**Introduction**

The following document demonstrates how the ***Elevate Science* ©2019** program supports the Archdiocese of Milwaukee’s current science curriculum for Grade 5, through concurrent implementation of the Next Generation Science Standards. For each standard, correlation references are to the Student Edition and Teacher Edition where applicable.

***Elevate Science*** is a comprehensive K-5 science program that focuses on active, student-centered learning. It builds students’ critical thinking, questioning, and collaboration skills, and fuels interest in STEM and creative problem solving while supporting literacy development for elementary-age learners. Developed to support Next Generation Science Standards (NGSS), ***Elevate Science*** integrates three dimensional learning of the Scientific and Engineering Practices, Crosscutting Concepts (CCC), and Disciplinary Core Ideas (DCIs).

The ***Elevate Science*** blended print and digital curriculum engages students in phenomena-based inquiry and hands-on investigations.

- Problem-based learning Quests put students on a journey of discovery
- Engineering-focused features infuse STEM learning
- Coding and innovation engage students and build 21<sup>st</sup> century skills

The Teacher’s Edition of ***Elevate Science*** helps elementary educators teach science with confidence: Scaffolding, ELD, differentiated instruction, and an instructional organization based upon the 5E learning model, (Engage, Explore, Explain, Extend/Elaborate, Evaluate), provide all the support needed for successful teaching practices. Professional development offers point-of-use support. A full-view approach to inquiry and testing provides new options for a variety of hands-on labs and assessments for three-dimensional learning.

***Elevate Science*** prepares students for the challenges of tomorrow, building strong reasoning skills and critical thinking strategies as they engage in explorations, formulate claims, and gather and analyze data that promote evidence-based argument. Designed for today’s classroom, preparing students for tomorrow’s world. ***Elevate Science*** promises to:

- Elevate thinking.
- Elevate learning.
- Elevate teaching.

| Next Generation Science Standards  | Elevate Science<br>©2019  |
|--|---|
| <b>Disciplinary Core Ideas</b>   |   |
| <p><b>LS2.A: Interdependent Relationships in Ecosystems</b><br/>           The food of almost any kind of animal can be traced back to plants. Organisms are related in food webs in which some animals eat plants for food and other animals eat the animals that eat plants. Some organisms, such as fungi and bacteria, break down dead organisms (both plants or plants parts and animals) and therefore operate as “decomposers.”<br/>           Decomposition eventually restores (recycles) some materials back to the soil. Organisms can survive only in environments in which their particular needs are met. A healthy ecosystem is one in which multiple species of different types are each able to meet their needs in a relatively stable web of life. Newly introduced species can damage the balance of an ecosystem.</p> | <p><b>SE/TE:</b> 118–119, 205, 212, 324–325, 352–353, 368, 369, 371, 372–373, 375, 382, 383, 386, 388<br/> <b>TE Only:</b> 328a, 360a, 368a, 378a, 386a</p> |
| <p><b>LS2.B: Cycles of Matter and Energy Transfer in Ecosystems</b><br/>           Matter cycles between the air and soil and among plants, animals, and microbes as these organisms live and die. Organisms obtain gases, and water, from the environment, and release waste matter (gas, liquid, or solid) back into the environment.</p>  | <p><b>SE/TE:</b> 372–373, 392, 352–353, 370, 388, 389, 392<br/> <b>TE Only:</b> 328a, 360a, 368a, 378a, 386a</p>  |
| <b>Science and Engineering Practices</b>   |   |
| <p><b>Developing and Using Models</b><br/>           Develop a model to describe phenomena.</p>  | <p><b>SE/TE:</b> 279, 283, 394–395<br/> <b>TE Only:</b> 320a, 328a, 360a, 368a, 378a, 386a</p>  |
| <p><b>Science Models, Laws, Mechanisms, and Theories Explain Natural Phenomena</b><br/>           Science explanations describe the mechanisms for natural events.</p>   | <p><b>SE/TE:</b> 371 (mechanism for decomposition), 380–381 (mechanism for succession), EM6</p>   |

| <b>Performance Expectation 5-ESS2-1</b>   |   |
| <p>Develop a model using an example to describe ways the geosphere, biosphere, hydrosphere, and/or atmosphere interact.</p> <p><b>Clarification Statement</b> Examples could include the influence of the ocean on ecosystems, landform shape, and climate; the influence of the atmosphere on landforms and ecosystems through weather and climate; and the influence of mountain ranges on winds and clouds in the atmosphere. The geosphere, hydrosphere, atmosphere, and biosphere are each a system.</p> <p><b>Assessment Boundary</b> Assessment is limited to the interactions of two systems at a time.</p> | <p><b>SE/TE:</b> 103, 121, 134–135, 136–137, 394–395<br/> <b>TE Only:</b> 96d, 102a, 110a, 120a</p>   |
| <b>Disciplinary Core Ideas</b>  |   |
| <p><b>ESS2.A: Earth Materials and Systems</b><br/> Earth's major systems are the geosphere (solid and molten rock, soil, and sediments), the hydrosphere (water and ice), the atmosphere (air), and the biosphere (living things, including humans). These systems interact in multiple ways to affect Earth's surface materials and processes. The ocean supports a variety of ecosystems and organisms, shapes landforms, and influences climate. Winds and clouds in the atmosphere interact with the landforms to determine patterns of weather.</p>  | <p><b>SE/TE:</b> 98–99, 104, 105, 106–107, 109, 112–113, 114, 115, 121, 122, 123, 124–125, 127, 128, 130, 132–133, 134–135, 136–137<br/> <b>TE Only:</b> 102a, 110a, 120a</p> |
| <b>Science and Engineering Practices</b>  |   |
| <p><b>Developing and Using Models</b><br/> Develop a model using an example to describe a scientific principle.</p>   | <p><b>SE/TE:</b> 103, 136–137, 247, 252–253, 255, 262, 264, 270–271, 283<br/> <b>TE Only:</b> 102a, 110a, 120a, 246a</p>  |
