# A Correlation of Investigations 3 in Number, Data, and Space ©2017 To the Texas Essential Knowledge and Skills for Mathematics

## Introduction

This document demonstrates how **Investigations 3** in Number, Data, and Space, ©2017, aligns to Texas Essential Knowledge and Skills for Mathematics, Grades K-5. Correlation references are to the Sessions of Investigations 3.

**Investigations in Number, Data, and Space**® 3<sup>rd</sup> Edition, known as Investigations 3, maintains the standard of excellence as a focused and coherent program that supports students to make sense of mathematical ideas and supports their teachers to make sense of both mathematics content and student thinking.

The guiding principles from **Investigations 2nd** Edition are maintained in **Investigations 3**. These guiding principles follow:

- 1) Students have mathematical ideas and are given the opportunity to learn in an environment that focuses on making sense of mathematics. Students build on the ideas they already have and learn about new mathematics they have never encountered.
- 2) Teachers are engaged in ongoing learning about mathematics content, pedagogy, and student learning.
- 3) Teachers collaborate with the students and use the curriculum to maintain a clear, focused, and coherent agenda for mathematics teaching.

**Investigations 3** ensures that its instructional approach works in a wide variety of classrooms. It maintains full availability for classrooms that use print materials and provides access to digital enhancements for both teachers and students in classrooms with regular or periodic access to those technologies.

**Investigations 3** offers digital tools and technologies to enhance its research-based, field tested, and proven instructional model. These tools provide teachers with easy access to the professional development materials that are a hallmark of the program, support classroom management tasks, and help students capture and share their work.

Core program resources for teaching and learning will be made available on Savvas' latest learning management system, Savvas Realize™.
