program specifically call for students to justify or explain their solutions. The ability to articulate a clear explanation for a process is a stepping stone to critical analysis and reasoning of both the student’s own processes and those of others.</p> <p>SE/TE: -12, 17-20, 21-24, 37-40, 41-44, 45-48, 49-52, 57-60, 61-64, 85-88, 101-104, 137-140, 149-152, 177-180, 181-184</p>
<p>4. Model with mathematics.</p>	<p>Students using enVision Mathematics are introduced to mathematical modeling in the early grades. They first use manipulatives and drawings and then equations to model addition and subtraction situations. The Visual Learning Bridge and Visual Learning Animation Plus often present real-world situations, and students are shown how these can be modeled mathematically. In later grades, students expand their modeling skills to include representations such as tables and graphs, as well as equations.</p> <p>SE/TE: 5-8, 13-16, 65-68, 89-92, 93-96, 109-112, 133-136, 141-144, 145-148, 153-156, 169-172, 177-180, 181-184, 185-188, 193-196</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 4	enVision Mathematics, ©2020 Grade 4
5. Use appropriate tools strategically.	<p>Students become fluent in the use of a wide assortment of tools ranging from physical objects, including manipulatives, rulers, protractors, and even pencil and paper, to digital tools, such as Online Math Tools and computers. As students become more familiar with the tools available to them, they are able to begin making decisions about which tools are most helpful in a particular situation.</p> <p>SE/TE: 17–20, 45–48, 53–56, 97–100, 133–136, 193–196, 245–248, 293–296, 297–300, 313–316, 317–320, 333–336, 337–340, 345–348, 353–356</p>
6. Attend to precision.	<p>Students are expected to use mathematical terms and symbols with precision. Key terms and concepts are highlighted in each lesson. The Problem-Based Learning activity provides repeated opportunities for students to use precise language to explain their solution paths while solving problems. In the Convince Me! feature, students revisit these key terms or concepts and provide explicit definitions or explanations.</p> <p>SE/TE: 21–24, 37–40, 97–100, 105–108, 153–156, 197–200, 245–248, 269–272, 305–308, 345–348, 393–396, 417–420, 449–452, 465–468, 481–484</p>
7. Look for and make use of structure.	<p>Students are encouraged to look for structure as they develop solution plans. As students mature in their mathematical thinking, they look for structure in numerical operations by focusing on place value and properties of operations. This focus on looking for and recognizing structure enables students to draw from patterns as they formalize their thinking about the structure of operations.</p> <p>SE/TE: 5–8, 37–40, 45–48, 53–56, 57–60, 61–64, 81–84, 89–92, 93–96, 97–100, 101–104, 129–132, 141–144, 145–148, 149–152</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 4	enVision Mathematics, ©2020 Grade 4
8. Look for and express regularity in repeated reasoning.	<p>Students are prompted to look for repetition in computations to help them develop shortcuts and become more efficient problem solvers. Students are reminded to think about problems they have encountered previously that may share features or processes. They are encouraged to draw on the solution plan developed for such problems, and, as their mathematical thinking matures, to look for and apply generalizations to similar situations. The Problem-Based Learning activities offer students opportunities to look for regularity in the way operations behave.</p> <p>SE/TE: 9–12, 49–52, 269–272, 309–312, 361–364, 365–368, 389–392, 421–424, 461–464, 481–484, 485–488, 489–492, 497–500, 521–524, 557–560</p>
Operations and Algebraic Thinking 4.OA	
A. Use the four operations with whole numbers to solve problems.	
1. Use and interpret multiplicative equations.	
a. Interpret a multiplication equation as a comparison, e.g., interpret $35 = 5 \times 7$ as a statement that 35 is 5 times as many as 7 and 7 times as many as 5. Represent verbal or written statements of multiplicative comparisons as multiplication equations. Example: Tom has 7 toy cars; Joe has 5 times as many. How many toy cars does Joe have? Answer: 35, because $7 \times 5 = 35$ or $5 \times 7 = 35$.	<p>SE: 223–224, 225–228, 229–232, Reteaching: 251 Set A</p> <p>TE: 223–224A, 225A–228B, 229A–232B, Reteaching: 251 Set A</p>
b. Know from memory (quick effortless recall of facts) all products of two one-digit numbers.	<p>TE: 32B–32C</p> <p>MDIS: B46, B47, B48, B49, B50, B51, B52, B53</p>
2. Multiply or divide to solve word problems involving multiplicative comparison, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem, and distinguish multiplicative comparison from additive comparison.	<p>SE: 85–88, 223–224, 225–228, 229–232, 233–236, 237–240, 241–244, 245–248, Reteaching: 251–252 Sets A, B, D; 260</p> <p>TE: 85A–88B, 223–224A, 225A–228B, 229A–232B, 233A–236B, 237A–240B, 241A–244B, 245A–248B, Reteaching: 251–252 Sets A, B, D; 260–260C</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 4	enVision Mathematics, ©2020 Grade 4
3. Solve multistep word problems posed with whole numbers and having whole-number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.	<p>SE: 41–44, 45–48, 49–52, 53–56, 57–60, 61–64, 65–68, Reteaching: 71–72 Sets B, F; 80, 85–88, 97–100, 105–108, 109–112, Reteaching: 115–118 Sets B, G, H; 137–140, 141–144, 149–152, 153–156, Reteaching: 159–160 Set C; 168, 173–176, 177–180, 181–184, 197–120, 205–208, Reteaching: 211–214 Sets B, H; 233–236, 237–240, 241–244, 245–248, Reteaching: 251 Set B; 260, 481–484, 485–488, 489–492, 493–496, 497–500, 501–504, 505–508, 529–532, 569–572</p> <p>TE: 41A–44B, 45A–48B, 49A–52B, 53A–56B, 57A–60B, 61A–64B, 65A–68B, Reteaching: 71–72 Sets B, F; 80–80C, 85A–88B, 97A–100B, 105A–108B, 109A–112B, Reteaching: 115–118 Sets B, G, H; 137A–140B, 141A–144B, 149A–152B, 153A–156B, Reteaching: 159–160 Set C; 168–168C, 173A–176B, 177A–180B, 181A–184B, 197A–120B, 205A–208B, Reteaching: 211–214 Sets B, H; 233A–236B, 237A–240B, 241A–244B, 245A–248B, Reteaching: 251 Set B; 260–260C, 481A–484B, 485A–488B, 489A–492B, 493A–496B, 497A–500B, 501A–504B, 505A–508B, 529A–532B, 569A–572B</p>
B. Gain familiarity with factors and multiples.	
4. Using whole number in the range 1–100.	
a. Find all factor pairs for a given whole number.	<p>SE: 260, 261–264, 265–268, 269–272, 273–276, 277–280, Reteaching: 283–284 Sets A–E; 305–308, 521–524, 525–528</p> <p>TE: 260–260C, 261A–264B, 265A–268B, 269A–272B, 273A–276B, 277A–280B, Reteaching: 283–284 Sets A–E; 305A–308B, 521A–524B, 525A–528B</p>
b. Recognize that a whole number is a multiple of each of its factors.	<p>SE: 277–280, Reteaching: 284 Set E; 521–524, 525–528</p> <p>TE: 277A–280B, Reteaching: 284 Set E; 521A–524B, 525A–528B</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 4	enVision Mathematics, ©2020 Grade 4
c. Determine whether a given whole number is a multiple of each of a given one-digit number.	SE: 277–280, Reteaching: 284 Set E; 305–308, 521–524, 525–528 TE: 277A–280B, Reteaching: 284 Set E; 305A–308B, 521A–524B, 525A–528B
d. Determine whether a given whole number is prime or composite.	SE: 259, 273–276, Reteaching: 274 Set D TE: 259–259A, 273A–276B, Reteaching: 274 Set D
C. Generate and analyze patterns.	
5. Generate a number or shape pattern that follows a given rule. Identify apparent features of the pattern that were not explicit in the rule itself. For example, given the rule "Add 3" and the starting number is 1, generate terms in the resulting sequence and observe that the terms appear to alternate between odd and even numbers. Explain informally why the numbers will continue to alternate in this way.	SE: 519–520, 521–524, 525–528, 529–532, 533–536, Reteaching: 539–540 Sets A–D; 589–592 TE: 519–520A, 521A–524B, 525A–528B, 529A–532B, 533A–536B, Reteaching: 539–540 Sets A–D; 589A–592B
Number and Operation in Base Ten 4.NBT	
A. Generalize place value understanding for multi-digit whole numbers.	
1. Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right. For example, recognize that the 7 in 700 is 10 times greater than the 7 in 70 because $700 \div 70 = 10$ and $70 \times 10 = 700$.	SE: 4, 9–12, 21–24, Reteaching: 27 Set B TE: 4–4C, 9A–12B, 21A–24B, Reteaching: 27 Set B
2. Read and write multi-digit whole numbers.	
a. Read and write multi-digit whole numbers using base-ten numerals (standard form), number names (word form), and expanded form.	SE: 3, 4, 5–8, 13–16, 21–24, Reteaching: 27 Sets A–C; 35–36 TE: 3–3A, 4–4C, 5A–8B, 13A–16B, 21A–24B, Reteaching: 27 Sets A–C; 35–36A
b. Compare two multi-digit numbers based on values of the digits in each place, using $<$, $>$, and $=$ symbols to record the results of comparisons.	SE: 4, 13–16, 21–24, Reteaching: 27 Set C TE: 4–4C, 13A–16B, 21A–24B, Reteaching: 27 Set C

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 4	enVision Mathematics, ©2020 Grade 4
3. Use place value understanding to round multi-digit whole numbers to any place.	SE: 4, 17–20, 21–24, Reteaching: 28 Sets D, E TE: 4–4C, 17A–20B, 21A–24B, Reteaching: 28 Sets D, E
B. Use place value understanding and properties of operations to perform multi-digit arithmetic.	
4. Fluently add and subtract multi-digit whole numbers using an algorithm including, but not limited to, the standard algorithm.	SE: 35–36, 37–40, 41–44, 45–48, 49–52, 53–56, 57–60, 61–64, 65–68, Reteaching: 71–72 Sets A–E; 80, 233–236, 237–240, 241–244, 521–524, 565–568 TE: 35–36A, 37A–40B, 41A–44B, 45A–48B, 49A–52B, 53A–56B, 57A–60B, 61A–64B, 65A–68B, Reteaching: 71–72 Sets A–E; 80–80C, 233A–236B, 237A–240B, 241A–244B, 521A–524B, 565A–568B
5. Multiply a whole number of up to four digits by a one-digit whole number, and multiply two two-digit numbers, using strategies based on place value and the properties of operations. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.	SE: 79, 80, 81–84, 89–92, 93–96, 97–100, 101–104, 105–108, 109–112, Reteaching: 115–118 Sets A–G; 127–128, 129–132, 133–136, 137–140, 141–144, 145–148, 149–152, 153–156, Reteaching: 159–160 Sets A–F; 168, 173–176, 177–180, 223–224, 225–228, 229–232, 233–236, 237–240, 241–244, 245–248, Reteaching: 251–252 Sets A, B, D; 261–264, 265–268, 269–272, 273–276, 277–280, Reteaching: 283–284 Sets A–E; 301–304, 313–316, 525–528 TE: 79–79A, 80–80C, 81A–84B, 89A–92B, 93A–96B, 97A–100B, 101A–104B, 105A–108B, 109A–112B, Reteaching: 115–118 Sets A–G; 127–128A, 129A–132B, 133A–136B, 137A–140B, 141A–144B, 145A–148B, 149A–152B, 153A–156B, Reteaching: 159–160 Sets A–F; 168–168C, 173A–176B, 177A–180B, 223–224A, 225A–228B, 229A–232B, 233A–236B, 237A–240B, 241A–244B, 245A–248B, Reteaching: 251–252 Sets A, B, D; 261A–264B, 265A–268B, 269A–272B, 273A–276B, 277A–280B, Reteaching: 283–284 Sets A–E; 301A–304B, 313A–316B, 525A–528B

to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 4	enVision Mathematics, ©2020 Grade 4
6. Find whole-number quotients and remainders with up to four-digit dividends and one-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.	<p>SE: 167, 169–172, 173–176, 177–180, 181–184, 185–188, 189–192, 193–196, 197–200, 201–204, 205–208, Reteaching: 211–214 Sets A, C, H; 229–232, 233–236, 237–240, 241–244, 245–248, Reteaching: 251–252 Sets A, B, D; 260, 305–308, 525–528, 529–532</p> <p>TE: 167–167A, 168–168C, 169A–172B, 173A–176B, 177A–180B, 181A–184B, 185A–188B, 189A–192B, 193A–196B, 197A–200B, 201A–204B, 205A–208B, Reteaching: 211–214 Sets A, C, H; 229A–232B, 233A–236B, 237A–240B, 241A–244B, 245A–248B, Reteaching: 251–252 Sets A, B, D; 260–260C, 305A–308B, 525A–528B, 529A–532B</p>
Number and Operations—Fractions 4.NF	
A. Extend understanding of fraction equivalence and ordering.	
1. Explain why a fraction a/b is equivalent to a fraction $(n \times a)/(n \times b)$ by using visual fraction models, with attention to how the number and size of the parts differ even though the two fractions themselves are the same size. Use this principle to recognize and generate equivalent fractions.	<p>SE: 291–292, 293–296, 297–300, 301–304, 305–308, 313–316, 317–320, Reteaching: 323–324 Sets A, B; 421–424, 553–556</p> <p>TE: 291–292, 293A–296B, 297A–300B, 301A–304B, 305A–308B, 313A–316B, 317A–320B, Reteaching: 323–324 Sets A, B; 421A–424B, 553A–556B</p>
2. Compare two fractions with different numerators and different denominators, by creating common denominators or numerators, or by comparing to a benchmark fraction such as $1/2$. Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with symbols $<$, $>$, $=$, and justify the conclusions.	<p>SE: 259, 309–312, 313–316, 317–320, Reteaching: 324 Sets C; D, 332, 415, 416, 421–424</p> <p>TE: 259–259A, 309A–312B, 313A–316B, 317A–320B, Reteaching: 324 Sets C, D; 332–332A, 415–415A, 416–416C, 421A–424B</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 4	enVision Mathematics, ©2020 Grade 4
B. Build fractions from unit fractions by applying and extending previous understandings of operations on whole numbers.	
3. Understand a fraction a/b with $a > 1$ as a sum of fractions $1/b$. For example, $4/5 = 1/5 + 1/5 + 1/5 + 1/5$	<p>SE: 331, 332, 333–336, 341–344, 345–348, 349–352, 353–356, 369–372, Reteaching: 375–376 Sets A, C, D</p> <p>TE: 331–331A, 332–332C, 333A–336B, 341A–344B, 345A–348B, 349A–352B, 353A–356B, 369A–372B, Reteaching: 375–376 Sets A, C, D</p>
a. Add and subtract of fractions e.g., joining and separating parts referring to the same whole.	<p>SE: 331, 332, 333–336, 341–344, 345–348, 349–352, 353–356, 369–372, Reteaching: 375–376 Sets A, C, D</p> <p>TE: 331–331A, 332–332C, 333A–336B, 341A–344B, 345A–348B, 349A–352B, 353A–356B, 369A–372B, Reteaching: 375–376 Sets A, C, D</p>
b. Decompose a fraction into a sum of fractions with like denominators in more than one way, recording each decomposition by an equation. Justify decompositions, e.g., by using a visual fraction model.	<p>SE: 332, 337–340, Reteaching: 375 Sets A, B; 416, 553–556</p> <p>TE: 332–332A, 337A–340B, Reteaching: 375 Sets A, B; 416–416C, 553A–556B</p>
c. Add and subtract mixed numbers with like denominators, e.g., by replacing each mixed number with an equivalent fraction, and/or by using properties of operations and the relationship between addition and subtraction.	<p>SE: 331, 332, 57–360, 361–364, 365–368, 369–372, Reteaching: 376 Set E; Reteaching: 407 Set C; 429–432, 569–572</p> <p>TE: 331–331A, 332–332C, 357A–360B, 361A–364B, 365A–368B, 369A–372B, 376, Reteaching: 376 Set E; Reteaching: 407 Set C; 429A–432B, 569A–572B</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 4	enVision Mathematics, ©2020 Grade 4
d. Solve word problems involving addition and subtraction of fractions referring to the same whole and having like denominators, e.g., by using visual fraction models and equations to represent the problem.	<p>SE: 331, 332, 33–336, 341–344, 345–348, 349–352, 353–356, 357–360, 361–364, 365–368, 369–372, Reteaching: 376 Set F; 397–400, 401–404, 417–420, 421–424, 425–428, 429–432, Reteaching: 435–436 Sets A–D; 481–484, 485–488, 489–492</p> <p>TE: 331–331A, 332–332C, 333A–336B, 341A–344B, 345A–348B, 349A–352B, 353A–356B, 357A–360B, 361A–364B, 365A–368B, 369A–372B, Reteaching: 376 Set F; 397A–400B, 401A–404B, 417A–420B, 421A–424B, 425A–428B, 429A–432B, Reteaching: 435–436 Sets A–D; 481A–484B, 485A–488B, 489A–492B</p>
4. Apply and extend previous understandings of multiplication to multiply a fraction by a whole number.	<p>SE: 383–384, 385–388, 89–392, 393–396, Reteaching: 407 Sets A, B</p> <p>TE: 383–384A, 385A–388B, 389A–392B, 393A–396B, Reteaching: 407 Sets A, B</p>
a. Understand a fraction a/b as a multiple of $1/b$. For example, use a visual fraction model to represent $5/4$ as the product $5 \times (1/4)$, recording the conclusion by the equation $5/4 = 5 \times (1/4)$.	<p>SE: 383–384, 385–388, 89–392, 393–396, Reteaching: 407 Sets A, B</p> <p>TE: 383–384A, 385A–388B, 389A–392B, 393A–396B, Reteaching: 407 Sets A, B</p>
b. Understand a multiple of a/b as a multiple of $1/b$, and use this understanding to multiply a fraction by a whole number. For example, use a visual fraction model to express $3 \times (2/5)$ as $6 \times (1/5)$, recognizing this product as $6/5$. (In general, $n \times (a/b) = (n \times a)/b = (n \times a) \times 1/b$.)	<p>SE: 389–392, 393–396, Reteaching: 407 Sets B, C</p> <p>TE: 389A–392B, 393A–396B, Reteaching: 407 Sets B, C</p>
c. Solve word problems involving multiplication of a fraction by a whole number, e.g., by using visual fraction models and equations to represent the problem. For example, if each person at a party will eat $3/8$ of a pound of roast beef, and there will be 5 people at the party, how many pounds of roast beef will be needed? Between what two whole numbers does your answer lie?	<p>SE: 383–384, 389–392, 393–396, 397–400, 401–404, Reteaching: 407–408 Sets C, E; 481–484, 485–488, 489–492, 501–504, 505–508</p> <p>TE: 383–384A, 389A–392B, 393A–396B, 397A–400B, 401A–404B, Reteaching: 407–408 Sets C, E; 481A–484B, 485A–488B, 489A–492B, 501A–504B, 505A–508B</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 4	enVision Mathematics, ©2020 Grade 4
C. Understand decimal notation for fractions, and compare decimal fractions.	
5. Express a fraction with denominator 10 as an equivalent fraction with denominator 100, and use this technique to add two fractions with respective denominators 10 and 100. For example, express $\frac{3}{10}$ as $\frac{30}{100}$, and add $\frac{3}{10} + \frac{4}{100} = \frac{34}{100}$.	SE: 443–444, 457–460, Reteaching: 472 Set D TE: , 443–444A, 457A–460B, Reteaching: 472 Set D
6. Read and write decimal notation for fractions with denominators 10 or 100. Locate these decimals on a number line.	SE: 443–444, 445–448, 449–452, Reteaching: 471 Sets A, B TE: 443A–444B, 445A–448B, 449A–452B, Reteaching: 471 Sets A, B
7. Compare two decimals to hundredths by reasoning about their size. Recognize that comparisons are valid only when the two decimals refer to the same whole. Record the results of comparisons with the symbols $>$, $<$, or $=$, and justify the conclusions.	SE: , 443–444, 453–456, 65–468, Reteaching: 471 Set C; 493–496 TE: 443–444A, 453A–456B, 465A–468B, Reteaching: 471 Set C; 493A–496B
Measurement and Data 4.MD	
A. Solving problems involving measurement and conversion of measurements from a larger unit to a smaller unit.	
1. Know relative sizes of measurement units within one system of units including km, m, cm; kg, g; lb, oz.; l, ml; hr, min, sec. Within a single system of measurement, express measurements in a larger unit in terms of a smaller unit. Record measurement equivalents in a two column table. For example, know that 1ft is 12 times as long as 1 in. Express the length of a 4 ft snake as 48 in. Generate a conversion table for feet and inches listing the number pairs (1, 12), (2, 24), (3, 36),...	SE: 397–400, 479, 480, 481–484, 485–488, 489–492, 493–496, 497–500, Reteaching: 511 Sets A, B TE: 397A–400B, 479–479A, 480–480C, 481A–484B, 485A–488B, 489A–492B, 493A–496B, 497A–500B, Reteaching: 511 Sets A, B

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 4	enVision Mathematics, ©2020 Grade 4
2. Use the four operations to solve word problems involving distances, intervals of time, liquid volumes, masses of objects, and money, including problems involving fractions or decimals, and problems that require expressing measurements given in a larger unit in terms of a smaller unit. Represent measurement quantities using diagrams such as number line diagrams that feature a measurement scale.	<p>SE: 383–384, 397–400, 401–404, Reteaching: 408 Set D; 449–452, 453–456, 461–464, 465–468, Reteaching: 472 Set E; 480, 481–484, 485–488, 489–492, 493–496, 497–500, 501–504, 505–508, Reteaching: 511 Set A</p> <p>TE: 383–384A, 397A–400B, 401A–404B, Reteaching: 408 Set D; 449A–452B, 453A–456B, 461A–464B, 465A–468B, Reteaching: 472 Set E; 480–480C, 481A–484B, 485A–488B, 489A–492B, 493A–496B, 497A–500B, 501A–504B, 505A–508B, Reteaching: 511 Set A</p>
3. Apply the area and perimeter formulas for rectangles in real world and mathematical problems.	<p>SE: 153–156, 168, 479, 501–504, 505–508, Reteaching: 512 Sets C; D605–608</p> <p>TE: 153A–156B, 168–168C, 479–479A, 501A–504B, 505A–508B, Reteaching: 512 Sets C; D605A–608B</p>
B. Represent and interpret data.	
4. Make a line plot to display a data set of measurements in fractions of a unit ($\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$). Solve problems involving addition and subtraction of fractions by using information presented in line plots.	<p>SE: 415, 416, 417–420, 421–424, 425–428, 429–432, Reteaching: 435–436 Sets A–D</p> <p>TE: 415, 416, 417–420, 421–424, 425–428, 429–432, Reteaching: 435–436 Sets A–D</p>
C. Geometric measurement: understand concepts of angle and measure angles.	
5. Recognize angles as geometric shapes that are formed wherever two rays share a common endpoint, and understand concepts of angle measurement.	<p>SE: 547, 549–552, 553–556, 557–560, 569–572, Reteaching: 575 Set B; 589–592</p> <p>TE: 547–547A, 549A–552B, 553A–556B, 557A–560B, 569A–572B, Reteaching: 575 Set B; 589A–592B</p>
a. An angle is measured with reference to a circle with its center at the common endpoint of the rays, by considering the fraction of the circular arc between the points where the two rays intersect the circle. An angle that turns through $\frac{1}{360}$ of a circle is called a “one-degree angle,” and can be used to measure angles.	<p>SE: 547, 549–552, 553–556, 557–560, 569–572, Reteaching: 575 Set B; 589–592</p> <p>TE: 547, 549A–552B, 553A–556B, 557A–560B, 569A–572B, Reteaching: 575 Set B; 589A–592B</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 4	enVision Mathematics, ©2020 Grade 4
b. An angle that turns through n one-degree angles is said to have an angle measure of n degrees.	SE: 547, 557–560, 561–564, 569–572, Reteaching: 576 Set D; 589–592 TE: 547, 557A–560B, 561A–564B, 569A–572B, Reteaching: 576 Set D; 589A–592B
6. Measure angles in whole-number degrees using a protractor. Sketch angles of specified measure.	SE: 547, 548, 561–564, 569–572, Reteaching: 576 Sets D, F TE: 547–547A, 548–548C, 561A–564B, 569A–572B, Reteaching: 576 Sets D, F
7. Recognize angle measure as additive. When an angle is decomposed into non-overlapping parts, the angle measure of the whole is the sum of the angle measures of the parts. Solve addition and subtraction problems to find unknown angles on a diagram in real world and mathematical problems, e.g., by using an equation with a symbol for the unknown angle measure.	SE: 565–568, 569–572, Reteaching: 576 Set E TE: 565A–568B, 569A–572B, Reteaching: 576 Set E
Geometry 4.G	
A. Draw and identify lines and angles, and classify shapes by properties of their lines and angles.	
1. Draw points, lines, line segments, rays, angles (right, acute, obtuse), and perpendicular and parallel lines. Identify these in two-dimensional figures.	SE: 547, 548, 549–552, Reteaching: 575 Set A; 583–584, 585–588, 589–592, 593–596, 605–608, Reteaching: 611 Set A TE: 547–547A, 548–548C, 549A–552B, Reteaching: 575 Set A; 583–584A, 585A–588B, 589A–592B, 593A–596B, 605A–608B, Reteaching: 611 Set A
2. Classify two-dimensional figures based on the presence or absence of parallel or perpendicular lines, or the presence or absence of angles of a specified size. Recognize, and identify categories of right, acute, and obtuse triangles.	SE: 583–584, 589–592, 593–596, 605–608, Reteaching: 611–612 Sets B, C, F TE: 583–584A, 589A–592B, 593A–596B, 605A–608B, Reteaching: 611–612 Sets B, C, F
3. Recognize and draw lines of symmetry for two-dimensional figures.	SE: 583–584, 597–600, 601–604, Reteaching: 612 Sets D, E TE: 583–584A, 597A–600B, 601A–604B, Reteaching: 612 Sets D,

South Dakota State Standards for Mathematics, Grade 5	enVision Mathematics, ©2020 Grade 5
Mathematical Practices	
1. Make sense of problems and persevere in solving them.	<p>enVision Mathematics provides numerous instructional opportunities to help students develop proficiency in the math practices. To get students off to a good start on all eight practices, use the Math Practices and Problem Solving Handbook pages at SavvasRealize.com, along with the Math Practices Posters, and supporting Math Practices Animations. Each lesson begins with Problem-Based Learning, an activity in which students interact with their peers and teachers to make sense of and decide on a workable solution for a situation. Another feature of each lesson is the set of problem-solving exercises in which students persevere by applying different skills and strategies to solve problems. Each Problem-Solving Lesson provides instruction and practice focused on a specific math practice.</p> <p>SE/TE: 25–28, 53–56, 61–64, 65–68, 89–92, 93–96, 97–100, 101–104, 109–112, 113–116, 137–140, 149–152, 153–156, 161–164, 185–188</p>
2. Reason abstractly and quantitatively.	<p>enVision Mathematics provides scaffolded instruction to help students develop both quantitative and abstract reasoning. In the Visual Learning Bridge, students can see how to represent a given situation numerically or algebraically. They will have opportunities later in the lesson to reason abstractly as they endeavor to represent situations symbolically. Reasonableness exercises remind students to compare their work to the original situation. Reasoning problems throughout the exercise sets focus students' attention on the structure or meaning of an operation, for example, rather than merely the solution.</p> <p>SE/TE: 13–16, 45–48, 49–52, 85–88, 105–108, 113–116, 133–136, 157–160, 197–200, 201–204, 205–208, 209–212, 229–232, 233–236, 237–240</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 5	enVision Mathematics, ©2020 Grade 5
<p>3. Construct viable arguments and critique the reasoning of others.</p>	<p>Consistent with a focus on reasoning and sense-making is a focus on critical reasoning—argumentation and critique of arguments. In enVision Mathematics, the Problem-Based Learning affords students opportunities to share with classmates their thinking about problems, their solution methods, and their reasoning about the solutions. Many exercises found throughout the program specifically call for students to justify or explain their solutions. The ability to articulate a clear explanation for a process is a stepping stone to critical analysis and reasoning of both the student’s own processes and those of others.</p> <p>SE/TE: 9–12, 13–16, 21–24, 25–28, 45–48, 49–52, 53–56, 57–60, 65–68, 81–84, 85–88, 89–92, 93–96, 97–100, 109–112</p>
<p>4. Model with mathematics.</p>	<p>Students using enVision Mathematics are introduced to mathematical modeling in the early grades. They first use manipulatives and drawings and then equations to model addition and subtraction situations. The Visual Learning Bridge and Visual Learning Animation Plus often present real-world situations, and students are shown how these can be modeled mathematically. In later grades, students expand their modeling skills to include representations such as tables and graphs, as well as equations.</p> <p>SE/TE: 5–8, 65–68, 89–92, 93–96, 101–104, 105–108, 109–112, 145–148, 161–164, 185–188, 193–196, 197–200, 241–244, 249–252, 277–280</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 5	enVision Mathematics, ©2020 Grade 5
5. Use appropriate tools strategically.	<p>Students become fluent in the use of a wide assortment of tools ranging from physical objects, including manipulatives, rulers, protractors, and even pencil and paper, to digital tools, such as Online Math Tools and computers. As students become more familiar with the tools available to them, they are able to begin making decisions about which tools are most helpful in a particular situation.</p> <p>SE/TE: 5–8, 61–64, 81–84, 149–152, 189–192, 197–200, 237–240, 273–276, 293–296, 301–304, 353–356, 397–400, 401–404, 457–460, 473–476</p>
6. Attend to precision.	<p>Students are expected to use mathematical terms and symbols with precision. Key terms and concepts are highlighted in each lesson. The Problem-Based Learning activity provides repeated opportunities for students to use precise language to explain their solution paths while solving problems. In the Convince Me! feature, students revisit these key terms or concepts and provide explicit definitions or explanations.</p> <p>SE/TE: 17–20, 21–24, 29–32, 105–108, 113–116, 133–136, 145–148, 161–164, 181–184, 249–252, 305–308, 309–312, 341–344, 349–352, 361–364</p>
7. Look for and make use of structure.	<p>Students are encouraged to look for structure as they develop solution plans. As students mature in their mathematical thinking, they look for structure in numerical operations by focusing on place value and properties of operations. This focus on looking for and recognizing structure enables students to draw from patterns as they formalize their thinking about the structure of operations.</p> <p>SE/TE: 5–8, 9–12, 13–16, 17–20, 25–28, 29–32, 61–64, 101–104, 129–132, 153–156, 181–184, 201–204, 229–232, 245–248, 297–300</p>

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 5	enVision Mathematics, ©2020 Grade 5
8. Look for and express regularity in repeated reasoning.	<p>Students are prompted to look for repetition in computations to help them develop shortcuts and become more efficient problem solvers. Students are reminded to think about problems they have encountered previously that may share features or processes. They are encouraged to draw on the solution plan developed for such problems, and, as their mathematical thinking matures, to look for and apply generalizations to similar situations. The Problem-Based Learning activities offer students opportunities to look for regularity in the way operations behave.</p> <p>SE/TE: 17–20, 29–32, 57–60, 133–136, 141–144, 145–148, 157–160, 281–284, 289–292, 301–304, 357–360, 413–416, 433–436, 489–492, 493–496</p>
Operations and Algebraic Thinking 5.OA	
A. Write and interpret numerical expressions.	
1. Use and explain parentheses, in numerical expressions, and evaluate expressions with these symbols.	<p>SE: 535, 537–540, 541–544, 549–552, Reteaching: 555–556 Sets A, B, D</p> <p>TE: 535–535A, 537A–540B, 541A–544B, 549A–552B, Reteaching: 555–556 Sets A, B, D</p>
2. Write simple expressions that record calculations with numbers to represent real world problems, and interpret numerical expressions without evaluating them.(For example, express the calculation "add 8 and 7, then multiply by 2" as $2 \times (8 + 7)$. Recognize that $3 \times (18932 + 921)$ is three times as large as $18932 + 921$, without having to calculate the indicated sum or product.)	<p>SE: 535, 536, 541–544, 545–548, Reteaching: 556 Sets C, D</p> <p>TE: 535–535A, 536–536C, 541A–544B, 545A–548B, Reteaching: 556 Sets C, D</p>

to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 5	enVision Mathematics, ©2020 Grade 5
B. Analyze patterns and relationships.	
3. Generate two numerical patterns using two given rules. Form ordered pairs consisting of corresponding terms from the two patterns, and graph the ordered pairs on a coordinate plane. Identify the relationship between the two patterns. For example, given the rule "Add 3" and the starting number 0, and given the rule "Add 6" and the starting number 0, generate terms in the resulting sequences, and observe that the terms in one sequence are twice the corresponding terms in the other sequence. Explain informally why this is so.	SE: 591, 592, 593–596, 597–600, 601–604, 605–608, Reteaching: 611–612 Sets A–D TE: 591, 592, 593A–596B, 597A–600B, 601A–604B, 605A–608B, Reteaching: 611–612 Sets A–D
Number and Operation in Base Ten 5.NBT	
A. Understand the place value system	
1. Recognize that in a multi-digit number, a digit in one place represents 10 times as much as it represents in the place to its right and 1/10 of what it represents in the place to its left.	SE: 4, 9–12, 13–16, Reteaching: 35 Sets B, C, 80, 81–84, Reteaching: 119 Set A TE: 4–4C, 9A–12B, 13A–16B, Reteaching: 35 Sets B, C, 80–80C, 81A–84B, Reteaching: 119 Set A
2. Explain and apply patterns in the number of zeros of the product when multiplying a number by powers of 10. Explain and apply patterns in the placement of the decimal point with respect to the values of the digits in the product or the quotient, when a decimal is multiplied or divided by a power of 10. Use whole-number exponents to denote powers of 10.	SE: 3, 5–8, Reteaching: 35 Set A; 80, 81–84, Reteaching: 119 Set A; 127–128, 129–132, Reteaching: 167 Set A; 229–232, Reteaching: 255 Set A; 267, 268, 501–504, 505–508, 509–512, Reteaching: 527–528 Sets D–F TE: 3–3A, 5A–8B, Reteaching: 35 Set A; 80–80C, 81A–84B, Reteaching: 119 Set A; 127–128A, 129A–132B, Reteaching: 167–168 Set A; 229A–232B, Reteaching: 255–256 Set A; 267–267A, 268–268C, 501A–504B, 505A–508B, 509A–512B, Reteaching: 527–528 Sets D–F
3. Read, write, and compare decimals to thousandths.	SE: 3, 4, 13–16, 17–20, 29–32, Reteaching: 35–36 Sets C, F TE: 3–3A, 4–4C, 13A–16B, 17A–20B, 29A–32B, Reteaching: 35–36 Sets C, F

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 5	enVision Mathematics, ©2020 Grade 5
a. Read and write decimals to thousandths using base-ten numerals, number names, and expanded form, e.g., $347.392 = 3 \times 100 + 4 \times 10 + 7 \times 1 + 3 \times (1/10) + 9 \times (1/100) + 2 \times (1/1000)$.	SE: 3, 4, 13–16, 17–20, 29–32, Reteaching: 35–36 Sets C, F TE: 3, 4, 13A–16B, 17A–20B, 29A–32B, Reteaching: 35–36 Sets C, F
b. Compare two decimals to thousandths based on meanings of the digits in each place, using $>$, $=$, and $<$ symbols to record the results of comparisons.	SE: 4, 21–24, 29–32, Reteaching: 36 Sets D, F TE: 4–4C, 21A–24B, 29A–32B, Reteaching: 36 Sets D, F
4. Use place value understanding to round decimals to any place.	SE: 4, 25–28, Reteaching: 36 Set E; 45–48, 49–52, Reteaching: 71 Set B TE: 4–4C, 25A–28B, Reteaching: 36 Set E; 45A–48B, 49A–52B, Reteaching: 71 Set B
B. Perform operations with multi-digit whole number and with decimals to hundredths.	
5. Fluently multiply multi-digit whole numbers using an algorithm, including but not limited to the standard algorithm.	SE: 80, 85–88, 89–92, 93–96, 97–100, 101–104, 105–108, 109–112, 113–116, Reteaching: 119–120 Sets B–G; 487–488, 489–492, 493–496, 497–500, 513–516, 517–520, 521–524, Reteaching: 527–528 Sets A, B, C, G, H TE: 80–80C, 85A–88B, 89A–92B, 93A–96B, 97A–100B, 101A–104B, 105A–108B, 109A–112B, 113A–116B, Reteaching: 119–120 Sets B–G; 487–488A, 489A–492B, 493A–496B, 497A–500B, 513A–516B, 517A–520B, 521A–524B, Reteaching: 527–528 Sets A, B, C, G, H
6. Find whole-number quotients of whole numbers with up to four-digit dividends and two-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Explain the calculation by using equations, rectangular arrays, illustrations, area models, or other representations based on place value.	SE: 179, 181–184, 185–188, 189–192, 193–196, 197–200, 201–204, 205–208, 209–212, Reteaching: 215–218 Sets A–H; 487–488, 489–492, 493–496, 497–500, 513–516 TE: 179–179A, 181A–184B, 185A–188B, 189A–192B, 193A–196B, 197A–200B, 201A–204B, 205A–208B, 209A–212B, Reteaching: 215–218 Sets A–H; 487–488A, 489A–492B, 493A–496B, 497A–500B, 513A–516B

South Dakota State Standards for Mathematics, Grade 5	enVision Mathematics, ©2020 Grade 5
Number and Operations—Fractions 5.NF	
A. Use equivalent fractions as a strategy to add and subtract fractions.	
1. Add and subtract fractions with unlike denominators (including mixed numbers) by replacing given fractions with equivalent fractions in such a way as to produce an equivalent sum or difference with a like denominator. It is not necessary at this grade level to simplify the sum or difference. For example, $\frac{2}{3} + \frac{5}{4} = \frac{8}{12} + \frac{15}{12} = \frac{23}{12}$. (In general, $\frac{a}{b} + \frac{c}{d} = \frac{ad + bc}{bd}$.)	SE: 268, 269–272, 273–276, 277–280, 281–284, 285–288, 289–292, 293–296, 297–300, 301–304, 305–308, 309–312, Reteaching: 319–322 Sets A–G TE: 268–268C, 269A–272B, 273A–276B, 277A–280B, 281A–284B, 285A–288B, 289A–292B, 293A–296B, 297A–300B, 301A–304B, 305A–308B, 309A–312B, Reteaching: 319–322 Sets A–G
2. Solve word problems involving addition and subtraction of fractions.	
a. Solve word problems involving addition and subtraction of fractions referring to the same whole, including cases of unlike denominators, e.g., by using visual fraction models or equations to represent the problem.	SE: 268, 269–272, 273–276, 277–280, 281–284, 285–288, 289–292, 293–296, 297–300, 301–304, 305–308, 309–312, 313–316, Reteaching: 19–322 Sets A–H; 427–428, 429–432, 433–436, 437–440, 441–444, Reteaching: 448 Sets C, D TE: 268–268C, 269A–272B, 273A–276B, 277A–280B, 281A–284B, 285A–288B, 289A–292B, 293A–296B, 297A–300B, 301A–304B, 305A–308B, 309A–312B, Reteaching: 319–322 Sets A–H; 427–428A, 429A–432B, 433A–436B, 437A–440B, 441A–444B, Reteaching: 448 Sets C, D
b. Use benchmark fractions and number sense of fractions to estimate mentally and assess the reasonableness of answers. For example, recognize an incorrect result $\frac{2}{5} + \frac{1}{2} = \frac{3}{7}$, by observing that $\frac{3}{7} < \frac{1}{2}$.	SE: 268, 269–272, 289–292, Reteaching: 319–320 Sets A, D; 437–440 TE: 268–268C, 269A–272B, 289A–292B, Reteaching: 319–320 Sets A, D; 429A–432B, 433A–436B

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 5	enVision Mathematics, ©2020 Grade 5
B. Apply and extend previous understandings of multiplication and division to multiply and divide fractions.	
3. Interpret a fraction as division of the numerator by the denominator ($a/b = a \div b$). Solve word problems involving division of whole numbers leading to answers in the form of fractions or mixed numbers, e.g., by using visual fraction models or equations to represent the problem. For example, interpret $3/4$ as the result of dividing 3 by 4, noting that $3/4$ multiplied by 4 equals 3, and that when 3 wholes are shared equally among 4 people each person has a share of size $3/4$. If 9 people want to share a 50-pound sack of rice equally by weight, how many pounds of rice should each person get? Between what two whole numbers does your answer lie?	SE: 384, 385–388, 389–392, Reteaching: 419 Set A TE: 384–384C, 385A–388B, 389A–392B, Reteaching: 419 Set A
4. Apply and extend previous understandings of multiplication to multiply a fraction or whole number by a fraction.	SE: 331–332, 333–336, 337–340, 341–344, 345–348, 349–352, Reteaching: 371–372 Sets A–D TE: 331–332A, 333A–336B, 337A–340B, 341A–344B, 345A–348B, 349A–352B, Reteaching: 371–372 Sets A–D
a. Interpret the product $(a/b) \times q$ as a parts of a partition of q into b equal parts; equivalently, as the result of a sequence of operations $a \times q \div b$. For example, use a visual fraction model to show $(2/3) \times 4 = 8/3$, and create a story context for this equation. Do the same with $(2/3) \times (4/5) = 8/15$. (In general, $(a/b) \times (c/d) = ac/bd$.)	SE: 331–332, 333–336, 337–340, 341–344, 345–348, 349–352, Reteaching: 371–372 Sets A–D TE: 331–332A, 333A–336B, 337A–340B, 341A–344B, 345A–348B, 349A–352B, Reteaching: 371–372 Sets A–D
b. Find the area of a rectangle with fractional side lengths by tiling it with unit squares of the appropriate unit fraction side lengths, and show that the area is the same as would be found by multiplying the side lengths. Multiply fractional side lengths to find areas of rectangles, and represent fraction products as rectangular areas.	SE: 331–332, 353–356, Reteaching: 372 Set E TE: 331–332, 353A–356B, Reteaching: 371–372 Set E

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 5	enVision Mathematics, ©2020 Grade 5
5. Interpret multiplication as scaling (resizing), by:	
a. Comparing the size of a product to the size of one factor on the basis of the size of the other factor, without performing the indicated multiplication.	SE: 331–332, 361–364, Reteaching: 374 Set G TE: 331–332, 361A–364B, Reteaching: 374 Set G
b. Explaining why multiplying a given number by a fraction greater than 1 results in a product greater than the given number (recognizing multiplication by whole numbers greater than 1 as a familiar case); explaining why multiplying a given number by a fraction less than 1 results in a product smaller than the given number; and relating the principle of fraction equivalence $a/b = (n \times a)/(n \times b)$ to the effect of multiplying a/b by 1.	SE: 361–364, Reteaching: 374 Set G TE: 361A–364B, Reteaching: 374 Set G
6. Solve real world problems involving multiplication of fractions and mixed numbers, e.g., by using visual fraction models or equations to represent the problem.	SE: 333–336, 337–340, 357–360, 365–368, 371, Reteaching: 373–374 Sets A, B, F, H; 384, 437–440 TE: 333A–336B, 337A–340B, 357A–360B, 365A–368B, Reteaching: 373–374 Sets A, B, F, H; 384–384C, 437A–440B
7. Apply and extend previous understandings of division to divide unit fractions by whole numbers and whole numbers by unit fractions.	SE: 384 TE: 384–384C
a. Interpret division of a unit fraction by a non-zero whole number, and compute such quotients. For example, create a story context for $(1/3) \div 4$, and use a visual fraction model to show the quotient. Use the relationship between multiplication and division to explain that $(1/3) \div 4 = 1/12$ because $(1/12) \times 4 = 1/3$.	SE: 383, 393–396, 397–400, 405–408, 409–412, Reteaching: 419–420 Sets B–D TE: 383–383A, 393A–396B, 397A–400B, 405A–408B, 409A–412B, Reteaching: 419–420 Sets B–D
b. Interpret division of a whole number by a unit fraction, and compute such quotients. For example, create a story context for $4 \div (1/5)$, and use a visual fraction model to show the quotient. Use the relationship between multiplication and division to explain that $4 \div (1/5) = 20$ because $20 \times (1/5) = 4$.	SE: 383, 393–396, 397–400, 401–404, 405–408, 409–412, Reteaching: 419–420 Sets B–D TE: 383–383A, 393A–396B, 397A–400B, 401A–404B, 405A–408B, 9A–412B, Reteaching: 419–420 Sets B–D

c. Solve real world problems involving division of unit fractions by non-zero whole numbers and division of whole numbers by unit fractions, e.g., by using visual fraction models and equations to represent the problem. For example, how much chocolate will each person get if 3 people share $\frac{1}{2}$ lb of chocolate equally? How many $\frac{1}{3}$ -cup servings are in 2 cups of raisins?	SE: 383, 393–396, 397–400, 401–404, 405–408, 409–412, Reteaching: 419–420 Sets B–D TE: 383–383A, 393A–396B, 397A–400B, 401A–404B, 405A–408B, 409A–412B, Reteaching: 419–420 Sets B–D
Measurement and Data 5.MD	
A. Convert like measurement units within a given measurement system.	
1. Convert customary and metric measurement units within a given measurement system (e.g., convert 5 cm to 0.05 m). Use these conversions in solving multi-step, real world problems involving distances, intervals of time, liquid volumes, masses of objects, and money (including problems involving simple fractions or decimals). For example, 3.6 liters and 4.1 liters can be combined as 7.7 liters or 7700 milliliters.	SE: 487–488, 489–492, 93–496, 497–500, 501–504, 505–508, 509–512, 513–516, 517–520, 521–524, Reteaching: 527–528 Sets A–H; 536 TE: 487–488A, 489A–492B, 493A–496B, 497A–500B, 501A–504B, 505A–508B, 509A–512B, 513A–516B, 517A–520B, 521A–524B, Reteaching: 527–528 Sets A–H; 536–536C
B. Represent and interpret data.	
2. Make a line plot to display a data set.	
a. Use operations on fractions of a unit ($\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$) for this grade to solve problems involving information presented in line plots.	SE: 427–428, 429–432, 433–436, 437–440, 441–444, Reteaching: 447–448 Sets A–C TE: 427–428A, 429A–432B, 433A–436B, 437A–440B, 441A–444B, Reteaching: 447–448 Sets A–C
b. Use information from a line plot representing an unequal situation and redistribute whole or fractional parts to create an equal distribution. For example, given different measurements of liquid in identical beakers, find the amount of liquid each beaker would contain if the total amount in all the beakers were redistributed equally.	SE: 429–432, 437–440, 441–444 TE: 429A–432B, 437A–440B, 441A–444B

C. Geometric measurement: understand concepts of volume and relate volume to multiplication and to addition.	
3. Recognize volume as an attribute of solid figures and understand concepts of volume measurement.	SE: 456 TE: 455-456C
a. A cube with side length 1 unit, called a “unit cube,” is said to have “one cubic unit” of volume, and can be used to measure volume.	SE: 455, 457–460, 473–476, Reteaching: 479 Set A TE: 455–455A, 457A–460B, 473A–476B, Reteaching: 479 Set A
b. A solid figure which can be packed without gaps or overlaps using n unit cubes is said to have a volume of n cubic units.	SE: 457–460, 473–476, Reteaching: 479 Set A TE: 457A–460B, 473A–476B, Reteaching: 479 Set A
4. Measure volumes by counting unit cubes, using cubic cm, cubic in, cubic ft, and improvised units.	SE: 456, 457–460, 461–464, 473–476 TE: 456, 457A–460B, 461A–464B, 473A–476B
5. Relate volume to the operations of multiplication and addition and solve real world and mathematical problems involving volume.	SE: 456, 461-464, Reteaching: 479 Set B TE: 456-456C, 461A-464B, Reteaching: 479 Set B
a. Find the volume of a right rectangular prism with whole-number side lengths by packing it with unit cubes, and show that the volume is the same as would be found by multiplying the edge lengths, equivalently by multiplying the height by the area of the base.	SE: 456, 461-464, Reteaching: 479 Set B TE: 456-456C, 461A-464B, Reteaching: 479 Set B
b. Represent threefold whole-number products as volumes, e.g., to represent the associative property of multiplication.	SE: 456, 461-464, Reteaching: 479 Set B TE: 456-456C, 461A-464B, Reteaching: 479 Set B
c. Apply the formulas $V = l \times w \times h$ and $V = B \times h$ (where B is the area of the base) for rectangular prisms to find volumes of right rectangular prisms with whole number edge lengths in the context of solving real world and mathematical problems.	SE: 455, 461-464, Reteaching: 479 Set B TE: 455-455A, 461A-464B, Reteaching: 479 Set B

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 5	enVision Mathematics, ©2020 Grade 5
d. Recognize volume as additive. Find volumes of solid figures composed of two non-overlapping right rectangular prisms by adding the volumes of the non-overlapping parts, applying this technique to solve real world problems.	SE: 455, 465-468, 469-472, Reteaching: 480 Sets C, D TE: 455-455A, 465A-468B, 469A-472B, Reteaching: 480 Sets C, D
Geometry 5.G	
A. Graph points on the coordinate plane to solve real-world and mathematical problems.	
1. Use a pair of perpendicular number lines, called axes, to define a coordinate system, with the intersection of the lines (the origin) arranged to coincide with the 0 on each line and a given point in the plane located by using an ordered pair of numbers, called its coordinates. Understand that the first number indicates how far to travel from the origin in the direction of one axis, and the second number indicates how far to travel in the direction of the second axis, with the convention that the names of the two axes and the coordinates correspond (e.g., x-axis and x-coordinate, y-axis and y-coordinate).	SE: 563-564, 565-568, 569-572, 577-580, Reteaching: 583-584 Sets A, B, C TE: 563-564A, 565A-568B, 569A-572B, 577A-580B, Reteaching: 583-584 Sets A, B, C
2. Represent real world and mathematical problems by graphing points in the first quadrant of the coordinate plane, and interpret coordinate values of points in the context of the situation.	SE: 563-564, 569-572, 573-576, 577-580, Reteaching: 583-584 Sets B, C; 592, 601-604, Reteaching: 612 Set C TE: 563-564A, 569A-572B, 573A-576B, 577A-580B, Reteaching: 583-584 Sets B, C; 592-592C, 601A-604B, Reteaching: 612 Set C

**A Correlation of enVision Mathematics, ©2020
to the South Dakota State Standards for Mathematics**

South Dakota State Standards for Mathematics, Grade 5	enVision Mathematics, ©2020 Grade 5
B. Classify two-dimensional figures into categories based on their properties.	
3. Understand that attributes belonging to a category of two-dimensional figures also belong to all subcategories of that category. For example, all rectangles have four right angles and squares are rectangles, so all squares have four right angles.	<p>SE: 619–620, 621–624, 625–628, 629–632, 633–636, Reteaching: 639–640 Sets A–D</p> <p>TE: 619–620A, 621A–624B, 625A–628B, 629A–632B, 633A–636B, 639–Reteaching: 640 Sets A–D</p>
4. Classify two-dimensional figures in a hierarchy based on properties. For example, all rectangles are parallelograms, because they are all quadrilaterals with two pairs of opposite, parallel, equal-length sides.	<p>SE: 619–620, 621–624, 625–628, 629–632, 633–636, Reteaching: 639–640 Sets B, C, D</p> <p>TE: 619–620A, 621A–624B, 625A–628B, 629A–632B, 633A–636B, 639–Reteaching: 640 Sets B, C, D</p>
